

# Startled with the harmful effects of solar cells on the environment

In the process of producing solar batteries, NF3 gas - the greenhouse effect that makes the Earth's atmosphere thousands of times hotter than CO2 - leaks into the atmosphere can cause Climate Change.

In the process of producing solar batteries, NF3 gas - the greenhouse effect that makes the Earth's atmosphere thousands of times hotter than CO2 - leaks into the atmosphere can cause Climate Change.

1. You will be startled when watching the video describing the process of Earth's hotness in the past 100 years

Between 1990 and 2015, the amount of CO2 increased only 5.6% but the amount of NF3 was 1,000%. The amount of NF3 increases in the US and also the solar cell markets in Asia.
