

# Steps to bring applications on the Taskbar on Windows 10 to the middle of the screen like Windows 11

Putting the application on the Taskbar in the middle of the screen will make the Windows 10 operating system similar to the latest design of Windows 11 that has been released on the market.

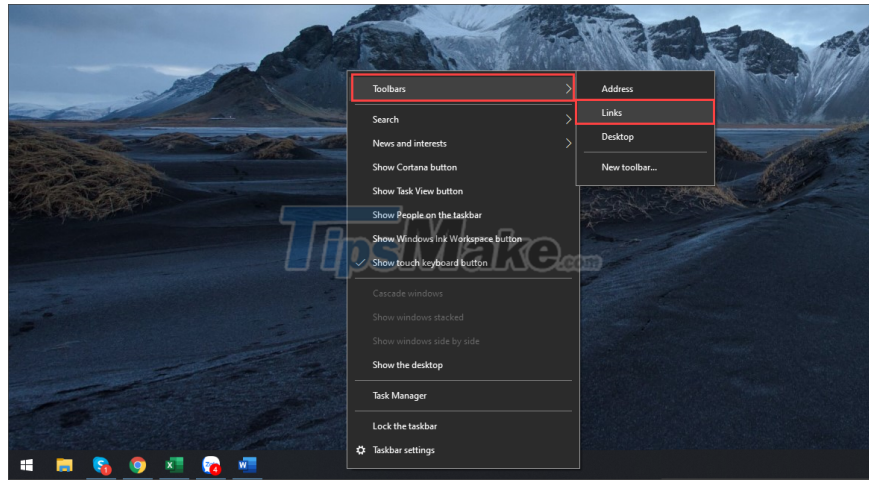

Design on Windows 11 revolves around simplicity and modern design with new technology. In particular, the Taskbar has received a lot of changes, especially when applications are moved to the middle of the screen like the famous MacOS operating system.

However, few people know that on Windows 10 we can also bring all applications on the Taskbar to the middle of the screen. In this article, TipsMake will show you how to put all applications on the Taskbar in the middle of the Windows 10 screen like Windows 11 and MacOS.

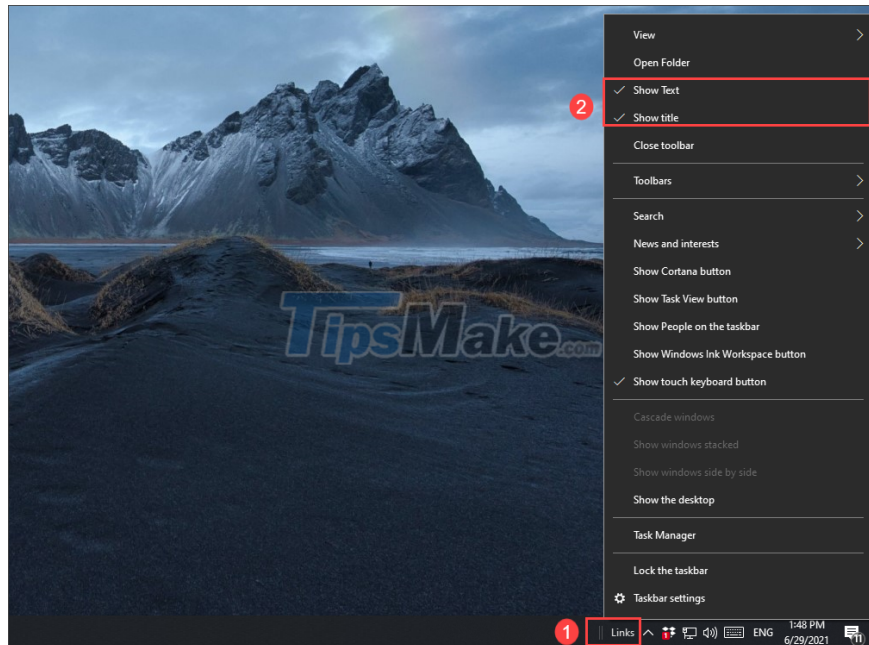

Step 1: Right-click on the Taskbar, select Lock the taskbar to unlock the toolbars and edit them.

Step 2: Then, continue to Right-click on the Taskbar and select Toolbars => Links to add a link to the Taskbar.

Step 3: After adding Links in the Taskbar, you will see the Links section in the right corner of the screen. To continue setting, right-click Links (1) and select Show Text / Show Title (2).

Step 4: So you have finished setting up Links on the Taskbar, the next thing is to drag the Links item from the right corner of the screen to the left corner of the screen. Drag close to the Search button or close to the Start Menu to push all applications to the opposite direction.

To move Links, put your mouse on the vertical bar and drag them to place them where they are needed.

Step 5: After dragging the Links item to the left of the screen, you will see all the applications pushed to the left and before the icons of the applications there will be a Move item (two vertical lines).

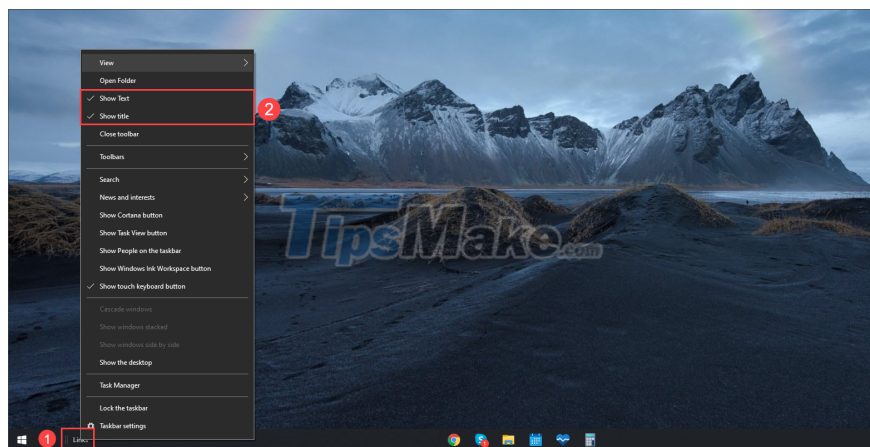

Now, drag Move (Two vertical lines) to the center of the screen to bring all the icons on the Taskbar to the center of the screen.

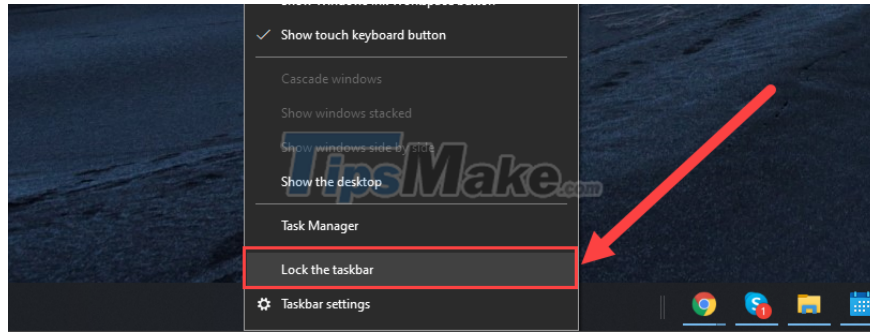

Step 6: So, you have finished putting all the applications on the Taskbar in the middle of the computer screen like MacOS, Windows 11.

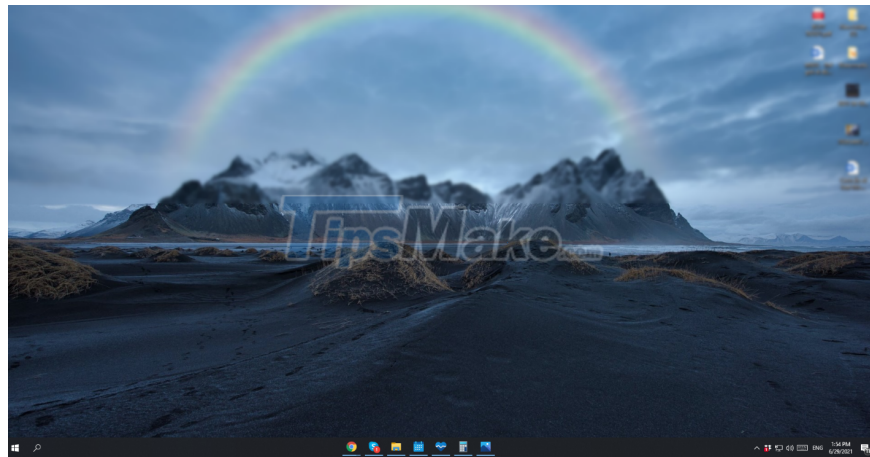

Step 7: Next, right-click Links (1) and uncheck Show Text / Show Title (2) to turn off the display of Links on the Taskbar.

Step 8: Finally, right-click on the Taskbar and select Lock the taskbar to lock the editing of the Taskbar, and also hide the entire content of Links.

Step 9: Thus, you have finished putting all applications on the Taskbar in the middle of the screen like Windows 11 and MacOS.

In this article, TipsMake has shown you how to put all applications displayed on the Taskbar in the middle of the Windows 10 screen. Have a nice day!
