On a beautiful day, you open up your computer to chat, chat with friends through Viber when you receive an error message: **"" To activate viber on your desktop you must have installed viber on your mobile device ""** . Actually, I still use it yesterday, why is it so wrong today? In the article below, TipsMake.com will guide you how to fix this Viber error on your computer.

Fix Viber error " To activate viber on your desktop . ":

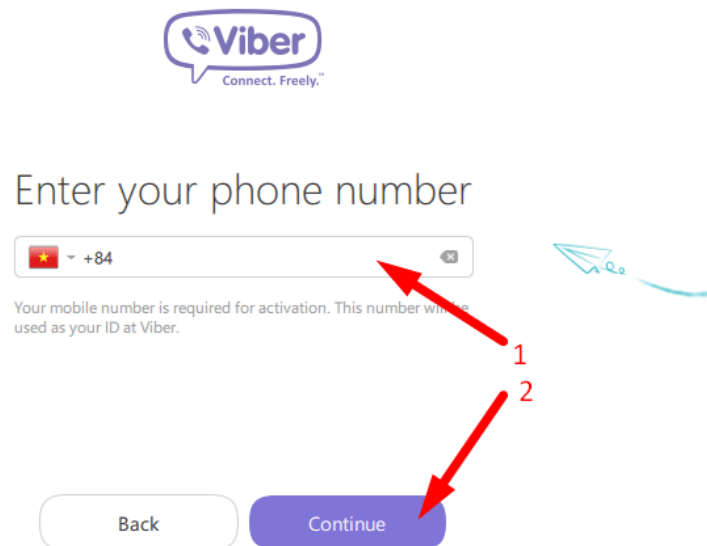

The phenomenon of this error is as follows:

1. Viber on mobile phones, tablets still work normally. However, there will be many cases where Viber will not sync messages for a period of time (usually 1 day).
2. When you start Viber on your computer, an error message appears.

Click **Close** , Viber will turn off, and press **Back** then return to the screen to enter the phone number.

At this point, you select **I have Viber on my phone** , the **phone** number input screen will appear, enter the correct phone number you are using for Viber on your phone, then> **Continue**.

The QR code scanning screen appears, you bring your phone camera to the QR code to capture. Note, the phone needs a network connection to receive a QR code scan notification from Viber on the computer.

Viber Security Update

Your phone scanner should now be open. Please, scan the code.

Back

Scan with phone

? How do I open my scanner on Viber?

📷 [My camera is not working. What can I do?](#)

Done, now can be used normally.

✓ Success!

You have successfully added your desktop as a secure device.

Open Viber

If the above is not possible, please see below.

1. Do you check the date on the computer and the mobile phone to see if they overlap? This way does not work.
2. Remove and reinstall Viber on the computer. Also do not lose!

After many tests, TipsMake.com has learned how to fix. The cause of this phenomenon is due to:

1. The phone number that authenticates the Viber account on the server is incorrect (due to Viber or some other cause).

First you need to remove "clean" Viber on your computer using **Revo Uninstaller** or **CCleaner** , then restart the computer.
