

Steps to install Windows 11 preview

Windows 11 is officially leaked and you can even install it now. To install the first beta of Windows 11 follow these instructions:

Download the ISO file and create a Windows 11 installation USB

To download the Windows 11 ISO file, visit the link [here](#) or [here](#).

Next you need to create a Windows 11 installation USB according to the instructions [here](#).

Installing

Step 1: Set up the computer to boot from USB boot

Some computers will automatically recognize the USB boot and proceed to boot into the Windows 11 installation file on the USB after rebooting. If your machine is not among them, you need to set it to boot from USB boot.

1. During the boot process, press F2 or F12 (depending on the computer) to access Boot Option Setup
2. Then, use the arrow keys to navigate in the BIOS to access Boot > Removeable Devices (or USB Storage Device or External Drive depending on the model), press Enter to select load the operating system from USB.
3. If you need more detailed instructions, please visit here: [How to set up BIOS to boot from USB/CD/DVD, external hard drive](#)

Step 2: Start installing Windows 11

Basically, the installation process of Windows 11 is not difficult because most of the settings are similar to Windows 10 with only a slight change in the interface.

After performing all the above steps, the system will run USB boot and bring you to the screen to select the time, language and keyboard. When finished, click Next to continue.
