

Steps to restore Windows Security on Windows 10

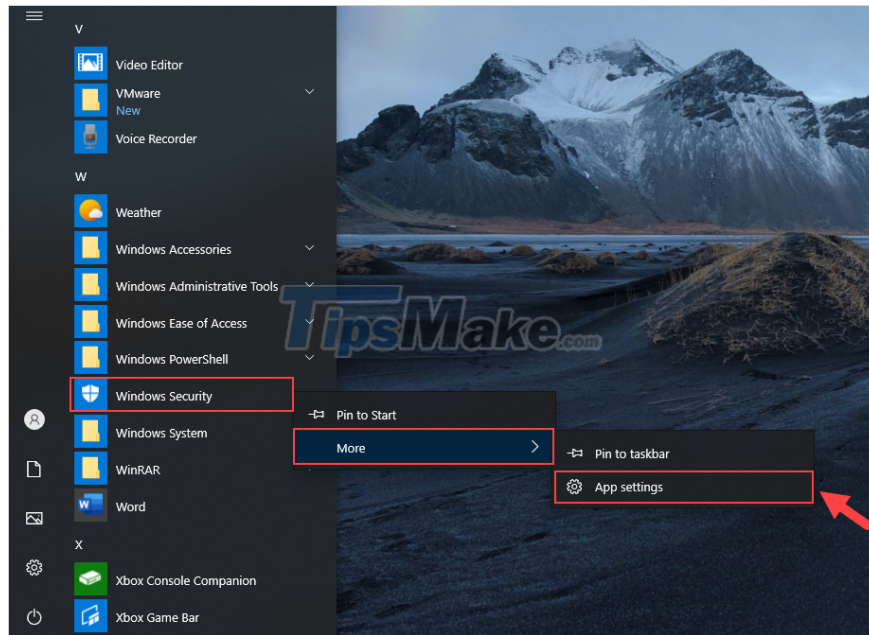

Improper customization of Windows Security can pose a security risk to users. To solve this problem, you need to restore Windows Security to default so that they maximize Windows protection.

Improper customization of Windows Security can pose a security risk to users. To solve this problem, you need to restore Windows Security to default so that they maximize Windows protection.

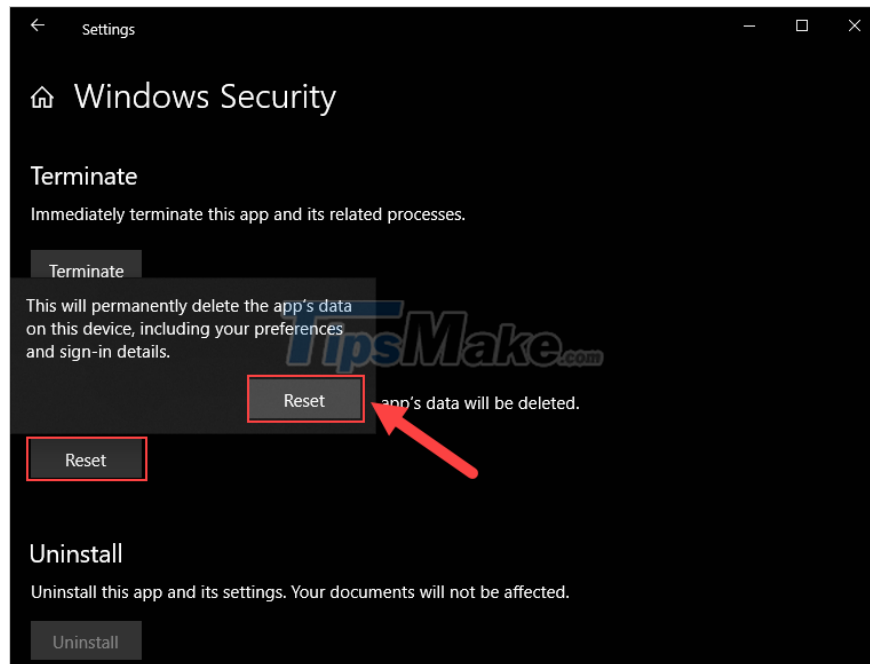

1. How to restore Windows Security in Settings

Windows 10's Settings allows you to reset all system software, and restoring Windows Security needs to be done as follows:

Step 1: At the main screen of the Desktop, you in turn select **Start Menu => Windows Security => More => App Settings** to open the settings.

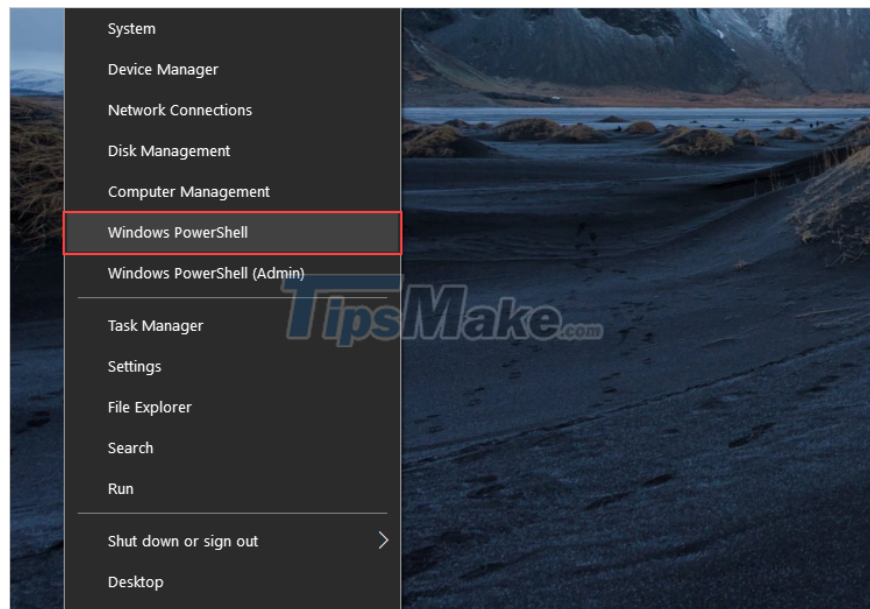

Step 2: In the settings window, scroll down to find the **Reset** item and confirm **Reset** so that the system automatically activates Windows Security restore.

2. How to Restore Windows Security in PowerShell

PowerShell is the modern script of Windows 10, with PowerShell, users can easily interfere with many things on Windows.

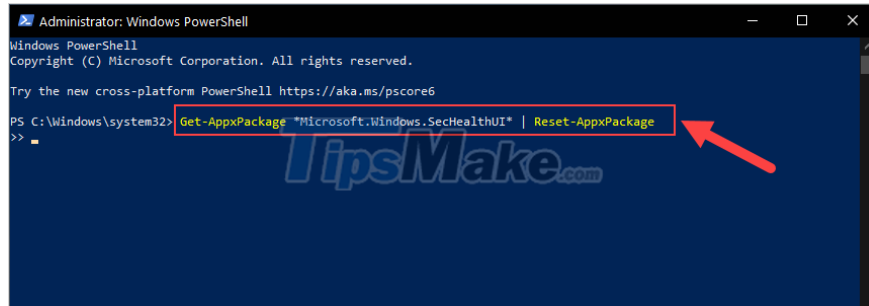

Step 1: you **right click on a MenuStart** and select **Windows PowerShell (admin)** to open.

Step 2: Then, you proceed to enter the command below and press **Enter** to open.

```
Get-AppxPackage *Microsoft.Windows.SecHealthUI* | Reset-AppxPackage
```

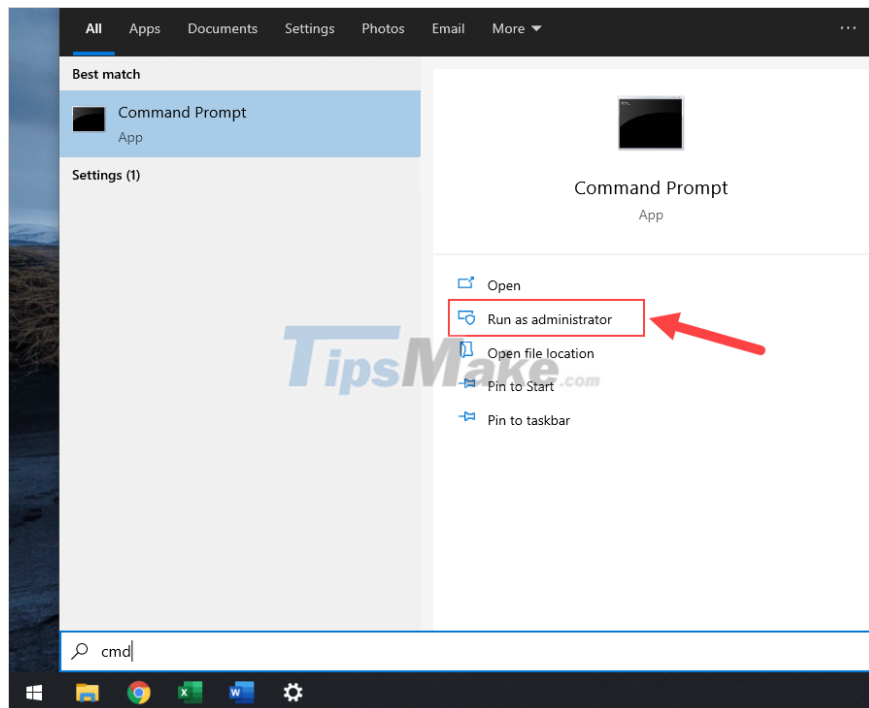

After entering the command, the system will proceed to run the command to restore Windows Security to the computer.

3. How to Restore Windows Security in Command Prompt

Similar to PowerShell, Command Prompt is also a scripter, but they were released a long time ago on Windows. To reactivate Windows Security, you need to do the following:

Step 1: You proceed to open **MenuStart** , enter **cmd** and select **Run as administrator** to open.

Step 2: When the Command Prompt window appears, enter the following command to restore Windows Security.

```
PowerShell -ExecutionPolicy Unrestricted -Command "& {$manifest = (Get-AppxPacka
```

```
Administrator: Command Prompt
Microsoft Windows [Version 10.0.19041.508]
(c) 2020 Microsoft Corporation. All rights reserved.

C:\Windows\system32>PowerShell -ExecutionPolicy Unrestricted -Command "& {$manifest = (Get-AppxPackage *Microsoft.Windows.SecHealthUI*).InstallLocation + '\AppxManifest.xml' ; Add-AppxPackage -DisableDevelopmentMode -Register $manifest}"

C:\Windows\system32>
```
