

Steps to Uninstall Bitdefender on Windows

While uninstalling Bitdefender is easy, not doing so in the recommended manner outlined below may result in unwanted files remaining on your machine, resulting in problems installing a program. other viruses.

Boasting premium features for both free and paid versions, Bitdefender is one of the best antivirus tools available and has become one of the most popular consumer solutions available today. .

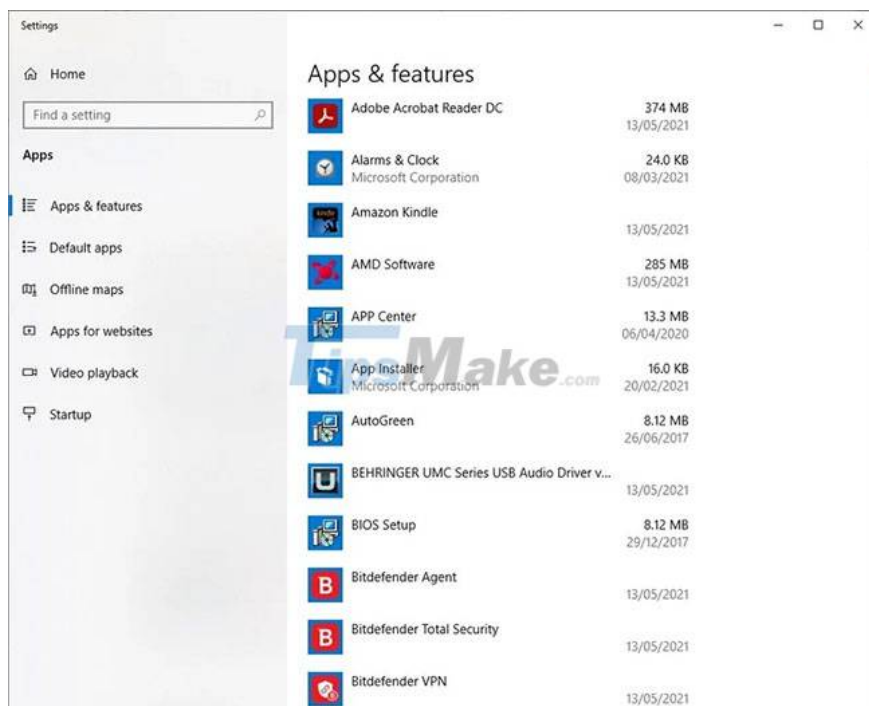

However, users of this highly rated software at some point may want to remove the software from their PC, be it because their subscription has expired or because they are looking to try a different antivirus provider. to replace.

While uninstalling Bitdefender is easy, not doing so in the recommended manner outlined below may result in unwanted files remaining on your machine, resulting in problems installing a program. other viruses.

Follow **TipsMake** 's **instructions** and the whole process should take no more than 10 minutes.

How to Uninstall Bitdefender on Windows

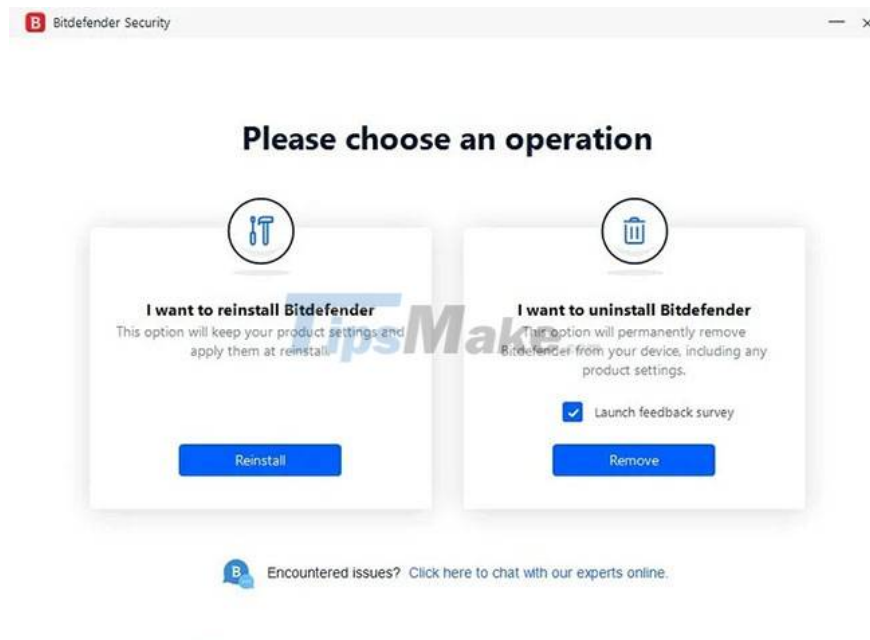

Step 1. First, click **Start** , then click **Settings**. Then click the **Apps** icon on the left panel.

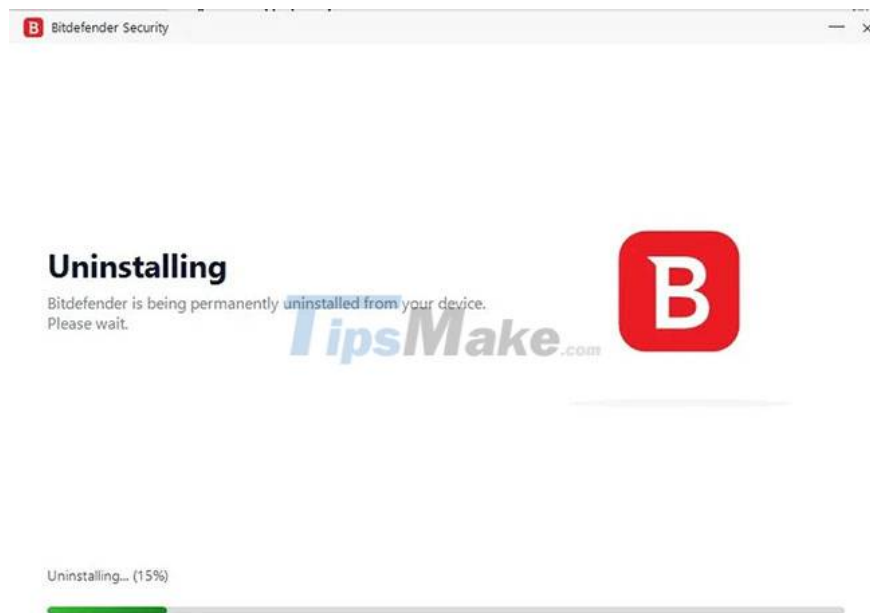

Step 2. Find the Bitdefender product you want to remove and select **Uninstall**. Click **Uninstall** again to confirm your choice. If the Windows user account control prompt is displayed as above, select **Yes**.

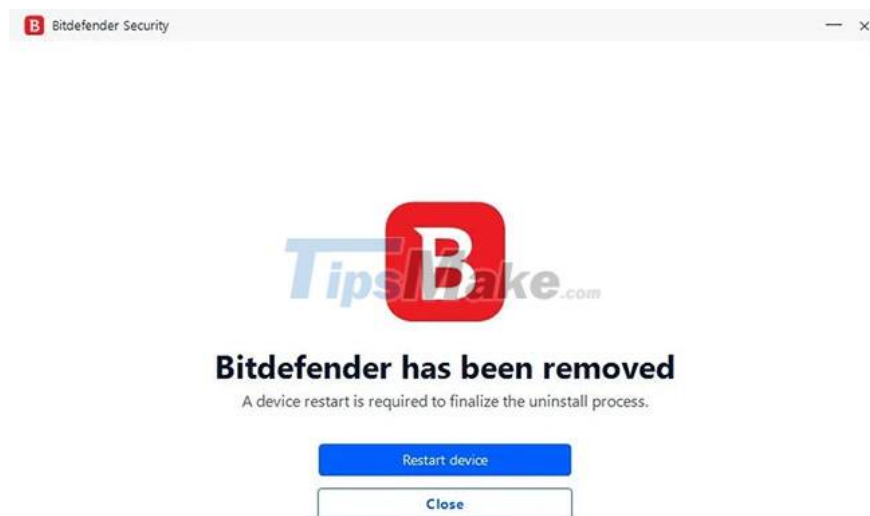

Step 3. Uncheck the box if you don't like filling out the Bitdefender survey, then click **Remove** and click **Next** to continue.

Step 4. Wait for the uninstallation to complete.

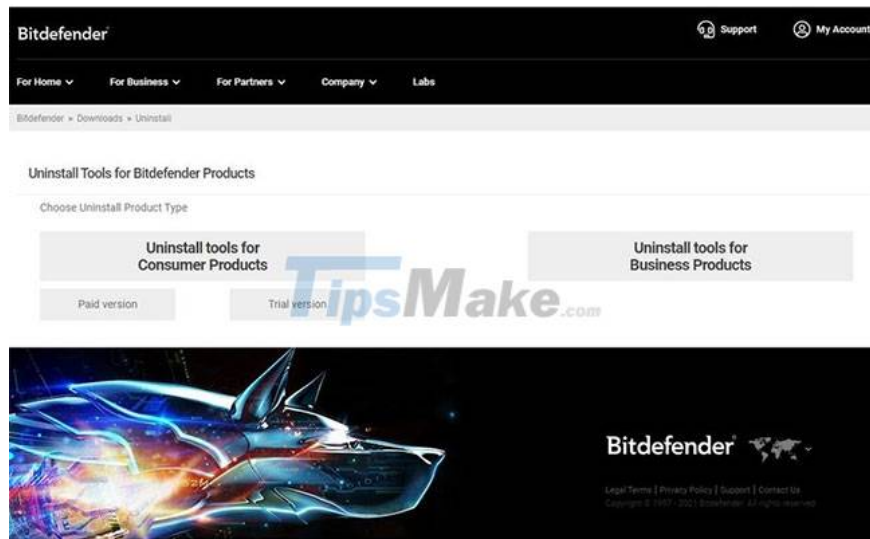

Step 5. If you have finished uninstalling all the Bitdefender programs that you want to remove, click **Restart device** to restart the system.

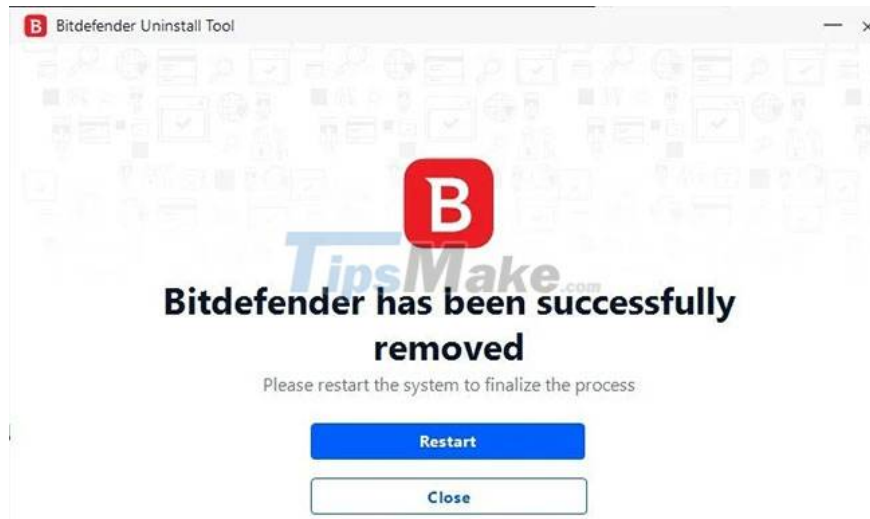

However, if there are still other Bitdefender programs on your system, such as Bitdefender Agent or Bitdefender VPN that you want to remove, click close and repeat the above steps for the rest of the programs. It should be noted that you need to uninstall Bitdefender VPN before you can uninstall Bitdefender Agent.

If you are looking to completely remove the program and all its associated files and settings, Bitdefender recommends using its own uninstallation tools in the final step.

Step 6. Go to Bitdefender's website and select the type of Bitdefender program you are trying to uninstall: Paid or Trial version. Then select the uninstall tool corresponding to your Bitdefender version, download and run it. If the Windows UAC prompt is displayed, select **Yes**.

Step 7. Confirm that you want to uninstall. Finally, click **Restart** to complete the process.

Work completed! Bitdefender is now completely removed from your system.
