

# Struggling the folding screen smartphone of the drug lord's brother: It's just the Galaxy Fold with more gold decals

You probably guessed that the foldable phone called Escobar Fold 2 is actually a Samsung Galaxy Fold based on the design and user interface.

But recently, a newly released video clip showed that the notorious drug lord's brother didn't even do much to hide that fact.

Youtuber specializing in Marques technology "MKBHD" Brownlee quickly "on hand" the Escobar Fold 2 and remove the yellow sticker on the body, revealing Samsung brand. You will also see the Samsung logo clearly visible once you remove this sticker layer on the hinge. Of course that's in the case of the One UI user interface and the unique design of this device is not enough to convince you that it is a Galaxy Fold!

Brownlee also speculated that Escobar's company actually only ships the machine to technology YouTubers, or reporters, bloggers specializing in this field, to resonate. And if you believe that there is a foldable phone priced at \$ 399 and accidentally ordered, then congratulations because you probably will never receive it. Basically, this is just a trick of the drug boss's little brother.

And yet, Brownlee said that the two D-class celebrities who advertise on Escobar's YouTube channel actually come from the Cameo service. With this service, you can pay celebrities to shoot a video for you. And of course, Brownlee recommends not buying anything from Escobar's company.

The truth about the foldable phone of Escobar

This is not the first time Escobar has sought to cheat customers. Before Fold 2, the company also had a device called the Escobar Fold - a folding screen Royole Flexpai was renamed. Brownlee revealed that he had ordered this Escobar Fold since December last year and has yet to receive it.
