

# StudyX: AI Learning & Exercises

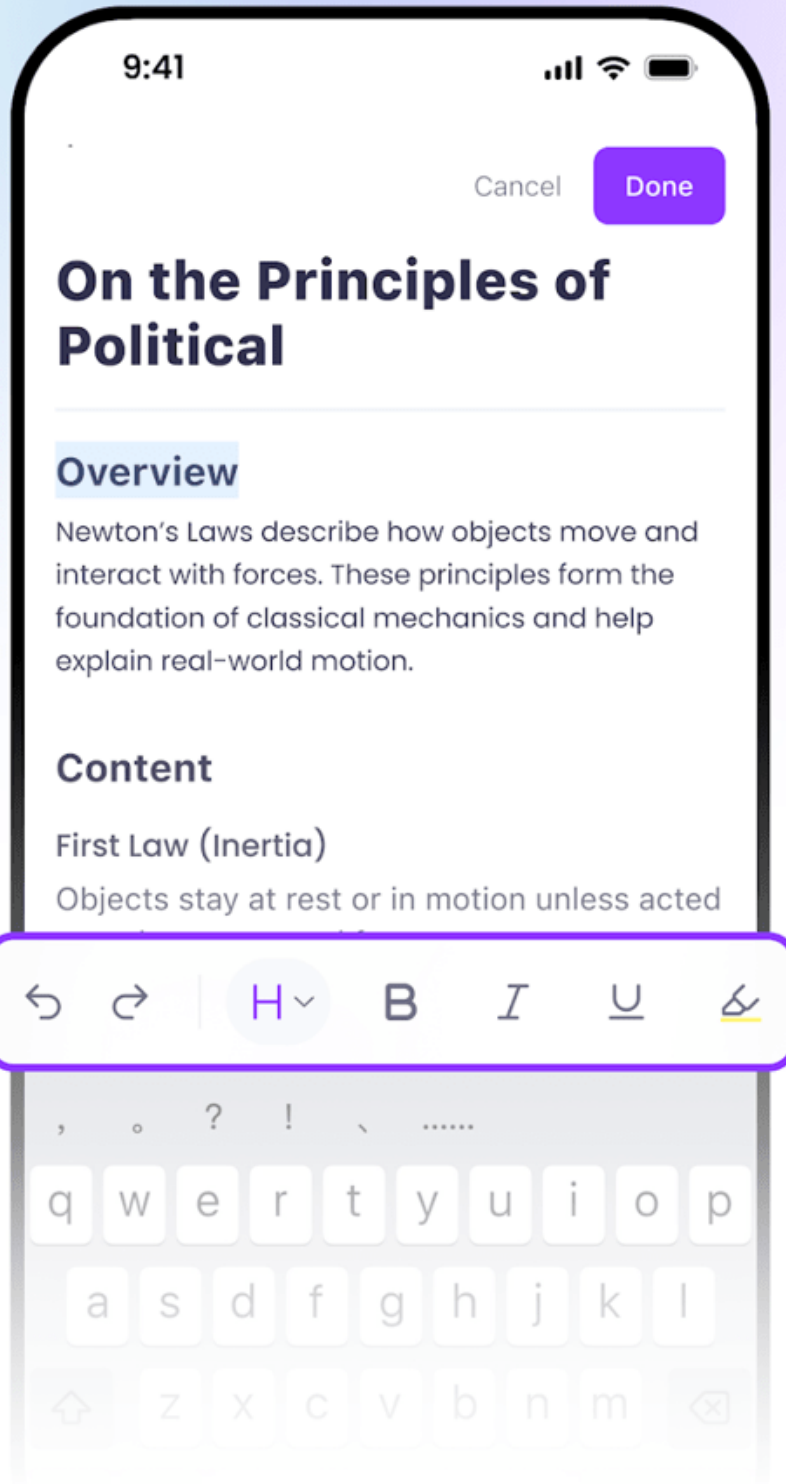

StudyX 2026: AI assistant solves homework for over 50 subjects, summarizes videos, and creates personalized practice tests super fast.

**StudyX: AI learning & homework** has become an indispensable companion for over 16 million learners worldwide. More than just providing answers, StudyX acts as a true tutor, helping you understand the core of the problem, optimize your time, and build a personalized learning path.

If you're looking for an app that can "decode" challenging math problems or transform stressful class hours into concise notes, let's explore the power of StudyX below.

## **Multimodal artificial intelligence: The heart of StudyX 2026**

# Chỉnh sửa xịn hơn Tạo style của bạn

Unlike traditional problem-solving tools that rely solely on static data, StudyX integrates the most advanced large language models ( LLMs ) currently available. The application's breakthrough lies in its **multimodal** processing capabilities : it can understand text, images, PDF files , and even audio/video to provide responses with up to 98% accuracy.

## 1. AI-powered Snap & Solve feature

Encountering a difficult integral calculus problem or a complex chemical equation? Simply take a picture, and StudyX's AI will analyze it and provide a detailed solution. The difference is that the app doesn't just throw out the final result. Each solution comes with:

1. **Step-by-step guide:** Breaking down the problem helps you grasp the logic.
2. **Key knowledge points:** Review the theorems and formulas used.
3. **Common mistakes:** Warning about the "traps" that students often fall into.

For example, consider a problem involving the differentiation of a composite function:

Picture 2 of StudyX: AI Learning & Exercises

AI will clearly explain the chain rule:

Picture 3 of StudyX: AI Learning & Exercises

This level of detail helps you learn how to think critically instead of just coping with homework assignments.

**Transform content intelligently with AI notes.**

# Quét, ra đáp án Giải mọi môn

$f(x)$

In triangle  $ABC$ , it is given that  $AB = BC$ . Point  $D$  lies on segment  $AC$ , and  $BD \perp AC$ . Prove that  $AD = DC$ .

One of the most powerful features that will help StudyX lead the market in 2026 is its **AI notes** . Having to sit for hours listening to lectures or watching lengthy academic YouTube videos is a thing of the past.

1. **YouTube video summary:** Simply paste the video link, and the AI ??will automatically extract the content, categorize the main points, and create a systematic summary.
2. **Digitize your documents:** Upload PDF files, lecture slides, or textbook images, and StudyX will convert them into easily editable text formats, highlighting important terms.
3. **Knowledge systematization:** AI can automatically generate mind maps from notes, giving you an overview of a lesson in just seconds.

## **Enhance long-term memory with flashcards and spaced repetition.**

Learning a lot isn't as important as learning the right way. StudyX leverages memory science to help you study more effectively through **AI flashcards** .

1. **Create flashcards with one touch:** From any document you upload, the AI ??will automatically identify key concepts, vocabulary, or formulas to create a set of flashcards.
2. **Spaced Repetition:** This app calculates when you're about to forget something and reminds you to review it. This is extremely useful for learning IELTS/TOEIC vocabulary or hard-to-remember physics and chemistry formulas.

## **Practice taking a test before the actual exam using the AI ??testing system.**

The pressure of the national high school graduation exam or university entrance exam often stems from not knowing where our weaknesses lie. StudyX addresses this problem with its **AI-powered assessment** feature .

1. **Create customized test questions:** Based on the material you are studying, AI will design multiple-choice questions, true/false questions, or short-answer questions with a difficulty level equivalent to the actual exam.
2. **Knowledge gap analysis:** After each practice test, the app will provide a detailed report on the sections you answered incorrectly and suggest supplementary readings/videos to help you fill those gaps immediately.
3. **Practice for the National High School Graduation Exam:** With a database of exam questions updated continuously until April 2026, StudyX is a mobile "exam preparation center" that helps you familiarize yourself with the latest exam structure from the Ministry of Education.

## **Complete learning cycle: Optimizing performance**

StudyX is not just a standalone feature, but a **complete learning cycle** :

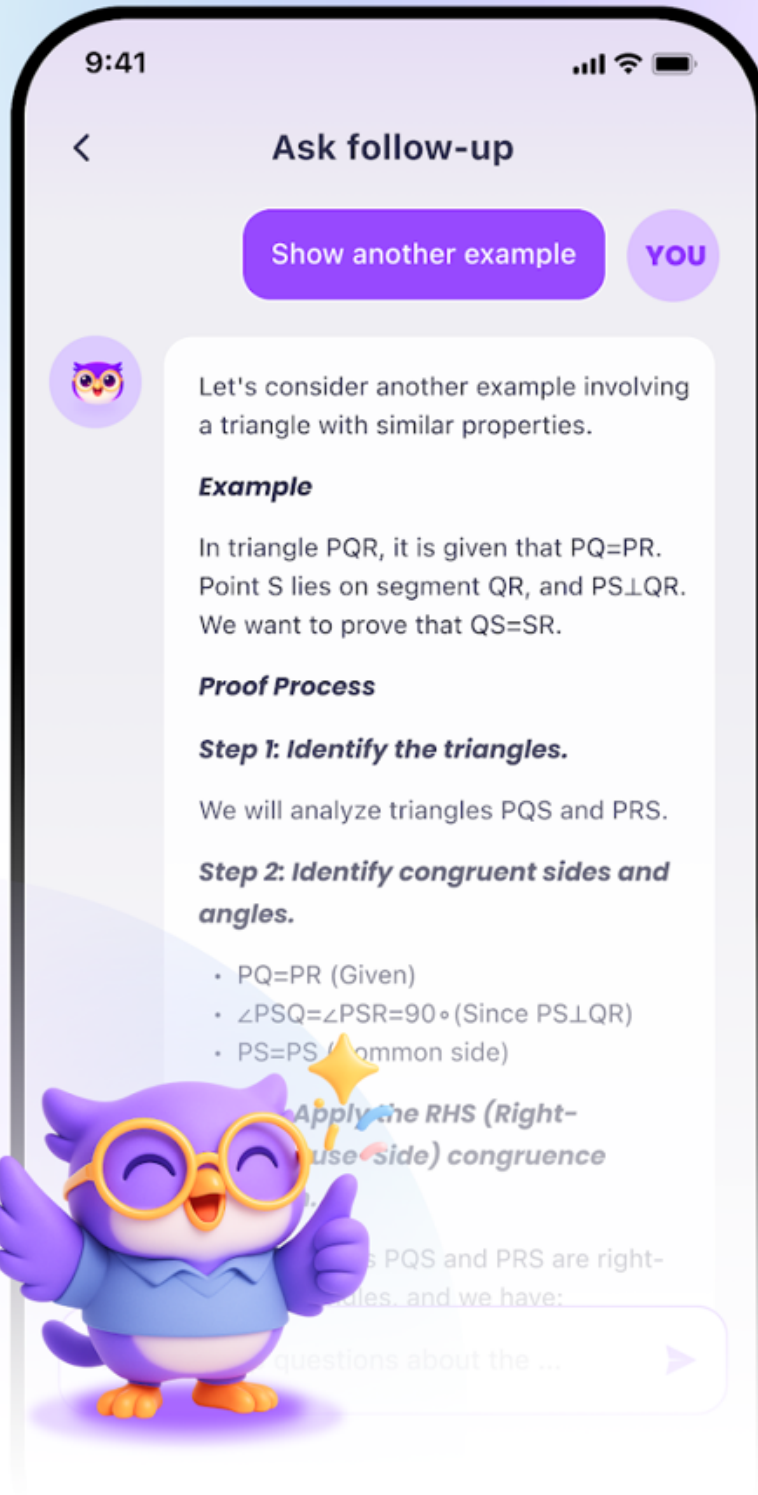

1. **Upload:** Add documents, images, or video links.
2. **Understand:** Using AI to answer questions and summarize knowledge.

3. **Memorize:** Review using automatic flashcards.
4. **Test:** Assess your abilities through personalized practice tests.

Not having to switch back and forth between dozens of apps (like a math solver app, a summary app, a flashcard app) helps you maintain maximum focus (flow state) – the key to top-notch learning.

## Giải từng bước

## Technical specifications and application download information

Criteria	Detailed information
Application name	StudyX: AI Learning & Exercises
Latest version	5.5.9 (Updated 09/04/2026)
Capacity	~88.5 MB
Operating system	Android 7.0 or later / iOS 15.0 or later
Global downloads	16M+ students
Supported languages	Vietnamese, English, and 20+ other languages

### Official StudyX download link:

Scroll up, you'll see the Download button, click on it and you'll find the latest versions of StudyX there.

## Why do over 16 million students trust StudyX?

It's no coincidence that StudyX has a 4.8-star rating on app stores. Here are the reasons why it's set to become the "king" of EdTech (Educational Technology) in 2026:

1. **Available 24/7:** Whether you're studying for an exam at 2 AM or need urgent homework help during a break, the AI is always on standby to respond instantly.
2. **Superior accuracy:** By combining multiple leading AI models (such as GPT-4o, Claude 3.5), StudyX minimizes AI "illusions," ensuring consistently accurate mathematical and scientific solutions.
3. **Extensive community:** Beyond AI, you can also connect with a global community of learners to discuss and solve creative or social problems that machines sometimes don't fully understand.

### Question

In triangle ABC, it is given that  $AB = BC$ . Point D lies on segment AC, and  $BD \perp AC$ . Prove that  $AD = DC$ .

Basic Answer    Super Answer

**Known Conditions** 

- Triangle ABC is given.
- $AB = BC$
- Point D lies on segment AC.
- BD is perpendicular to AC ( $BD \perp AC$ ).

**Proof Objective**

Prove that  $AD = DC$ .

**Proof Process**

**Step 1: Consider triangles ABD and CBD.**

We will analyze triangles ABD and CBD to determine if they are congruent.

**Step 2: Identify congruent sides and angles.**

# Frequently Asked Questions about StudyX (FAQ)

## Is using StudyX considered cheating?

1. It depends on how you use it. If you just copy the answers, that's just going through the motions. But if you use the "Step-by-Step Solutions" feature to understand the solution method, StudyX becomes a great learning tutor.

## Can StudyX solve the National High School Literature exam?

1. StudyX's AI can analyze literary works, create essay outlines, and suggest real-world examples to make your essays more insightful and persuasive.

## Are there any limitations to the free version of StudyX?

1. You can start using it for free with a limited number of problem-solving and summaries each day. For unlimited use and access to advanced features like in-depth AI testing, you can upgrade to the Pro or Plus plan.

## Conclude

**StudyX** is the epitome of the future of education – where technology doesn't replace humans but becomes a lever to help people learn smarter, faster, and more effectively. With groundbreaking updates up to April 2026, this is definitely a "must-have" app on every Vietnamese student's phone.
