Eliminate disturbance on the site

Safari can make articles easier to read. If the page you are viewing supports, tap the reader button to view only text and images - no ads or distractions.

Gather your best photos into an album

Touch the favorites button to select your favorite photos and they will automatically be gathered in the Favorites album.

Quickly enter the Internet address

When entering the Internet address, touch and hold the dot on the keyboard to select from **.com** and other suffixes (*in supported applications*).

Share with your family

Buy the application once and other family members can use it. With **Family Sharing** , all **family** members can share purchased content even if they have their own accounts. Set up in **Settings** > **iCloud** .

Take a snapshot while recording a video

When you are recording a video, press the shutter button to take a snapshot without interrupting the scene.
