

Summary of high speed Leech link site

High-speed Get link / Leech links sites will help users to download files quickly, especially without losing money to buy an account.

Some download sites like Google Drive, mediafile, etc. will often allow users to download data to the computer without creating an account. The download speed will depend on the speed of the Internet connection, but generally the default speed of downloading files on these pages is always very high.

However, there are many servers such as Fshare, 4Share, Missile, . require users to have a VIP account to download high speed, otherwise the download speed of the file will be very slow. With a normal account, download speed will be only 1/4 of that when using a VIP account. To solve this problem, we can use the Get Link, Leech link pages to download high-speed files without creating a VIP account. The following will summarize Getlink, Leech Vietnam and foreign sites.

1. The website Get Link Fshare, 4Share has no pop-up ads
2. Ignore ads of shortened links to directly access the original link on Chrome, Coc Coc and Firefox
