

# Summary of the best uninstall software, completely remove stubborn applications

After a period of use, your computer is easily infected with useless software that is harmful to the computer. But it is very stubborn and difficult to remove simply. That is when you need to use a complete uninstaller software.

In the process of using computers/laptops, sometimes we accidentally install useless applications. Right now you want to remove this junk but they are extremely stubborn, refusing to leave us in the usual ways. But thick orange peel has sharp nails, this is when we need to use uninstaller software. Today, Hanoicomputer will introduce to you the best application uninstaller software 2020 - get rid of junk software on your PC.

## 1. Best uninstaller software Your Uninstaller

When it comes to **uninstalling software** today, it can be said that Your Uninstaller is the leading software that helps you do this job. As its name suggests, Your Uninstaller - your uninstaller program will perform a deep scan of all folders and files related to the application you need to uninstall. In particular, the program also allows users to update new programs, check the reliability of the installed program or clean up junk files, registers, manage startup programs and many other features. The function is indisputable, but is it easy to operate with Your Uninstaller? The answer is very easy, your job is to download the Your Uninstaller application > install it on your computer > select the software you want to uninstall > and boom, with just 1 click Your Uninstaller will help you clean up without leaving any trace of that application.
