1- Complete Chrome shortcuts on Windows, Mac and Linux

Chrome currently accounts for 43% of the browser market share worldwide, so we can know that many computer users are currently using Chrome as their main browser. However, not everyone knows Google has integrated Chrome with different keyboard shortcuts for you to browse the web quickly and more conveniently with versions for Windows, Mac, Linux.

The following article has a full list of Chrome shortcuts on Windows, Mac, and Linux. Please refer to Chrome to be able to use Chrome in the fastest and most proficient way. **See details!**

2- 5 hidden features in Safari on iOS 8 that many people don't know

The article will share 5 features of Safari on iOS 8 conveniently but not many people know when using iPhone, iPad or iPod touch. IOS 8 has just released with many new features along with Apple's 'refurbished' Safari browser, some features you don't see are as clear as others. *You can access recently closed tabs faster, can choose desktop display mode for any website, can create private tabs in Safari, can set credit card information faster in Cortana.* **See details!**

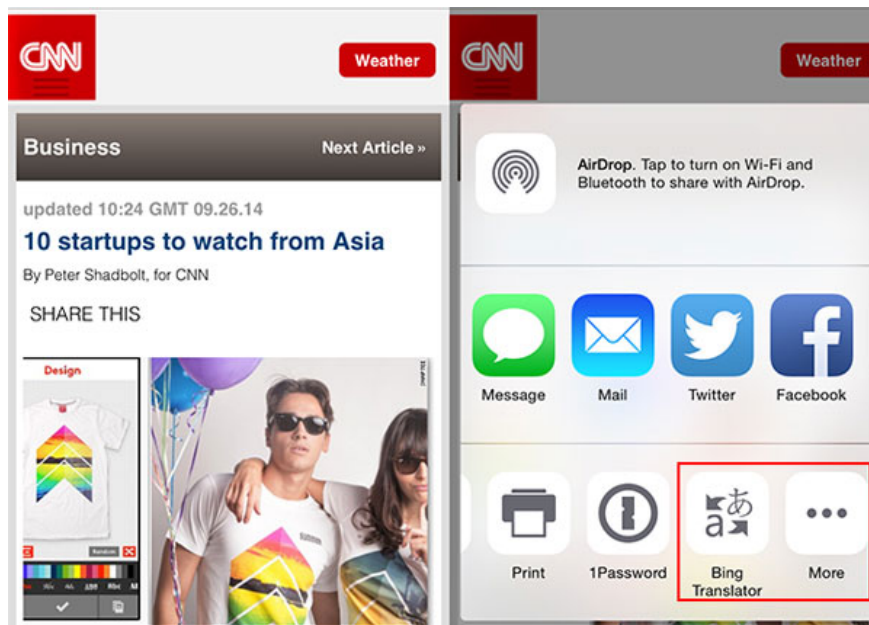

3- Tips to reset the login password on Windows

Even though you are careful, you can sometimes get into a forgotten password to log in to Windows, or be intentionally joked by someone by setting a password on your Windows computer. The article shows you how to simply reset the login password on Windows when you forget it.

However, do not worry because we will proceed to reset (*or cancel*) the login password by doing the following simple. **See details!**

4- iOS 8: How to translate the entire website in Safari

With older versions of the iOS operating system, translating the entire site right on Safari browser is almost impossible, in iOS 8, you can do this easily. Since iOS 8, Apple has been more open in allowing third parties to embed their support tools in the platform, such as extensions in Safari or widgets in the notification bar.

Microsoft's Bing search engine quickly released a new update on the AppStore that allows embedding the "*Bing Translate*" extension into the Safari browser. With just a click of a button, you can translate the entire website at a speed not inferior to those on your computer. **See details!**

5- New highlights on Windows 10

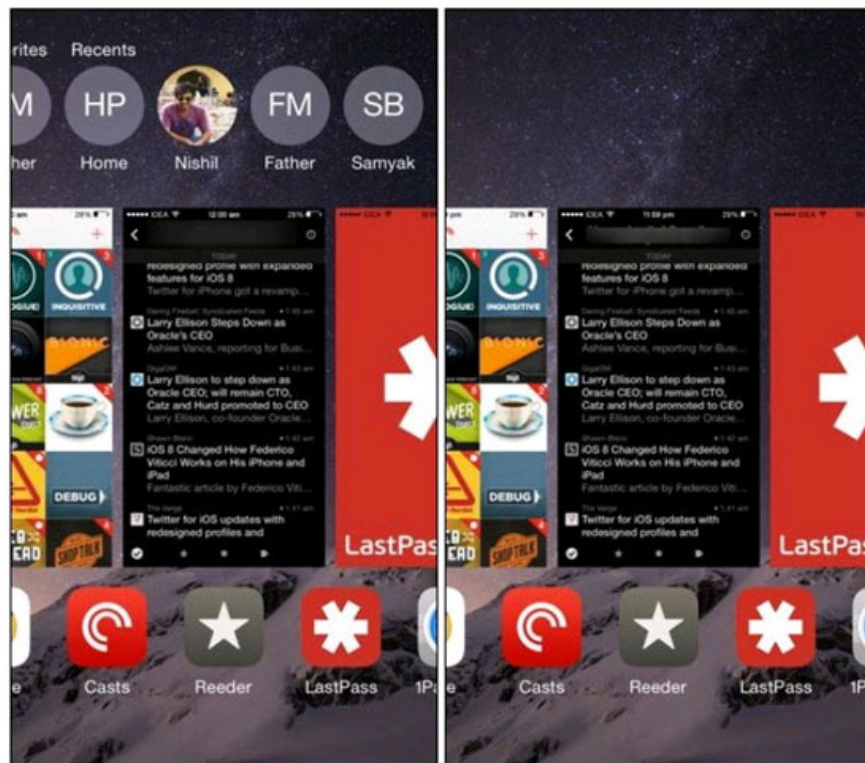

Microsoft released a new version of Windows called " *Windows 10* " that was described as " *the most unified and comprehensive platform ever* ". Delivers a completely new and unified experience for all Microsoft hardware. Let's take a look at the highlights introduced by Microsoft last night.

An app store on all devices. At today's event, the company reaffirmed its commitment to create a unique app store on all devices.**See details!**
