Using iMessage on Windows computers, security for wireless and Internet routers of Korea, deleting search commands on Facebook, using HTC camera Re, Lumia 535, ... are the most concerned tips and news. week!

**Using iMessage on Windows computers, security for wireless and Internet routers of Korea, deleting search commands on Facebook, using HTC camera Re, Lumia 535, . are the most concerned tips and news. week!**

## 1- How to use iMessage on Windows computer?

iMessage is a very safe, fast and reliable instant messaging service from Apple, however you can only use this application on devices of "Apple house". This is quite limited, especially for those who use Windows computers, but thanks to the admirable work of "jailbreak", there is a way to solve this problem. **See details!**

## 2- 3 steps to enhance wireless router security

Most IT devices today are plug-and-play but there is one device that you should never use this way, which is the wireless router.

After the network provider technical staff leaves your home or when you just brought your new router home from your home, there are some important things that you and every other user should do right away. **See details!**

### **3 - The Korean Internet operates again after the network crash**

The Korean Internet has returned to action after a 9-hour 31-minute incident from December 22, according to Dyn Research, a reputable US security company data analysis firm.

According to *Dyn Research*, North Korea's network connection has been restored after hours of trouble. The website of the Korean Central News Agency (KCNA) has also returned online from today. However, the incident has only been partially and unstably restored because other Korean websites have not yet been able to access it again. **See details!**

## 4- Android Wear 5.0 Lollipop has a customizable watch face clock

Google today officially launched Android Wear 5.0 Lollipop update with the most notable new point that is: allowing users and programmers freedom in creating and customizing watch faces (*smartwatch*).

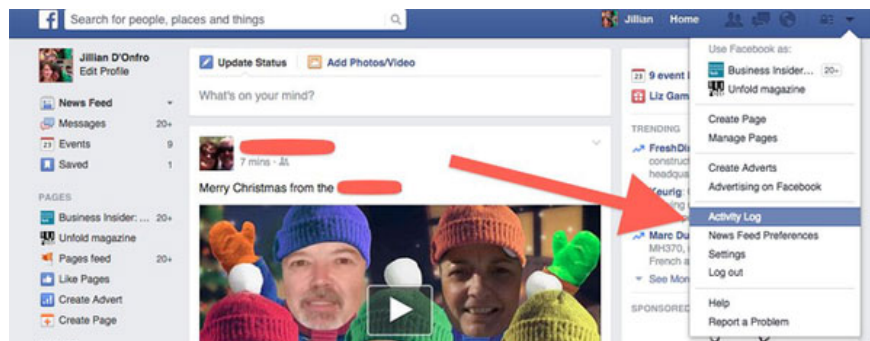

Right now, Play Store has its own area for very cute watch faces, like PAC-MAN Watch, Despicable Watch or Plants vs Zombie Watch. Of course the current number of watch faces is not really much, but with Google sharing the Watch Face API function for programmers, in the next few months, we will be spoiled for choice of many watch faces. different . **See details!**

## 5- The secret of success of Opera Mobile Store

Opera is famous for its web browser application of the same name that runs on most popular operating systems. Not only that, the company also owns a huge app store from 2012 with many market access capabilities. The successful deal between Microsoft and Opera about replacing Nokia Store on Finnish manufacturer's phone with the Opera Mobile Store promises to bring this software store into the top 3 of the world.**See details!**

## 6- How to delete search commands on Facebook

When members look up on the search bar, Facebook automatically saves these keywords and can cause problems for users. What users search on Facebook is a secret they don't want anyone to know, especially when they look up their old lover's account, find sensitive content pages . **See details!**

## 7- Temple Run has a version for virtual reality glasses

Imangi Studios has just released a new version for Temple Run, with the ability to run on Samsung's Gear VR virtual reality glasses.

Temple Run is a famous action RPG for devices running iOS, Android and Windows Phone. The way to play this game is to control the character who runs away from the chasing monster in the temple, on the way to overcome many obstacles.**See details!**

## 8- Instructions for using the HTC camera Re

The HTC Re, when compared to other travel cameras such as GoPro or Sony Action Cam, is better than that without the On / Off switch, the default is always in the state of being ready for shooting, shooting and shooting easily with just a single button and above all, it has a very convenient design to hold that the other two competitors do not have. **See details!**

## 9- Four highlights of Lumia 535

Soft, youthful design, this smartphone also attracts users thanks to wide-angle 5MP front camera, 5-inch screen and convenient features from Windows Phone 8.1 Lumia Denim. **See details!**

## 10- Microsoft releases Windows 10 Preparation Tool for Windows 8.1 and Windows 7

Microsoft is expected to release Windows 10 Consumer Preview next month at the company's January 21 event. Most likely Microsoft will reveal all consumer features of Windows 10. As previously announced, the hardware requirements of Windows 10 are similar to Windows 8.1 / Windows 7. **See details!**
