### **3-10 features should be available on 2015 laptops**

From 2010 onwards, individual and business users often upgrade their laptops in a 3-year cycle because technology changes very quickly, only after more than five years have felt obsolete. But if your laptop is used for more than two years, the new laptop will not improve too much in performance. The reason is because today's laptops focus on screen sharpness, power-saving processors and versatile designs . **See details**

### **4- Skype for Android version 5.2 allows offline photo sharing**

The Skype for Android version has been updated to version 5.2, allowing users to share photos with offline accounts. [See details](#)
