

# Super speed boat 5 times the speed of sound can travel along the UK in 8 minutes

Hyper Chariot with a speed of 6,400 km / h, can shorten the time passengers travel from London to Edinburgh (534 km) from more than 7 hours by car, 4 hours by train and 70 minutes by car plane down to only 8 minutes.

Hyper Chariot with a speed of 6,400 km / h, can shorten the time passengers travel from London to Edinburgh (534 km) from more than 7 hours by car, 4 hours by train and 70 minutes by car plane down to only 8 minutes.

1. Impressed by Elon Musk's cross-city traffic project video
2. The fastest elevator in the world "non" with a speed of 1,260m / min

Passengers move in large cars with a car in a vacuum tube.(Photo: Caters News.)

Hyper Chariot, a company is planning to design a 6,400 km / h super speed train and aims to bring this supersonic public transport system into operation in 2040. The ship includes many large carriages by car. cars can launch through vacuum tubes at speeds five times the speed of sound.

Matthew Modine, chairman of Hyper Chariot, said: *"This train seems to appear only in sci-fi films, but with the current technology has allowed passenger and cargo ships to move in the legs. not at 6,400 km / h, this is the safest form of transportation because most accidents when traveling are caused by human error or bad weather."*

Hyper Chariot is a self-driving super speed train, supervised from a control center and the train pipeline is unaffected by the erratic weather in the UK.

In just 60 seconds, Hyper Chariot can accelerate from 0 to 1,600 km / h, twice as fast as a Boeing 747 and reaches a maximum speed of 6,400 km / h with a super-powerful electric motor.
