

Synthesis of shortcuts on Youtube very well

If you are a regular user of Youtube, having the keyboard shortcuts built into the platform will help you save time and manipulate much more. In this article, the Software Tips will introduce you to shortcuts on Youtube.

If you are a regular user of Youtube, having the keyboard shortcuts built into the platform will help you save time and manipulate much more. In this article, the Software Tips will introduce you to shortcuts on Youtube.

1. Details of the shortcut on Youtube

Pause / Continue to Watch Videos: With this feature, you have 02 shortcuts to use. You can press the **Space** (spacebar) or the **K** key can pause / resume watching video.

Video On / Off: Instead of clicking on the Speaker icon, you can press the **M** key to turn on / off the sound quickly.

Increase / Decrease Video volume: Normally when increasing / decreasing the volume, you must click on the slider and drag them. Instead of dragging them, you can press the **up / down arrow keys** to increase or decrease the volume.

Note: If you do not watch in full screen mode, force you to click on the Video to use the up / down keys to increase or decrease the volume. Otherwise it will become a pull up / drag down Web page.

View video in full-screen mode: To view full screen video, then you press the **F** key .

Exit Video from full screen mode: If you do not want to see Video full screen anymore, press **the ESC key** to return to the default.

Watch Video in cinema mode (Cinema): You want to watch large video (not full screen) and want YouTube's interface to be black like in the cinema, then press **the T key**.

Note: To exit the cinema mode (Cinema), press the T key again.

Rewind: To rewind the video to the beginning, press **the Home key** or **the number 0 key** .

Skip forward each segment: Youtube will automatically divide your Video into 10 different sections according to the length (from 0 to 9). When you want to rewind any part, you just **press that number key** , each number will correspond to the time in the Video.

For example: Press the number 5 key, it will rewind to 50% of the length of the video. More specifically, you are watching a 60-minute video, when you press the 5 key it will rewind to the 30th minute.

Video for 5 seconds / 10 seconds: If you need to scan the video in detail and want to watch more specifically, then rewinding 5 seconds / 10 seconds will be most effective. You press the **right arrow key** to fast forward 5 seconds and press **the left arrow key** to rewind 5 seconds. **Similarly with the J and L keys** you will rewind 10 seconds / 1 press.

Fast forward to the end of the video: If you don't want to watch the video anymore, press the **End** key to skip to the end. If you are watching a video in the list (Playlist), it will automatically open the next video.

Go to the next video: To skip to the next video, press and hold the **Shift + N** . If you are watching a video in the playlist (Playlist), it will move to the next Video in the list. And you watch the default video, it will move to the next proposed video.

Switch back to the previous Video: To switch back to the previous Video, press **Shift + P** , but it can only be used when you watch the Video in the list (Playlist).

Minimize Video to surf Youtube: If you have used Facebook, when you are watching the video and pulling down, it will automatically shrink the Video to an angle. This feature is similar, helping you watch videos and comments at the same time. You press **the I key** to shrink Video.

Turn on subtitles: For videos with subtitles you just need to press **the C key** to open subtitles.

II. Shortcut summary of Youtube
