

Synthesis of wallpaper, beautiful fireworks photos in the new year

The world is about to enter the new decade and one of the most anticipated moments is the sound and image of fireworks lit up in the night.

The fireworks display to celebrate the new year is an indispensable moment in the transition between the old year and the new year, let's admire the most beautiful fireworks wallpapers of Quantrimang.

Also, if you want to save this meaningful moment, the photographer must make sure the camera is kept in place (tripod tripod is recommended). With digital travel cameras (point-and-shot), it is recommended to switch to Firework or Nightshot mode. With DSLR series, it is necessary to reduce the light sensitivity (ISO) to avoid image noise and to set a small aperture.
