

Synthesize the most beautiful CSS Background Gradient template

Single color was the trend of last year. Gradient is currently 'on the throne'! But do you know how to create a background gradient in CSS?

Staying up to date with the top web design trends and standards is very important for a web designer or programmer. Currently, background gradients are commonly used in modern websites. **The gradient background templates** below will suggest you more interesting CSS design.

Gradient background with CSS

A CSS gradient now transitions smoothly using 2 or more specified colors. Gradient CSS offers better control and performance than using an image file of a gradient that you can create with tools like Adobe Illustrator. **Use the CSS background-image** property to declare the gradient as the background.

There are 3 types of gradients available: **linear** (created with `linear-gradient()`), **radial** (created with `radial-gradient()`) and **conic** (generated with `conic-gradient()`). You can also create repeating gradients with `repeating-linear-gradient()`, `repeating-radial-gradient()`, and `repeating-conic-gradient()`.

The MDN Docs defines the above functions as follows:

1. **linear-gradient()** creates an image consisting of a progressive transition between two or more colors along a straight line. Its result is an object with a special data type of tag , .
2. **radial-gradient()** creates an image containing a continuous transition between two or more colors radiating from an origin. Its shape can be circular or elliptical. The result of this function is an object of data type .
3. **conic-gradient()** creates an image containing a gradient with a color transition around a central point. Examples of conic gradients include pie charts and color wheels. The result of the `conic-gradient()` function is an object of data type .
4. **repeating-linear-gradient()** creates an image containing a repeating linear gradient. It's similar to `gradient/linear-gradient()` and takes the same arguments, but it repeats color stops endlessly in all directions to cover its entire container. The result of this function is an object of data type .
5. **repeating-radial-gradient()** creates an image containing repeating gradients, radiating from an origin. It's like `gradient/radial-gradient()` and takes the same arguments, but it repeats color stops endlessly in all directions to cover the entire container, similar to `gradient/repeating-linear-gradient()`. The result of this function is an object of data type .
6. **repeating-conic-gradient()** creates an image containing a repeating gradient with a color transition around a central point.

Following is the official syntax of each gradient style:

Syntax of linear gradient

```
linear-gradient( [ | to ]? , ) = [to left | to right] || [to top | to bottom]
```

Syntax of Radial Gradient

```
radial-gradient( [ || ]? [ at ]? , );
```

Syntax of Conic Gradient

```
conic-gradient( [ from ]? [ at ]?, )
```

Here are some awesome **gradient background templates** , created with the CSS background-image property, that can elevate the UI of the web to the next level.

Beautiful gradient background template in CSS

Dusty Grass

Use the following CSS to create the gradient above:

```
background-image: linear-gradient(120deg, #d4fc79 0%, #96e6a1 100%);
```

Sand to Blue

To create the gradient above, use the following CSS code:

```
background-image: linear-gradient(to right, #DECBA4, #3E5151);
```

Kye Meh

Use the following CSS code to create the above linear gradient background:

```
background-image: linear-gradient(to right, #8360c3, #2ebf91);
```

Amin

CSS:

```
background-image: linear-gradient(to right, #8e2de2, #4a00e0);
```

Relaxing Red

With just one line of CSS code, you can add a beautiful, eye-catching gradient background to the web:

```
background-image: linear-gradient(to right, #fffb5, #b20a2c);
```

Sublime Light

Try using this CSS to create a gradient background. It's easy to use and adds a bit of style to your site:

```
background-image: linear-gradient(to right, #fc5c7d, #6a82fb);
```

Megatron

Use the following CSS to create a 3-color gradient:

```
background-image: linear-gradient(to right, #c6ffdd, #fbd786, #f7797d);
```

Blue Raspberry

Use the following CSS to create a simple linear gradient bluish background:

```
background-image: linear-gradient(to right, #00b4db, #0083b0);
```

Premium Dark

CSS Code:

```
background-image: linear-gradient(to right, #434343 0%, black 100%);
```

Crystalline

CSS Code:

```
background-image: linear-gradient(-20deg, #00cdac 0%, #8ddad5 100%);
```

Lawrencium

Use the following CSS to create the gradient above. You can also use this code to create gradients with different colors:

```
background-image: linear-gradient(to right, #0f0c29, #302b63, #24243e);
```

Ohhappiness

CSS Code:

```
background-image: linear-gradient(to right, #00b09b, #96c93d);
```

The Strain

CSS Code:

```
background-image: linear-gradient(to right, #870000, #190a05);
```

Yellow Mango

CSS code to create radial gradient background:

```
background-image: radial-gradient(circle farthest-side, #fceabb, #f8b500);
```

Juicy Grass

CSS Code:

```
background-image: radial-gradient( circle 759px at -6.7% 50%, rgba(80,131,73,1) 0%, #fceabb 100% );
```

You can use the gradient above with some other elements for the website such as background, border, icon, button, text, underlining, list bullet. to take web design to the next level. Hope the article has a suitable template for you.
