

# T2S Usage: Text to Voice converts text to voice on Android

T2S application: Text to Voice - Read Aloud for Android devices will convert text to speech, helping you to have fast audio files from text to serve other purposes.

The application will help you download the audio file into a separate file that you can merge or transfer to your computer to perform other work. This will be much more convenient for you when it is easier to handle the audio file. The following article will guide you how to use **T2S: Text to Voice - Read Aloud** on your phone.

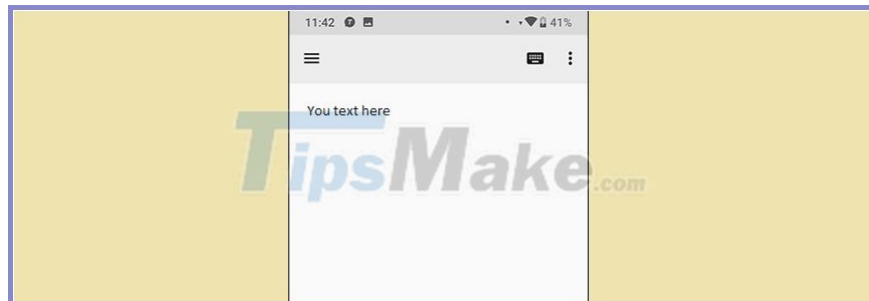

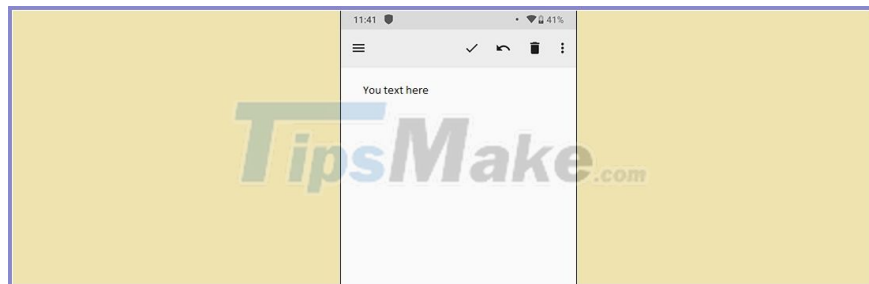

## T2S User Guide: Text to Voice - Read Aloud

### Step 1:

We download the T2S application: Text to Voice - Read Aloud for Android phones according to the link below.

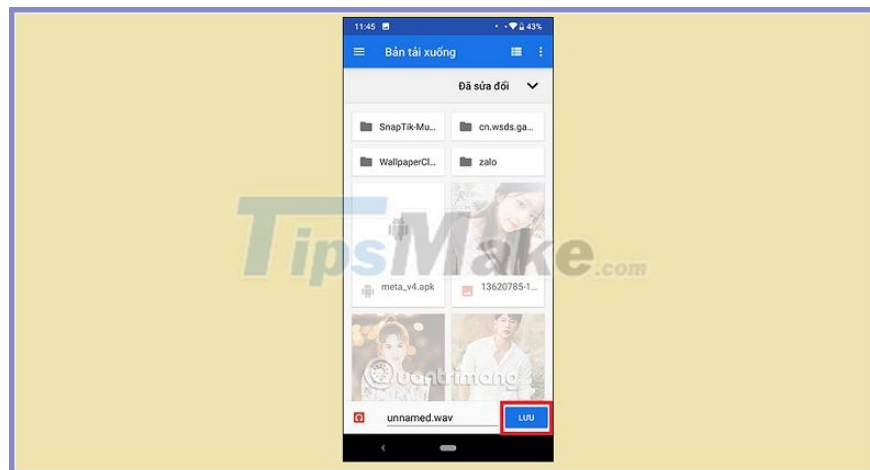

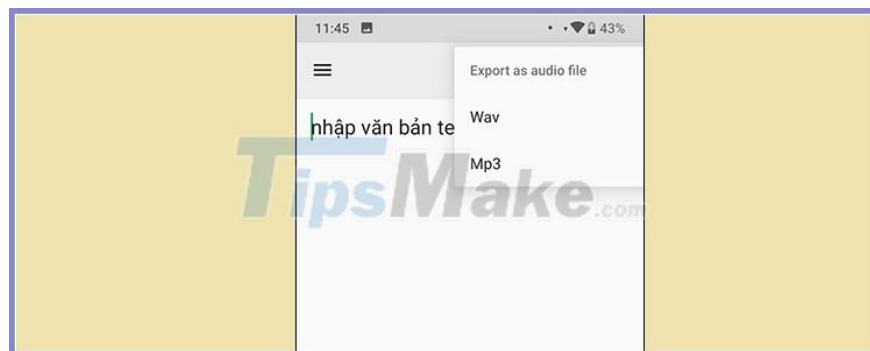

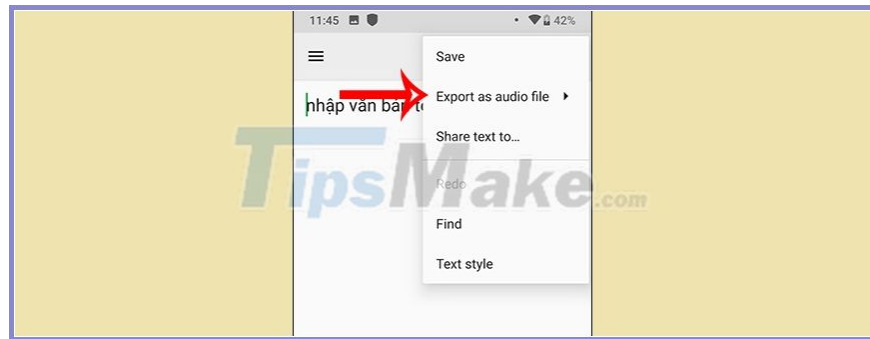

[Download T2S: Text to Voice - Read Aloud Android here](#)

Next at the application interface, users **enter text** and click **the play icon** to listen to. Two icons next to the Play button to rewind content.

## Step 2:

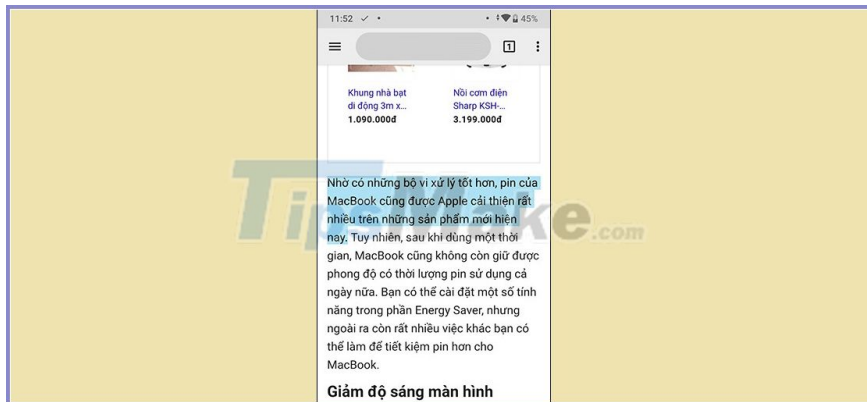

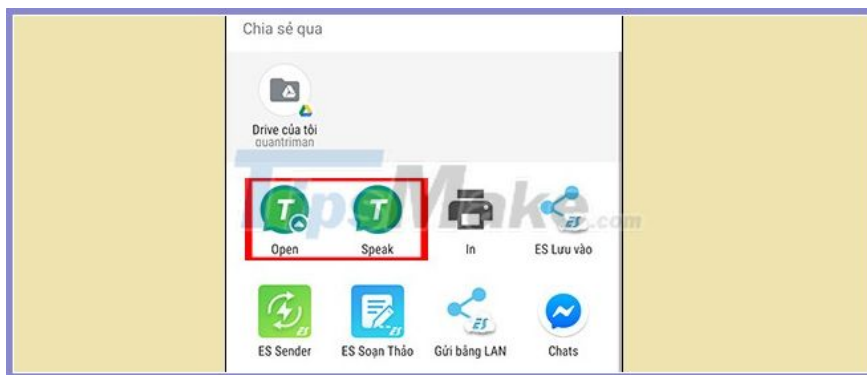

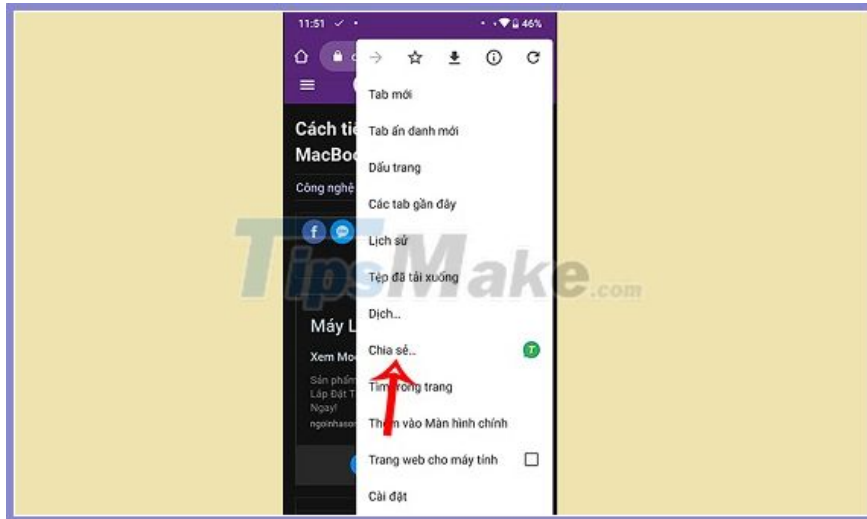

To save the audio file as a separate file, click **the 3 vertical dots icon** in the top right corner. Click on **Export as audio file** . The application supports saving as .wav or .mp3 files, but with mp3 you must install a plug-in.

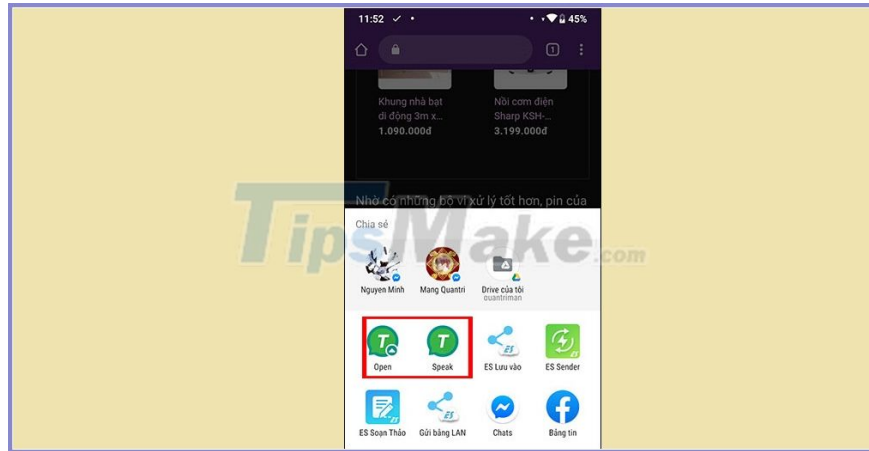

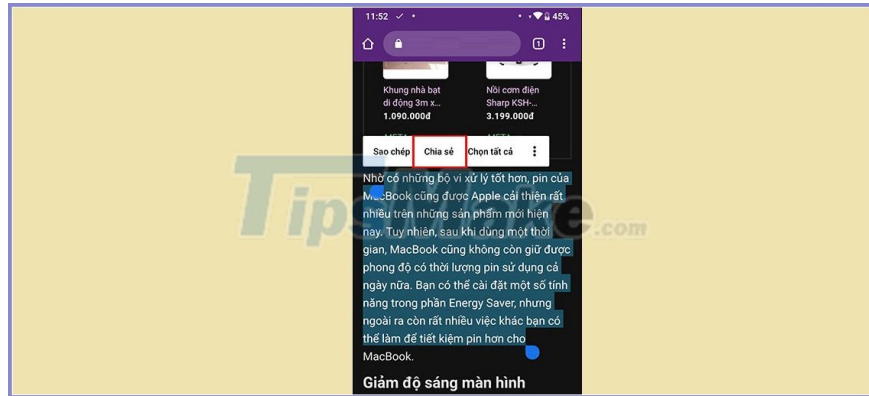

## Step 3:

The application supports you to **read the content on the web page** , read the entire content on the page or read only the text you choose.

With **the website** you press **the 3-dot icon** select **Share** . You will then see content sharing options, including 2 app icons. If you want to read immediately, click **Speak** , if you want to open through the application interface, click **Open** .

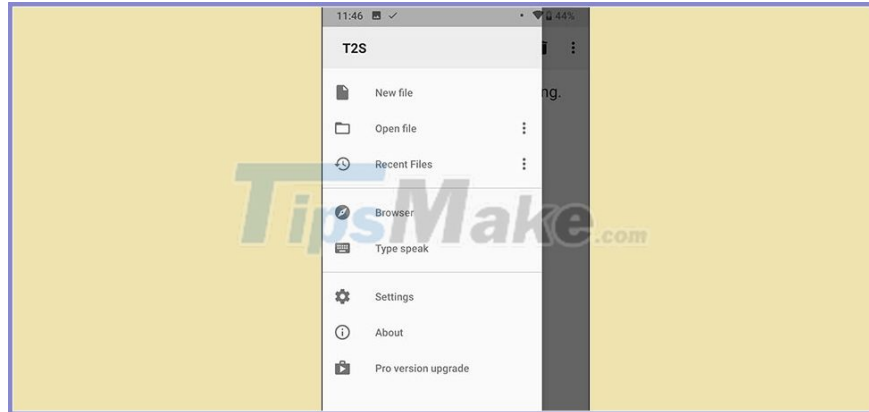

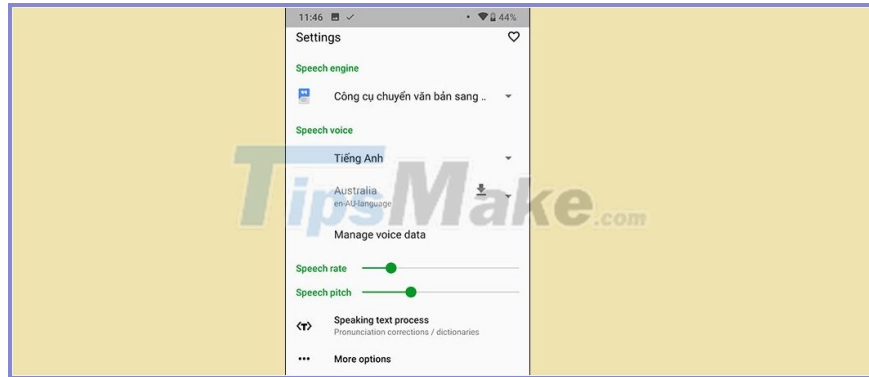

To read the text , we highlight the text and then click Share and also choose how to read it in the application.

#### Step 4:

In the reading interface, you click **the gear icon** to adjust the reading language or reading speed. In the application interface click on **the 3 dashes icon** to set up the application.
