Note: Element is the place to store data of the table. They can include all elements of HTML such as text, images, lists, other tables .

Add borders to HTML tables

If not specified, the table will have no borders. Table borders are defined by the border properties of CSS.

```
table, th, td {  
  border: 1px solid black;  
}
```

Remember to define borders for both tables and cells in the table.

Border Collapse

If you want the space between the borders to be removed, use the property CSS `border-collapse`.

```
table, th, td {  
  border: 1px solid black;  
  border-collapse: collapse;  
}
```

Cell Padding

Cell Padding is used to determine the distance between the contents of the cell and the border. If not specified, the cell to the border will have no spaces. To set this distance, use the `padding` CSS property.

```
th, td {  
  padding: 15px;  
}
```

Headline left

By default the table title will be bold and centered. To align left, use CSS `text-align` property.

```
th {  
  text-align: left;  
}
```

Border Spacing

Border Spacing determines the distance between table cells, using the CSS `border-spacing` to determine.

```
table {  
  border-spacing: 5px;  
}
```

Note: If the table uses `border-collapse`, `border-spacing` will not work.

The umbrella spreads over many columns

To make a cell span multiple columns, use the `colspan` attribute.

```

Add a description for the table

To add a description for the table, use the tag

Ti?n ti?t ki?m hàng tháng

Tháng
S? ti?n

Sáu
\$120

B?y
\$150

Note: Card must be placed immediately after the card .

Add special styles to the table

To add a style to the table, use the `id` attribute `id`.

Now define this style.

```
table#t01 {  
  width: 100%;  
  background-color: #f1f1c1;  
}
```

Add other styles:

```
table#t01 tr:nth-child(even) {  
  background-color: #eee;  
}  
table#t01 tr:nth-child(odd) {  
  background-color: #fff;  
}  
table#t01 th {  
  color: white;  
  background-color: black;  
}
```

With the above code, even rows will have #eee background color, odd number rows will have #fff background color, black background color title.
