

Tags in HTML

Tags used to drop rows in the same paragraph, like the Enter key.

Definition and usage

Card
used to drop rows in the same paragraph, like the "Enter" key.

Card
is a blank tag, it has no end tag.

Browser support

There is no difference of this tag between HTML 4.01 and HTML5.

Tip : Card

Very useful for writing addresses or poems.

Note : Use the card

to enter line breaks, not used to split segments.

For example

```
?o?n v?n dài c?n xu?ng dòng  
?ã xu?ng dòng.
```

Show browser:

```
?o?n v?n dài c?n xu?ng dòng  
?ã xu?ng dòng.
```
