

Take a look at the impressive concept of the iPhone Slide Pro sliding screen

Designer Ben Geskin recently shared a video of the iPhone with a sliding screen on his personal Twitter page.

Designer Ben Geskin recently shared a video of the iPhone with a sliding screen on his personal Twitter page. In the concept, the Rose Gold iPhone model has a full screen display, equipped with three cameras on the back. In the video, users use this sliding screen iPhone to both go to Instagram and watch YouTube at the same time.

When sliding to the left a small part, the secondary screen hidden below will appear and act as a function bar to adjust music, take pictures .

When sliding to the right, a wider hidden screen will appear and act as a second screen to access applications, turning into a virtual keyboard .

The concept of this concept model is by the author called bat.not.bad. Ben Geskin just reposted it. According to Ben Geskin, the author calls the concept model iPhone Slide Pro.

Ben Geski's post about the sliding screen iPhone model has received a lot of attention from Twitter members, many predicting the device will cost over \$ 3,000.

However, perhaps this sliding screen iPhone model will never come true because Apple is not interested in developing slider screen smartphones. However, it seems the tech giant is quite interested in foldable smartphones. Rumor has it that Apple will launch a foldable, hybrid phone between the smartphone and iPad in 2020

Earlier, designer Antonio De Rosa also launched the concept of a folding iPhone called the iPhone X Fold. This iPhone model has two screens with a folding design in, the rear camera cluster has three lenses.

1. Successfully breaking iCloud on iPhone with checkra1n tool
2. Apple may rent the iPhone because it sells it
3. iPhone 12 design is like?
