

Tell you how to fix the water filter that has leaked water

If your family's water purifier is experiencing water leaks outside. Please refer to the following article of [Quantrimang](#) to know the cause and how to fix it.

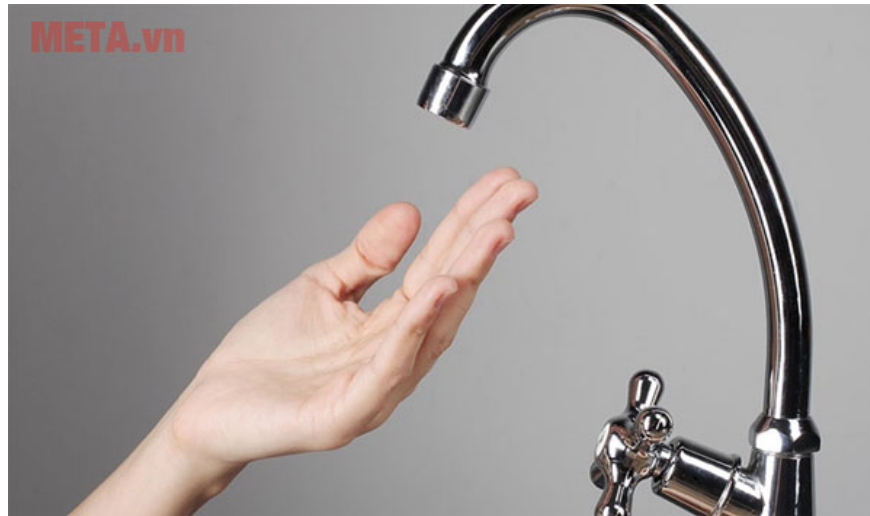

If your family's water purifier is experiencing water leaks outside. Please refer to the following article of [Quantrimang](#) to know the cause and how to fix it.

I. Causes water filters to leak

Cause 1: Water tap leaks

A leaky faucet is a fairly common cause. It may be because you tighten the screws too tight, causing the faucet to be dislocated. In addition, improper joints also cause water leakage.

Cause 2: Rubber gasket

Rubber seals at the position of the filter cup are skewed, or not installed (due to damage or loss), causing water to leak out.

Cause 3: The joints between the wire and the filter system are loose

In the joints (connectors) between the wire and the filter system, water leakage is caused by loose. When using a water filter for a long time, due to the impact of the joint, it also loosened itself and caused water leakage.

Cause 4: The filter core is clogged with the elasticity of the rubber gasket reduced

When the filter element 4, 5 or 6 is blocked, the water cannot escape, while the filter pump part is still working.

At the same time, rubber gaskets are subjected to a strong water pressure, along with the elasticity of rubber gaskets getting worse and worse over time, causing water leakage.

Cause 5: Being bitten by insect animals

Parts of water conductors appear water leakage, may be caused by animals (mice, dogs, cats, .) gnawing, biting off.

II. How to fix

Before you fix the water filter, you need to do it:

1. Unplug the water filter.
2. Lock the water supply valve for the machine.
3. Conducting observation of location, checking and overcoming the situation of leaking water.

With cause 1:

1. Check and screw the screw to connect the faucet.
2. Correct the horizontal tap lock, avoid high difference or too low.

With cause 2:

1. Check and adjust the rubber gasket.
2. If damaged, replace the new rubber gasket.

With cause 3:

1. Check and tighten the joints.
2. If the joint is broken, replace it.

With cause 4:

1. Check, clean, or replace filter core number 4.5 or 6.
2. Check and replace rubber gaskets.

With cause 5:

1. Check the wires. If the bite is small, use a rubber band around the wire.
2. If there are many or large bases, replace the new wires.

III. Top worth buying water filters today

1. Sunhouse SHR76210CK 10-core RO water purifier - Reference price: VND 6,380,000

Sunhouse SHR76210CK water purifier uses RO filtration technology (reverse osmosis filter) invented by an American scientist in the 50s of the last century. RO technology works on the movement mechanism of water molecules thanks to the compression pressure of high-pressure pumps creating a large flow of chemical components, heavy metals, impurities, viruses, bacteria . Have in the water strong movement drifted out under the sewage line.

Sunhouse SHR76210CK RO water purifier equipped with 10 filters, this is the RO water purifier equipped with the most filters in the market.

Sunhouse SHR76210CK 10-core RO household water purifier has a compact size of 430mm x 330mm x 900mm with a luxurious, eye-catching appearance with a toughened glass surface attached to motifs that adds to the aesthetics and convenience. More comfort for your home space.

Specifications:

1. Warranty: 24 months
2. Brand: Korea
3. Filter capacity: 10 - 15 liters / hour

2. FujiE RO-08 intelligent RO water purifier (8 filter levels) - Reference price: VND 2,950,000

FujiE RO-08 water purifier (8 filter levels) meets almost all features of purifying water and adding water-beneficial functions. The water through the filter system of FujiE RO-08 water purifier is completely pure and can be taken immediately without boiling very conveniently. The machine brings clean water to ensure safety for the health of the whole family.

In addition to providing pure water, FujiE RO-08 intelligent RO water purifier (8 filter levels) has outstanding features compared to other water purifiers available in the market as follows:

1. Automatically stops working when the head pressure is not enough.
2. Automatically stop operating when the water is full of pressure (enough pressure in the pressure vessel).
3. Auto discharge of waste water.
4. Removal of heavy metal impurities cancers causing gastrointestinal diseases, neuritis, degenerative spine back pain .
5. Separation of water molecules, increasing the amount of oxygen in the water, preventing body dryness, slowing aging.
6. Filmtec RO membrane made in the US.
7. Removing impurities, bacteria remaining in the filtration process are larger than ? 1 μm .
8. Create essential minerals for the body.
9. Prevent sludge contamination, rust soil is ? 5 μm in size.
10. Ability to absorb high flavors, organic substances, pesticides, insecticides, heavy metals, residual chlorine in the water.

Specifications:

1. Warranty: 24 months
2. Brand: Japan
3. Capacity: 10 liters
4. Power consumption: 24W / h
5. Voltage source: 220V / 50Hz

3. Spido S-S156 unbalanced water purifier - Reference price: VND 9,290,000

Spido S-s156 has a small size with outstanding black and white color which can be suitable for many spaces. You will no longer have to worry too much about the installation location because they do not affect the surrounding area.

The compact Spido water purifier is, however, it has an extremely high capacity of up to 80 liters / hour. With this filtering speed, the machine can meet the water demand for about 180-260 people.

Spido is suitable for use in companies, offices . with the corresponding number of people.

Specifications:

1. Warranty: 24 months (with electrical components)
2. Filter capacity: 80 liters / hour
3. Voltage source: 220V ~ 50Hz
4. Brand: Vietnam

Through this article, you have more information to be able to fix the water purification problem yourself, right? If you need to purchase more water purifiers, you can contact the hotline directly below to get the best advice and support from our customer care team:
