

TeraBox - Cloud storage service with 1Terabyte of free storage

TeraBox is a free cloud storage service developed and provided by Flextech Inc.

What is TeraBox?

TeraBox is a free cloud storage service developed and provided by Flextech Inc. This data backup solution features cross-platform compatibility and prides itself on being the world's first service to offer users 1 terabyte of storage space that can be used on any file type.

TeraBox is essentially a service similar to Dropbox or Google Drive . Users can also upgrade to a Premium subscription to double their allocated storage space and unlock a host of other features. Some of these include enabling automatic backups, full connection speeds, and more.

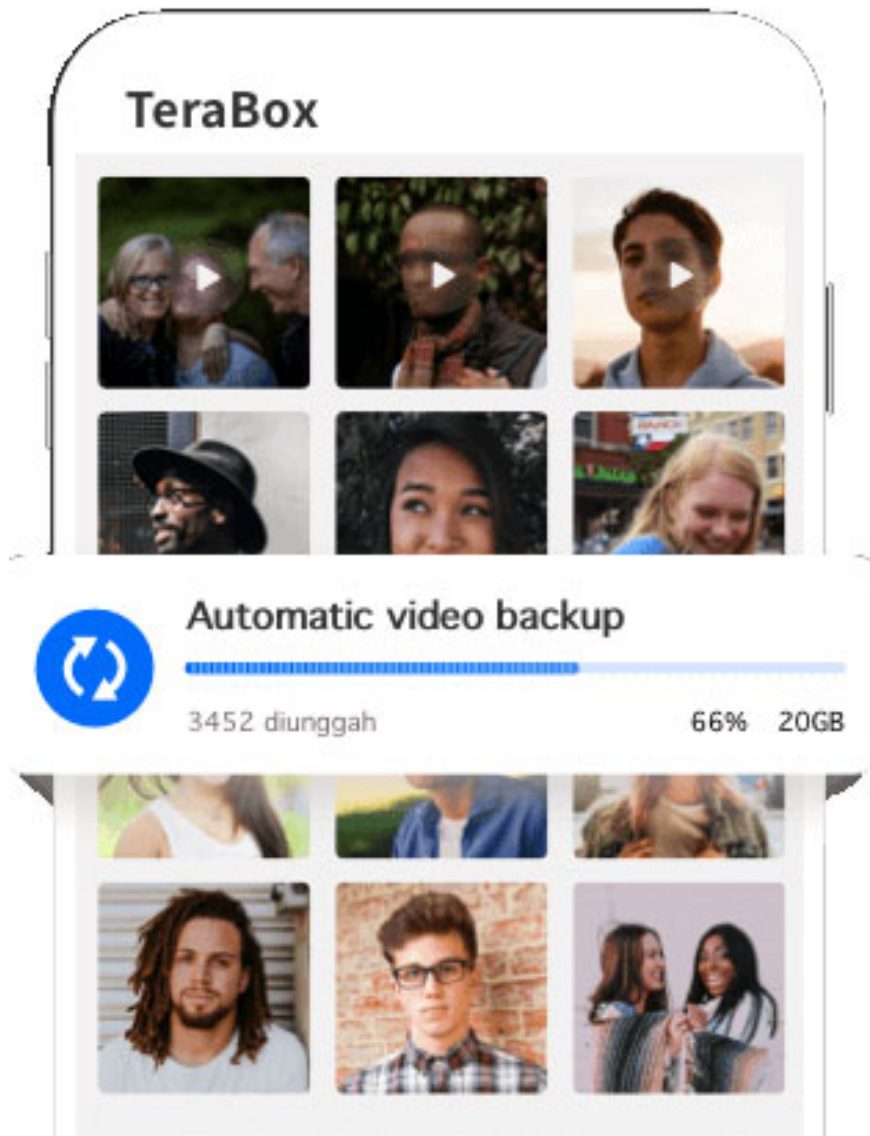

Outstanding features of TeraBox

Best Cloud Storage: Free, Private, and Secure

1. TeraBox provides you the best cloud service with 1TB free storage
2. Provides you with a private cloud storage with the "Locked Box" function.
3. Guarantees you ISO/IEC cloud security certification

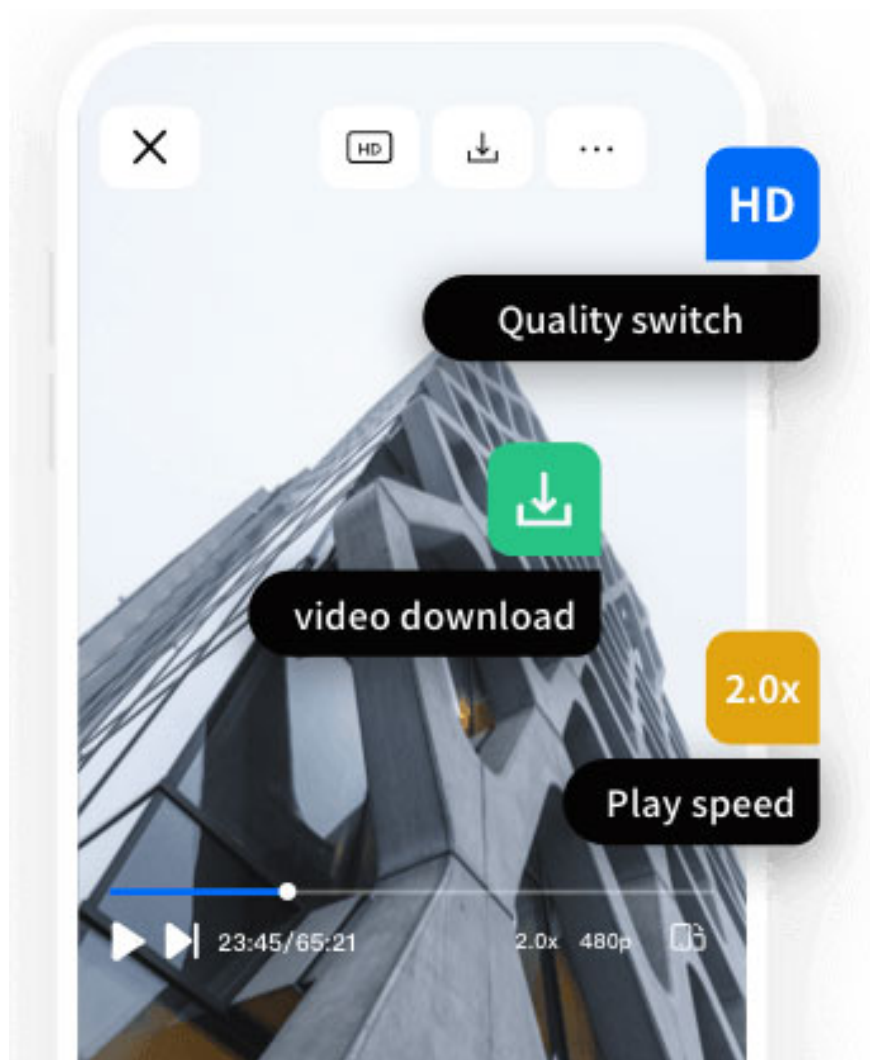

Automatically back up photos, videos and folders to the cloud

1. TeraBox can automatically back up your photos, videos and folders
2. Once backed up to the cloud, your data will never be lost.
3. You can save space for your PC/Android/iPhone/iPad and your device will run faster

Video Player for Windows, Mac, Android and iPhone

1. TeraBox lets you stream video and audio online in the cloud
2. Video and audio can be played at multiple speeds
3. You can choose the video clarity including full HD 1080P.

Premium User Privileges

1. 2TB cloud storage in your iPhone/Android/PC/Web
2. Upload and send large files up to 20GB
3. Unzip files, download files in bulk and at high speed

TeraBox Referral Program

1. Share files and get commissions. Easily earn over \$100 per week!
2. Reduce your costs on servers or cloud storage

How does TeraBox compare to other solutions?

TeraBox is a relatively new player in the cloud storage space developed by Flextech, a Japanese company. Compared to its Western competitors, it offers many similar features, such as cross-platform functionality and support for any type of file you want to upload to your account.

However, its real standout feature is that it is the first cloud service in the world to offer 1 terabyte of storage to free account users. You can create your own virtual vault for a specific device where you can transfer private and sensitive files, and you can also protect it with a PIN for added privacy and security. However, there are some important things to consider before you proceed.

Some limitations with the free version to note include a maximum file upload size of 4GB, videos are limited to 720p, and there are no automatic backups. Furthermore, you can only save 500 files to your account, as well as some connection speed throttling. Additionally, it has very limited integration with third-party apps and services, which is a shame given the amount of storage you get.

Advantage

1. The world's first cloud storage service to offer 1TB of storage
2. Cross-platform
3. Virtual box for specific devices

Disadvantages

1. Maximum upload file size 4GB
2. Video is limited to 720p resolution
3. Only up to 500 files can be stored
