

# Test of technology terminology - Part 3

Test your understanding of technology with the multiple choice questions below.

1. Question 1: What is the process of waiting to download resources until they are needed to use them?
  1. Lazy loading (Lazy loading, slow loading)
  2. Pipelining (Piping Engineering)
  3. Refreshing
  4. Autofilling
2. Question 2: Which Adobe technology is still used for the name of a storage type?
  1. Bridge
  2. Flash
  3. Spark
  4. AIR
3. Question 3: Which server makes the website available to users on the Internet?
  1. Web Stand
  2. Web Block
  3. Web Port
  4. Web Host
4. Question 4: What is the intermittent delay in data transfer also known as?
  1. Fuzz (Fuzzy test)
  2. Pixelation (The phenomenon of broken images into pixels)
  3. Jitter (Flicker)
  4. Fragmentation
5. Question 5: What is a line break character in a text block called?
  1. Lead
  2. Newline (Line character)
  3. Stopper
  4. Loop
6. Question 6: Which organization sets open document file format standards?
  1. IEEE
  2. ISO
  3. OASIS
  4. ANSI
7. Question 7: Which of the following does not belong to a Fully Qualified Domain Name (FQDN)?
  1. Server name
  2. User name
  3. Domain
  4. Top-level domain name
8. Question 8: Which of the following best describes the virtual machine?
  1. A computer simulation system created using software.
  2. A secondary computer projecting another computer.

3. Artificial intelligence communicates with users like humans.
4. Any system or device that can access the cloud.
9. Ques 9: What is an example field hidden in a web contact form designed to detect spam?
  1. Honeypot
  2. Datagram (Short Packet)
  3. Spyware (Spyware)
  4. Cookies
10. Question 10: What are trees, rings, and stars?
  1. Wifi router
  2. Network Topology
  3. Radio broadcast
  4. Fiber-optic cable
11. Question 11: Which of the following best describes bandwidth?
  1. The frequency of the wireless signal
  2. Maximum packet size supported by a specific protocol
  3. The physical size of a digital data transfer cable
  4. Maximum data transmission speed on a network or Internet connection
12. Question 12: What kind of language is machine code?
  1. Basic language
  2. Low-level languages
  3. Middle languages
  4. High-level language
13. Question 13: What happens when two hash data sets and create the same values ??lead to?
  1. Codec
  2. Macro
  3. Collision
  4. Heuristic algorithm
14. Question 14: What term is used to describe software built from an existing program?
  1. Whitefield (White School)
  2. Greenfield (Application not created or in early development stage)
  3. Redfield (Red School)
  4. Brownfield (Existing application)
15. Question 15: Which is the correct opinion about DVD-R?
  1. They have the same capacity as the CD-R.
  2. They can be rewritten many times.
  3. They may have multiple layers.
  4. They are smaller than DVD + R.
16. Ques 16: What kind of code is found in dynamic web page but not in static web page?
  1. HTML
  2. XHTML
  3. CSS
  4. PHP
17. Ques 17: What kind of technology is Oculus known for?
  1. Virtual machine
  2. Virtual memory
  3. Virtual reality
  4. Virtualization
18. Question 18: What is a long and small web ad?
  1. Sticky ad

2. Anchor ad
  3. Running ads (Skyscraper)
  4. Advertisement knitting see (Interstitial)
19. Question 19: Which acronym describes the result of zero input?
1. FIFO
  2. LIFO
  3. GIGO
  4. NINO
20. Question 20: What surface is designed to track the movement of the computer mouse?
1. Mouse sheet
  2. Mouse coaster (Tray to mouse)
  3. Mouse board
  4. Mouse pad
21. Question 21: Which of the following errors in Windows causes a blue screen of death?
1. Error STOP
  2. SMART error
  3. Error TRIM
  4. DKIM error
22. Question 22: Which online advertising index measures revenue per 1,000 impressions?
1. PPC
  2. CPC
  3. CPA
  4. RPM
23. Question 23: Which Windows version was released on January 30, 2007?
1. Windows XP
  2. Windows Vista
  3. Windows 7
  4. Windows 8
24. Q24: Which of the following protocols encrypts data sent over the Internet?
1. SSL
  2. TCP
  3. FTP
  4. POP3
25. Question 25: What are the criteria for determining data transmission via local area network?
1. FPGA
  2. FQDN
  3. FDDI
  4. FIFO
26. Question 26: Which email box is between Drafts (Sent) and Sent (Sent)?
1. Inbox (Inbox)
  2. Outbox (Outbox)
  3. Archive
  4. Trash (Trash)
27. Question 27: Which of the following best describes the database index (database index)?
1. Is a simple text list of database items.
  2. A binary file describing the structure of a table.
  3. A cache of recently accessed data.
  4. A backup of the entire database.
28. Ques 28: Which of the following is a common expansion slot in the early 2000s?

1. PCI-X
  2. USB
  3. Firewire
  4. Thunderbolt
29. Ques 29: Which acronym describes an interface that can be controlled by mouse?
1. ASCII
  2. GUI
  3. CGI
  4. PPI
30. Question 30: Which of the following statements about ECC RAM is wrong?
1. Usually more expensive than memory without ECC.
  2. Known as RAM parity.
  3. Mainly used in mobile devices.
  4. Solid state module.
31. Ques 31: What kind of program can include a debugger?
1. Graphic editing
  2. Word Processing
  3. Video production
  4. Software Development
