

Test the ability of fast charging iPhone 11 Pro, superior to the previous generation but still lost to Android

See how the iPhone 11 Pro with its 18W fast charger outperforms the older generation and other devices.

After many years of maintaining the old and slow charger of 5W, Apple finally made iPhone users satisfied when it came with an 18W charger for iPhone 11 Pro and iPhone 11 Pro Max.

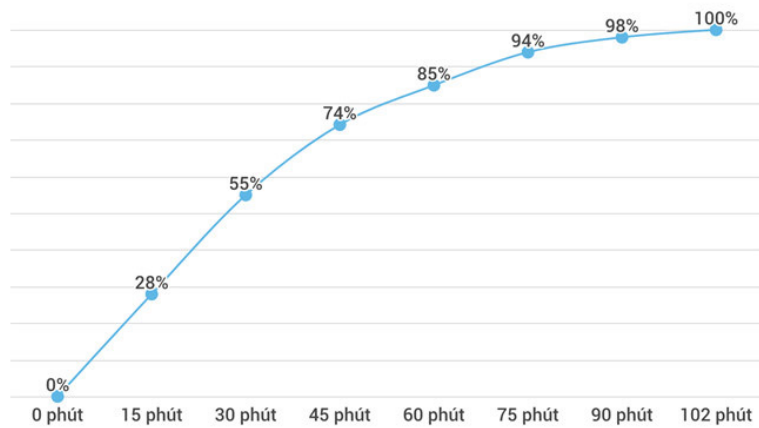

When you buy iPhone 11 Pro, users will get a free 18W charger and USB-C to Lightning cable. The 18W charger promises to greatly reduce the time it takes to charge the iPhone for a full charge compared to the 5W charger that takes 3 hours.

See how the iPhone 11 Pro with its 18W fast charger outperforms the older generation and other devices.

PhoneArena has tried using an 18W charger for the iPhone 11 Pro, resulting in Apple's new product that takes only 30 minutes to charge up to 55%, and 1 hour 42 minutes to fully charge.

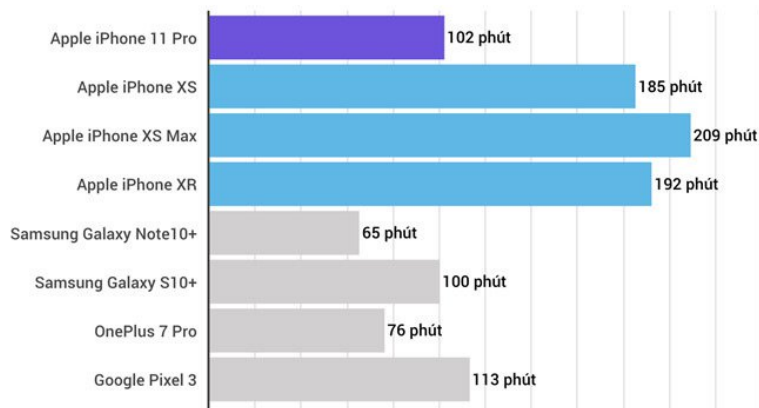

Results when charging iPhone 11 Pro with 18W charger included.

The reason that the iPhone only takes the first 15 minutes to charge 28%, but it takes 12 minutes to charge the last 2% is because the input voltage will increase during the first time to charge a lot of battery for the device, to the end of the battery. will charge more slowly due to reduced current.

Compared to the 5W charging on iPhone XS or XR, the charging time of iPhone 11 Pro is much faster but this is not the fastest charging device.

Fast charging feature of iPhone 11 Pro will take effect in urgent cases, users only need 15-30 minutes of charging and can still use in the long run.

The full charge speed of iPhone 11 Pro compared to other devices when using the charger included in the box.

Apple has sold 18W charger and USB-C to Lightning cable for about 1.5 million, if you are using Phone 8 or later can still buy to use this fast charging feature.
