

# Tetris game on Messenger

Tetris tile game was able to play on Messenger Android, iOS and Facebook Messenger computer version.

After the announcement, the Tetris tile game was finally available on Messenger for Android, iOS and on Facebook Messenger for computers.

The legendary Tetris classic game of all time becomes a title game that owns a large number of game players right after its launch. **The game** does not have a lot of bloody action, or 'colorful' colors like many other games, but it is attracted by brick-laying tactics that require quick thinking and calculation of players. Because of that, the Facebook producer brought Tetris to Messenger so that players could return to the fascinating tile levels.

As for Tetris on Messenger, it is similar to the tile game that we often play, placing blocks into the grid with the goal of achieving the highest score. Besides, the game also comes with many features such as daily tasks, your high score online rankings, or with your team of competitors. The article below Admin will guide you how to play Tetris on Messenger.
