Create a second phone number to get access to free WiFi calling and texting. Unlike other messaging apps, TextFree allows you to create your own phone number. The app helps you quickly create a phone number that's secure, easy to remember, and easy to share with friends and family.

With private end-to-end encryption features, TextFree gives you unparalleled call and text messaging privacy. Hide text messages from unwanted numbers, send private messages, or set up chat rooms for private messaging.

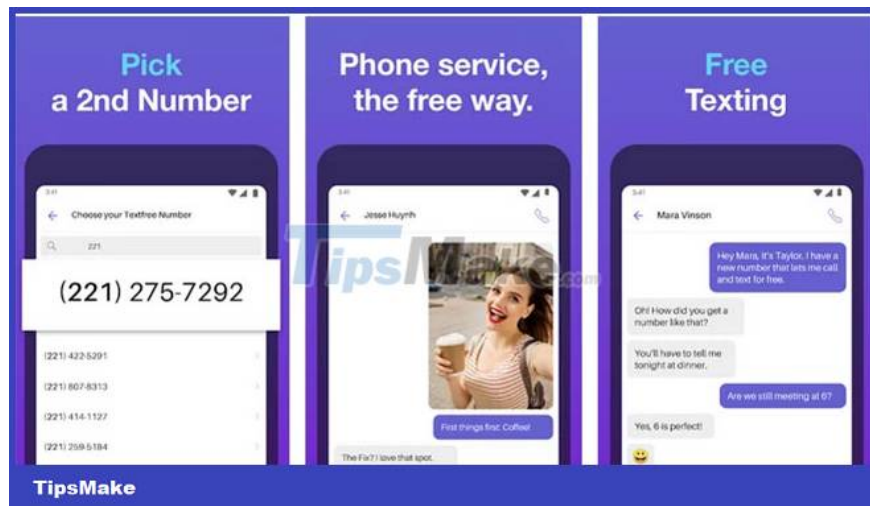

## Features of Text Free

### Free group chat and texting

1. This free messaging app can help you save your mobile data with free WiFi SMS texting
2. Send SMS or MMS from anywhere with WiFi connection
3. Create a group chat with people from your contact list
4. Group chat is perfect for connecting with groups of friends, family, work, etc.
5. Send GIFs, emojis, stickers, and photos to your contacts and group chats

## Custom number picker

1. Choose a phone number you want
2. Use your custom number as a primary or secondary phone number
3. A second phone number can give you extra security
4. Use numbers in TextFree for online forms, unwanted callers or risk spam for added security
5. TextFree can turn your desktop, tablet or other Android devices into a phone

## Additional privacy and safety

1. Hide text messages from unwanted callers and contacts
2. Secure end-to-end encryption for private messages and calls
3. Call and text over secure WiFi for peace of mind and security
4. A private second phone number for business, school, family or other personal contact purposes

## Unlimited call minutes with TextFree Plus

1. Unlimited calls
2. An ad-free calling and texting experience
3. Pre-order a personalized second number without having to choose again
