

Thanos has come to life and is snapping his fingers 'flying color' here and here

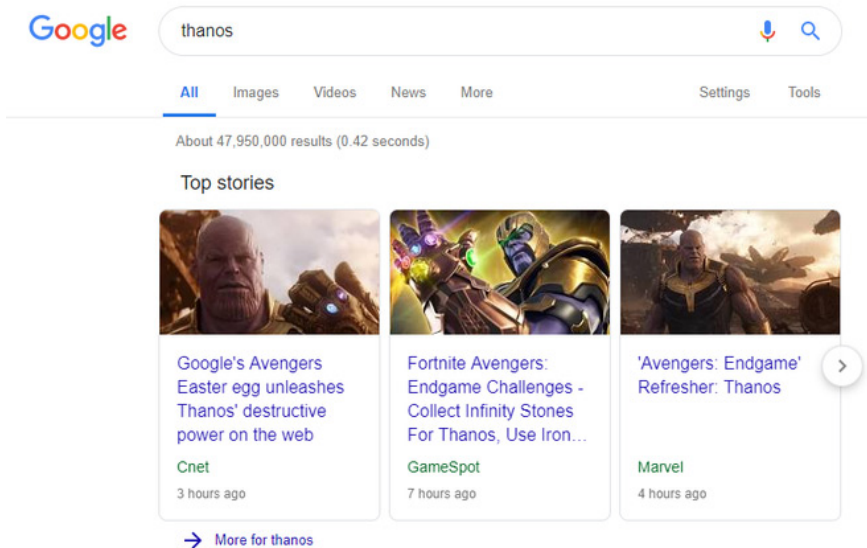

No kidding, go to Google and search for Thanos, make sure you don't believe what's happening right in front of your eyes.

Avengers 4: The Finals - Avengers 4: Endgame (2019) just released outside theaters is attracting special attention from the audience. While many people came to the cinema to enjoy every moment of hot Endgame, Thanos came out of the movie. No kidding, go to Google and search for "Thanos", make sure you don't believe what's happening right in front of your eyes.

Thanos snapped "flying color" all over the impressive Google.

After searching, an icon of Thanos's Infinity Gloves will appear in the right pane. Click on it, 'cup' - the sound of a snap sounded and something nearly impossible happened. The results displayed will in turn dissolve into dust and evaporate with a non-physical sound effect. Nearly all of Google's website will 'fly', even the original number of search results will automatically halve.

Search results are reduced by half compared to before.

The magic has not ended yet, the old results will be returned if you activate the power of the Time Stone by clicking on the glove again.

Isn't it great, open Google and try to discover the magic of Thanos's Extreme Gloves right now!
