

The 12-inch Macbook Air will have 3 colors like the iPhone 5S

According to Mashable, the Macbook Air model that uses a 12-inch screen is rumored to have been announced by the apple house in the summer of 2015. In particular, this model has 3 different colors. .

According to Mashable, the Macbook Air model that uses a 12-inch screen is rumored to be "apples" announced in the summer of 2015. In particular, this model comes with 3 colors. different.

The 12-inch Macbook Air is expected to be colorful

Accordingly, the **12-inch MacBook Air** is expected to have the same gray, gold and silver-white colors as the colors used on the **iPhone 5S** , but not merely using the silver-white aluminum casing as it is today.

The 12-inch Macbook Air is also speculated by the industry as the first Macbook Air model to use a Retina display, similar to the current high-end Macbook Pro series.

Earlier, according to the *Economic Daily* , Apple delayed the launch of the 12-inch Retina Macbook because the " apple house " wanted to complete the design of the machine to keep it slim and light, at the same time. High battery usage, because the "Retina" battery screen is more expensive.

Currently the latest Apple Macbook Air is equipped with Intel Core i5 1.4 GHz processor, 4 GB RAM, 128 GB SSD drive or 256 MB, Intel HD 500 video card. Starting price of the model This is \$ 899.
