

The 15 most useful features will appear on iPhone and iPad this fall

In Apple's annual conference for past application developers, the company announced many new and unique features in the iPhone and iPad that appeared this fall. Please TipsMake.com to list 15 most useful features offline.

The next iPhone and iPad software update - Apple's iOS 11 was announced on the second day of its annual conference for app developers. There are many important changes in iOS 11, such as the ability to use applications in practice. However, the most notable features such as the ability to send money to a friend via iMessage will make your iPhone and iPad more useful. Join TipsMake.com to list 15 most useful features in the upcoming iOS 11 version.

1. Can download and upgrade iOS 11 on iPhone / iPad
2. How to copy music to iPhone, iPad from computer?
3. Instructions on how to download applications, games for iPhone and iPad

1. New installation features for iPhone and iPad

When you set up a new iPhone or iPad, you just need to put your device next to another Apple product you own, such as a Mac, to instantly transfer the settings.

2. Transfer money via iMessage application

You can send money to friends or relatives in the Messages application with Apple Pay. Basically, Venmo application is only for iPhone owners.

3. Customize the settings in the Control Center

You can customize the settings in the Control Center, the menu will appear when you swipe from the bottom of the phone screen. That means you can finally add a shortcut to turn on energy saving mode.

< Settings

Control Center

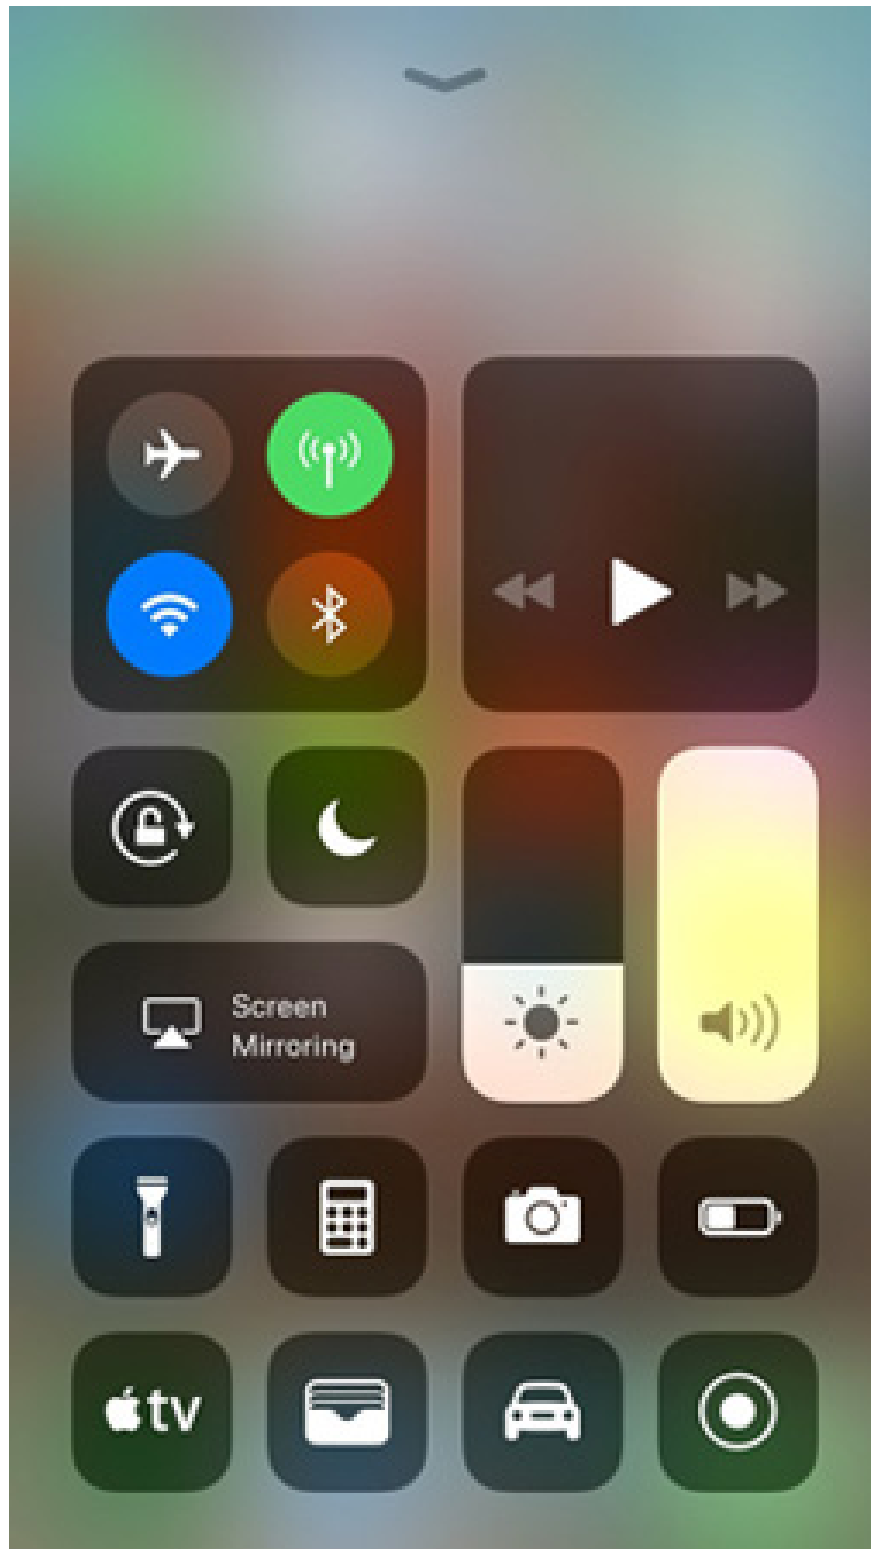

INCLUDE

-   Flashlight 
-   Timer 
-   Calculator 
-   Camera 
-   Low Power Mode 

MORE CONTROLS

-   Accessibility Shortcuts
-   Alarm
-   Apple TV Remote
-   Do Not Disturb While Driving

Yes, your Control Center interface will look like the image below, making it easy to manipulate without accessing Settings.

4. Application Settings with new details

The Settings application displays more detailed information about how you can save memory.

[General](#) iPhone Storage

iPhone 103.4 GB of 128 GB Used

Calculating category sizes...

RECOMMENDATIONS

Optimize Photos [Enable](#)

Save 71.05 GB - Full resolution photos and videos are safely stored in iCloud and your phone will use smaller size versions.

Review Large Attachments >

See photos, videos, and attachments taking up storage in Messages and consider deleting them.

Messages in iCloud 

Automatically saves messages and attachments in iCloud and reduces their size on this iPhone.

5. Delete unused applications anymore

You can also automatically delete unused applications to free up space by sliding the bar off next to **Offload Unused Apps** .

< Settings iTunes & App Stores

Touch ID is enabled for all purchases.

AUTOMATIC DOWNLOADS

-  Music
-  Apps
-  Books & Audiobooks
-  Updates

Automatically download new purchases (including free) made on other devices.

- Use Cellular Data

Use cellular network for automatic downloads.

- In-App Ratings & Reviews

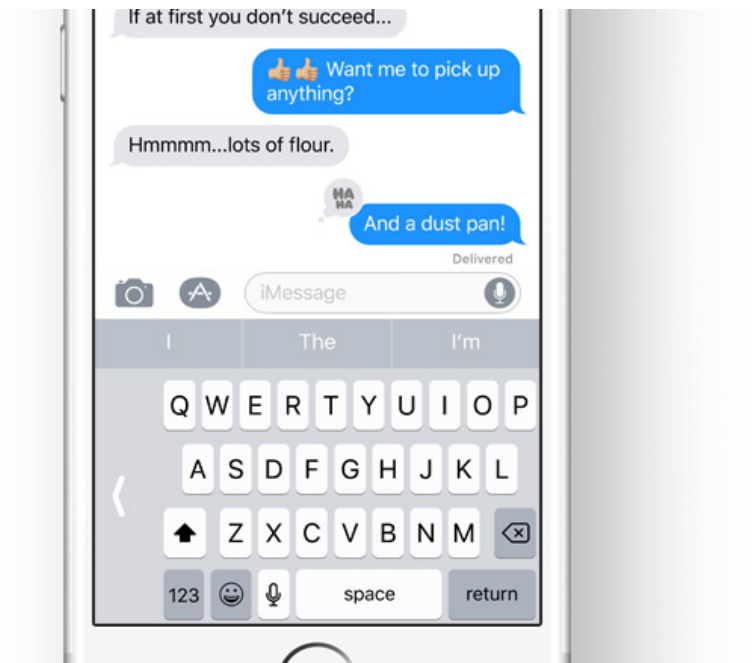

Help developers and other users know what you think by letting apps ask for product feedback.

- Offload Unused Apps

This will automatically remove unused apps, but keep its documents and data. Reinstalling the app will place back your data, if the app is still available in the App Store.

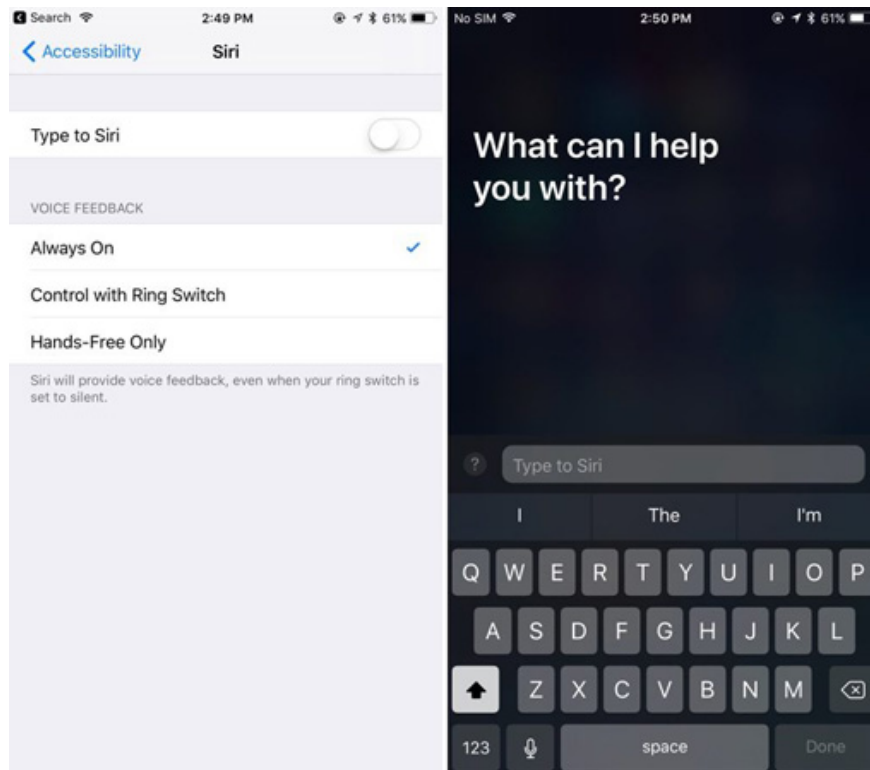

6. Keyboard type with one hand

One-handed keyboard will help you type more easily. To activate this feature, press and hold the **emoji** key, then select **one-handed typing**. Now the whole keyboard will move near the thumb.

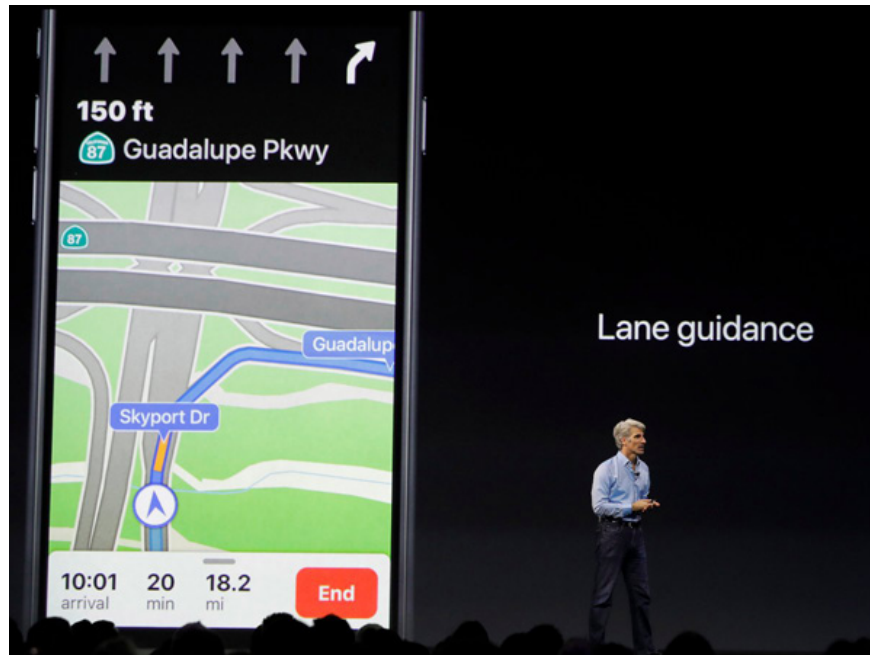

7. Type the keyboard to interact with Siri

You can interact with Siri virtual assistant by typing, not just speaking like before. To activate, swipe the slider next to **Type to Siri** in the app's detailed interface.

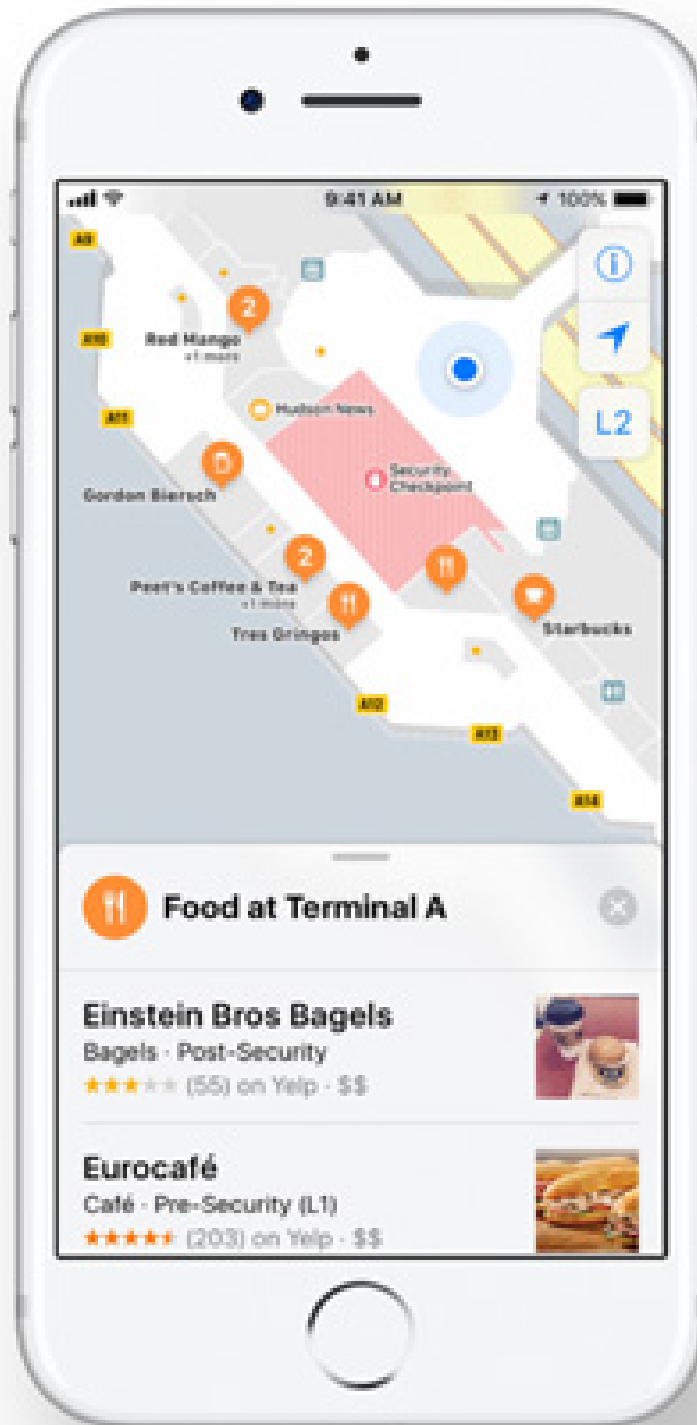

8. New features of Apple Maps

Apple Maps shows you the driving lane before you turn or into the lane.

Maps also displays indoor directions, so you don't need to waste time looking for a bathroom or any other room.

9. Integrated screen rotation feature

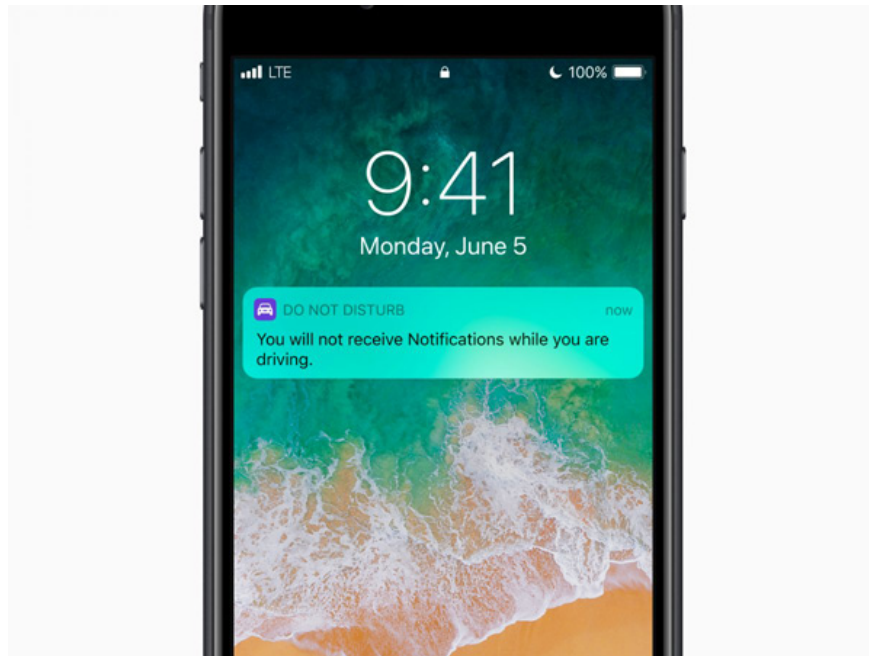

iOS 11 has an integrated screen rotation feature. Here's how it works.

10. Scanning QR code on camera

iPhone cameras can scan QR codes like Snapchat and WeChat apps.

11. Feature to turn off notifications when driving

The new feature - **Do Not Disturb While Driving** will turn off the notification sound and respond to text messages while you are driving.

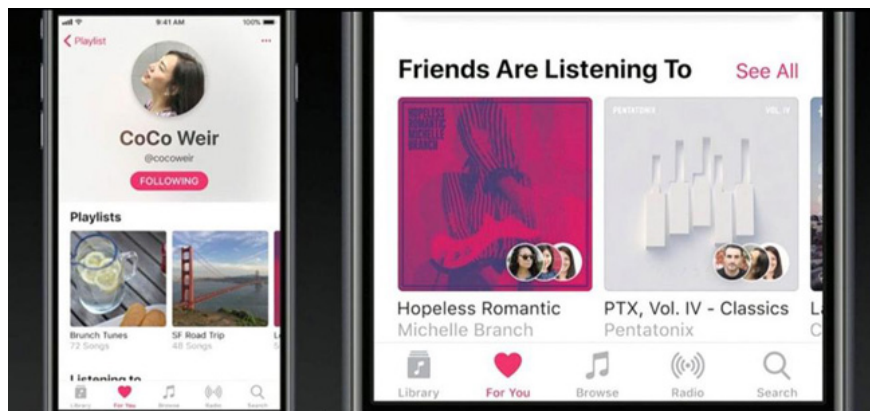

12. Transfer photos into PDF files in Notes

The Notes app has an integrated scanning function to convert images into editable (and searchable) PDF documents.

13. Share playlists on Apple Music

You can share playlists on Apple Music with friends to follow and vice versa.

14. New application - Files

New application - Files will display all the files that you have stored in Cloud or saved locally on iPhone and iPad. This application works with iCloud Drive, Dropbox and other storage applications. It is like the Finder application on a Mac, but on iOS devices.
