

The 2017 Nobel Prize for Medicine is awarded to 3 scientists

The 2017 Nobel Prize in Medicine was awarded to the Royal Swedish Academy of Sciences in Stockholm to three scientists Jeffrey C. Hall, Michael Rosbash and Michael W. Young for their discoveries on muscle control molecular mechanisms Biological rhythm, also known as the body's biological clock.

The 2017 Nobel Prize in Medicine was awarded to the Royal Swedish Academy of Sciences in Stockholm to three scientists Jeffrey C. Hall, Michael Rosbash and Michael W. Young for their discoveries on muscle control molecular mechanisms Biological rhythm, also known as the body's biological clock.

1. 9 most famous Nobel prizes in history, contributing to change the world
2. 'Cats are liquids' and 'laughable' studies in the Ig Nobel Prize 2017
3. Ig Nobel: Die laughing with the most silly inventions of 2016

3 scientists Jeffrey C. Hall, Michael Rosbash and Michael W. Young have done many research projects that help explain the true mechanism of the biological clock, helping explain how plants, animals and People adapt to their biological rhythms, which in turn suits the evolution of the Earth.

3 scientists won the 2017 Nobel Prize in Medicine.

Three scientists used fruit flies to model the individual model for research. They isolated the gene that regulates the daily circadian rhythm and found that the gene encodes proteins that accumulate in cells at night and decreases during the day. From there, they identified the additional protein components of this mechanism, and discovered the biological clock control mechanism inside the cell.

Research by three scientists has shown that the biological clock works according to the same principle in the cells of multicellular bodies, and of course people are also among them.

Alfred Nobel, a businessman and Swedish inventor, is the founder of Nobel prizes. The first Nobel Prize was awarded in 1901, five years after Nobel's death.

Scheduled to announce the Nobel Prize in the fields of 2017.

1. October 3: Nobel Prize in Physics
2. October 4: Nobel Prize in Chemistry
3. October 6: Nobel Peace Prize
4. October 9: Nobel Prize in Economics

The Nobel Prize for Literature does not yet have a specific publication schedule, but it is likely to fall on October 5 or October 12.
