

The 4 best Apple Watches of 2024

Apple's current Apple Watch line offers advanced health and fitness tracking features, elegant design, and improved performance, making them some of the best wearables you can buy today. .

Apple Watch Series 9 (GPS)

At first glance, the Apple Watch Series 9 is similar in both look and feel to the Series 8. However, this latest version features the new S9 chipset, which increases the overall performance of the Apple Watch by 30%. It also adds the Double Tap gesture and increases the screen brightness to 2,000 nits - making the screen twice as bright as the Series 8.

Additionally, the Series 9 has on-device Siri, and if you choose the aluminum version combined with the sport band, you'll have the added benefit of owning a 100% carbon-neutral smartwatch.

With this version of Series 9, you can make calls and send messages when your iPhone is nearby, as long as the two devices are connected via Bluetooth or Wi-Fi. You'll need the Series 9 Cellular version to enjoy this functionality independently of your iPhone, but having this feature on the S9 makes communication simple and hassle-free when out and about.

You may not need to upgrade if you already have a Series 8. But if you're switching from an older model or buying for the first time, the Apple Watch Series 9 is still the best choice for most people.

Apple Watch SE (2nd Generation)

Even the most die-hard Apple enthusiasts will admit that buying the latest Apple Watch is an expensive undertaking. However, if you're not too concerned about keeping up with the latest additions, you'll still find much to admire about the significantly more cost-effective Apple Watch SE (2nd Gen).

It lacks the full functionality of the premium Apple Watch. For example, the Apple Watch SE (2nd Generation) cannot measure ECG, monitor blood oxygen levels or check temperature, and the display is about 20% smaller than the Series 8 and Series 9. But in many On the other hand, it can do a lot of things.

Apple Watch SE 2 boasts a stunning OLED display with 1,000 nits of brightness, comprehensive health and fitness tracking with advanced metrics, sleep tracking, and safety features like Fall Detection fall/accident and emergency SOS. In addition, there is a Family Setup feature, which allows watch pairing for family members who do not own an iPhone.

Apple Watch Series 9 (GPS + Cellular)

The Apple Watch Series 9 GPS + Cellular is the premium option in the Series 9 lineup. Not only does it have all the same features and specs as the standard Series 9, including Double Tap gestures and an AMOLED Always-on display, but also provides cellular connectivity to provide true standalone functionality.

With a data plan, you can use Series 9 GPS + Cellular to send and receive text messages, answer phone calls, and get notifications - all without your iPhone nearby. Additionally, the Cellular model allows streaming of Apple Music and Apple Podcasts without needing to be connected to the phone.

The advantage of this is huge for those who do not like having multiple smartphones in their back pocket when going out. This is also convenient for runners or gym goers who want to stay connected during their workout but don't want to be tied down by always having to carry their iPhone with them.

Apple Watch Ultra 2

For outdoor enthusiasts, the Apple Watch Ultra 2 is the ultimate version of the Apple Watch. This reliable smartwatch features a corrosion-resistant titanium case, accurate dual-frequency GPS, built-in cellular connectivity, and impressive battery life, making it an ideal choice for outdoor activities and adventure.

In addition to expanded connectivity, it also has a large, super-bright 49mm screen with a brightness of 3,000 nits so it displays well in direct sunlight. It is highly water-resistant, has been drop-tested at military grade, and can easily adapt to high altitudes. It also has an 86-decibel emergency siren (activated with the Action button), which can be heard from up to 183m away. The Action button itself can be customized to configure hotkey actions associated with different applications and features.

It's pricey, but for mountain climbers, swimmers, hikers, and adventurers, this is the best Apple Watch available.
