

The \$ 4 iPhone X with this solar battery will probably be noticed by Elon Musk

The Russian manufacturer of the product called Caviar has just launched one of the most expensive iPhones you can buy. iPhone X Tesla is an iPhone X version of carbon and gold, with solar powered batteries. The price of this device is \$ 4000 and will have a wooden case.

The Russian manufacturer of the product called Caviar has just launched one of the most expensive iPhones you can buy. iPhone X Tesla is an iPhone X version of carbon and gold, with solar powered batteries. The price of this device is \$ 4000 and will have a wooden case.

Caviar is still known for its ability to make meticulous products worth thousands of dollars. What makes this phone case different is that it attaches to the product and is not removable.

The Caviar iPhone X Tesla has 64GB and 256GB versions, which are priced at \$ 4064 and \$ 4847 respectively. Caviar said that the solar cell of this phone could use the sun or light. The device also has a solar charge level indicator and an anti-shock solar panel.

This shell makes the iPhone look thicker. When there is a case, the machine is thick to 16.22mm, while there is no shell only 7.7mm thick.

Saying that the shell was inspired by Nikola Tesla, Steve Jobs and Elon Musk, Caviar even sent his first product to Elon Musk. The phone is printed with the line 'Made on Earth by humans', which is also the word Musk printed on Tesla Roadster's circuit board when launching Falcon Heavy ships into space.

The Caviar initially planned to make 99 but now the number has increased to 999 because the number of reservations is higher than they expected. Each one will have its own number.

iPhone X Tesla is shipped for free and users will not have to pay until they have 'thoroughly tested'. But don't forget the taxes or customs fees, you still have to pay normally.

Caviar hopes iPhone X Tesla will now 'astronauts, pioneers who always explore the boundaries of human abilities'.

Let's admire some pictures of iPhone X Tesla below.

Body shell made of carbon and gold

Machine equipped with solar batteries, the shell makes the body much thicker

The name is also inspired by Elon Musk

Full box 999 units with own numbers
