

## The Acer Aspire One A0532h netbook costs \$ 299

Acer has officially introduced the latest A0532h netbook with affordable price, equipped with the new generation Pine Pine processor.

**Acer has officially introduced the latest A0532h netbook with affordable price, equipped with the new generation Pine Pine processor.**

The Acer Aspire One A0532h has a 10-inch screen, with a design that is quite different from its predecessors. A0535h uses Intel Atom N450 chip on Pine Trail platform, ready with GMA 1350 graphics card, 1024 x 600 screen resolution and battery life up to 10 hours. Although the price is quite cheap, A0532h also has an integrated 0.3 MP camera, a 5-in-1, three-port USB memory card reader, including black, red, white and blue.

A0532h available with Windows 7 and battery power for 10 hours of use are attractive parameters of this model.

The A0532h supports Windows 7 Starter, 1GB RAM, 160 GB hard drive, 6 cell 4400 mAh battery. The A0532h will be available in the next few weeks at an impressive price of \$ 299, significantly lower than the

rival Eee PC 1005PE, which also uses the Pine Trail (380 USD) chip.

Most likely at the upcoming CES 2010 exhibition, the first time users will see firsthand this line of netbooks of Taiwan electronics company.

With the Pine Trail platform, integrating graphics controls and memory into the processor, Acer netbooks offer better performance while saving space.
