Recently, Chinese electronics firms have become more interested in netbooks of famous computer brands in the world. As evidenced by the turn of Apple Macbook Air, HP Mini Vivienne Tam or Sony Vaio W all have identical models from China. The above models are not only very sophisticated imitation of design, but also the configuration is equipped with the same.

Most recently, a Chinese low-cost electronics manufacturer launched the Suncu 12 netbook, identical to the Acer Aspire One D250. The only difference between these two products is the screen size. D250 owns a 10-inch screen, while Suncu 12 uses a 12-inch screen. The larger screen also means that Suncu's keyboard is 12 wider and the keys are also more airy than on the Acer Aspire One D250.

Suncu 12 is equipped with a standard netbook configuration with 12-inch screen, 1,280 x 800 pixel resolution (16:10 ratio), 1.6 GHz Intel Atom N270 processor, 1 GB RAM memory , optional 80/160/250 GB HDD, GMA 950 integrated graphics. It has full LAN, Wi-Fi, Bluetooth, integrated Webcam, 3 USB ports, MMC / SD card

slot, VGA . and use 6 cell 4,400 mAh battery for maximum running time of about 5 hours.

It also has 4 colors including white, black, red and blue like the Acer Aspire One D250. Currently, Chinese manufacturers have not disclosed the official time and price of their products.
