

# The Acer Aspire one 'white clam shell' officially launched

Aspire One is seen as a revolution in Acer's netbook design. With its ultra-slim body, ultra-light weight and a very attractive overall texture

**Aspire One is seen as a revolution in Acer's netbook design. With its ultra-slim body, super light weight and very attractive overall texture, Aspire One has created a new wave in the Vietnamese technology village.** Recently, Acer has officially released the white version of this new model.

With an extremely slim and lightweight appearance design, combined with the Flash SSD storage technology, the new anti-shock technology, the Aspire One is created, seems to be reserved only for people who are mobile.

Not only possessing a charming beauty, perfect to every detail. The Aspire one is also the first to use the new Mobile Intel® Atom™ N270 UMPC series (1.6GHz, 512KB L2 Cache, 533MHz FSB), integrating Intel Enhanced SpeedStep technology to deliver powerful work, durable, energy saving and extend battery life. Enhanced storage capacity with Smart File Manager, a simple and new solution for importing data storage capacity via the 2nd SD card, in addition to 1 slot of 5in1 card easily and quickly.

The most lovely point in the design of the Aspire One is the 8.9-inch CrystalBrite screen with advanced LED BackLight technology. With light-emitting diodes and a resolution of 1024x600 pixels, the Aspire One's LCD

screen is more energy-efficient and thinner than conventional CCFL fluorescent lighting. Built on top of the screen is a unique Acer CrystalEye webcam and digital microphone, giving you the perfect online conferencing experience or simply chatting with friends. The first Aspire One comes to Vietnam with the Linux operating system, but you can work easily when you switch to Windows XP.

**Reference configuration :**

1. Acer Aspire One - Price 8,600,000 VND (VAT included)
2. (P / N LU.S020A.027) - Seashell White Color
3. CPU: Intel® Atom™ N270 Mobile (1.6GHz, 512KB L2 Cache, 533FSB) w / Intel Enhanced SpeedStep technology
