What is Blik?

BLIK itself is a payment option with many years of experience. This method appeared in 2015 thanks to the collaboration of six different Polish banks under one organization.

At the beginning of BLIK's existence, this method was only available in Poland, but the reliability of the system was quickly confirmed, which is developing at an express pace and planning expansion to distant foreign markets. Currently, BLIK is available to almost every user of reputable banks in Poland and recorded a total of 220 million transactions, including thousands of online casinos.

Speedy Transactions for Polish Players

We can confidently promise that BLIK is one of the simplest payment options in virtual casinos. The casino BLIK payment is quick and uncomplicated, all you need is a phone with a BLIK-enabled bank application.

Therefore, the online casino BLIK is a brilliant choice for all impatient, but also appreciating the convenience and reliability of players. The online casino BLIK payment is almost immediate, it does not require a thousand pieces of data and information to remember. It is fast, reliable, and professional.

Security Measures for Polish Online Casino Transactions

Can such immediate transactions without providing a million data be secure? Absolutely yes! Although we do not need to log in separately to the bank account, our transactions are encrypted, and we only have access to the payment authorization code, which is always generated automatically and is not subject to any scheme.

Moreover, each code is only valid for two minutes, which also gives us an additional protective layer. In the worst case, when our smartphone is stolen, the thief will not be able to use BLIK, because access to the banking

application will also be impossible without knowing the data. Now you know why BLIK Casino is such a brilliant invention of the world of gambling.

Which banks are compatible with BLIK?

Nowadays, virtually all of us have a bank account. In addition, over 70% of account users make transactions on their phones. Remember that several banks in Poland cooperate with the BLIK mobile payment system.

Here is the list:

1. AliorBank
