Aspire One runs on Linux pre-installed Linpus Linux Lite operating system or Windows XP Home, plus OpenOffice 2.3, one Mail, Messenger, Acer eRecovery Management, Acer Launch Manager .

The device overcomes the narrow space drawback of the mini-keyboard with the keyboard of the machine, reaching nearly 95% of normal size, creating comfort for users.

In order to increase storage capacity, it is also equipped with Smart File Manager, a solution that helps to import more storage capacity into memory. The mechanism to automatically save content to a memory card before saving to a solid-state drive, increases the life of the hard drive.

Its battery life is 3 hours if a 3-cell standard battery is selected and up to 6 hours if a 6-cell battery is selected.
