

The basic way to uninstall programs, delete software on Android phones

On Android OS, there are many ways to uninstall programs and software if you don't use them. In this tutorial, TipsMake.com will introduce to you 3 most basic ways to delete software on the Android platform.

On Android OS, there are many ways to uninstall programs and software if you don't use them. In this tutorial, TipsMake.com will introduce to you 3 most basic ways to delete software on the Android platform.

The advantage of these ways is that it is fast, without the need for support software or other access.

Method 01:

Click and hold the software icon to delete about 2 seconds, the system will show the trash icon> you can move the icon of the program into it.

Method 02:

You open the **Settings > Applications** , then find the program you want to delete> select the **Uninstall** function button.

Method 03:

Using Google Play is available on the phone, find the correct application name to delete> select **Uninstall** .
