

# The basics need to know when participating in traffic to avoid the occurrence of unfortunate accidents

Maybe when you go through the article title, you will think 'think something good, those who don't know'. Although it is known, but it is still necessary to repeat, maybe only a subjective moment when driving on the road that you can cause an accident, regret all your life. Here are the basic things everyone needs to know when participating in traffic.

In recent years, traffic safety is a big concern of the whole society. Going around the road, the phrase 'Traffic safety is happiness for every family' as a reminder, also a warning to traffic participants, obey the traffic law to bring safety to yourself, for your family and for society.

In fact, traffic accidents are taking place every day and every hour, we can easily see on daily newspapers or news programs the news of traffic accidents is regularly updated. Every passing day is there not knowing how many lives are threatened by traffic accidents? Traffic accidents can reach anyone regardless of age, occupation or social status. There are many reasons for traffic accidents, including: poor transport infrastructure, transport means do not ensure safety conditions (overdue, obsolete, self-made vehicles), etc. The leading cause of traffic accidents in Vietnam is much higher than that of other countries in the world.

Maybe when you go through the article title, you will think 'think something good, those who don't know'. Although it is known, but it is still necessary to repeat, maybe only a subjective moment when driving on the road that you can cause an accident, regret all your life. Here are the basic things everyone needs to know when participating in traffic.

## **1. Do not overtake another vehicle when not observing the front**

This is a basic thing everyone should know when driving. When we go on a road, we will usually pick up the road to cross the road, but if you overtake if you are obstructed by the vehicle ahead, you should absolutely not risk it. When overtaking another vehicle, make sure the road is clear and free of obstacles by other vehicles or passersby.

## **2. Do not cross the road when not observing or a large vehicle blocking the view**

Observe carefully before crossing the road, make sure the road is clear and there are no vehicles on both sides to cross the road. DO NOT cross the road when there is a vehicle or object blocking the opposite lane. These are the basic things when participating in traffic that adults or parents need to remind children about this to ensure their safety as well as other means.

### **3. Do not cross the curve, bends**

Driving on the pass road, the curve behind a slow car sometimes causes impatient drivers and pushes the gas to pass, but one thing to keep in mind is never cross another vehicle on the curve, because of the roads curvature, the vision drops very low, it is possible that behind the bend is another vehicle coming in, if you need to pass, cross the straight line

### **4. Do not observe when opening a car door**

1. How to open the car door properly and safely

Opening the car door suddenly, not looking behind is a common mistake of many of us, this careless error caused many dangerous accidents. So you know how to open a car properly to not cause an accident? Please refer to our following article.

### **5. Do not run vehicles on the highway**

You run on Vietnamese highways, or you may find cars running very fast, hundreds of kilometers per hour but keep running close to each other, really looking at that scene, I'm really scared and one is overcoming those cars. (If speed allows) or 2, I step back to see the cars more clearly (in case a car wins, the other cars will definitely bulldoze).

Many drivers do not know that at the speed of 100km / h, it takes a few tens of meters for a new car to stop when braking a brake (with a good brake), many drivers rely on their brakes to keep running. This needs to be avoided. In general, on the highway, it is necessary to keep a safe distance when running.

### **6. Use a phone, text when driving**

Today's phones are an unreasonable object for many people, especially young people, who use their phones anytime, anywhere, even when they are in traffic. It is the habit of using the phone when driving a car that has brought potential dangers, difficult to cope with unexpected situations. Not only that, this is also an act of lack of awareness and lack of culture when participating in traffic, contributing to creating conditions for criminal robbery to operate. If you have an emergency call, you have to use the phone, you can wear the headset first, and receive the call with the shortcut on the headset or when you need to listen to the message urgently, pull over. As such, it is safe for you and those around you.
