## About the Beats brand

Beats Electronics LLC (also known as Beats by Dr. Dre, or simply Beats by Dre) is a subsidiary of Apple Inc. specializes in producing high quality audio products. The Beats brand was founded by the famous music producer and rapper Dr Dre and co-founder of record label Interscope Records, Jimmy Iovine. The company's flagship product lines mostly focus on basic audio devices such as headphones and speakers, in a youthful, chic style exclusively for young people. The company was officially founded in 2006, but until July 25, 2008, they released their first product, which is a Beats by Dr. headset. Dre Studio, and has gained quite a lot of positive feedback from the market.

1. Fix the error not connected to the headset in Windows 10

In 2011, NPD Group reported that Beats' market share in the United States was 64% in the headset segment that cost more than US \$ 100, and at the same time the brand was valued at US \$ 1 billion in September. 2013. In a short time, Beats is owned by Taiwanese smartphone manufacturer HTC. Until August 1, 2014, Apple Inc. bought Beats for \$ 3 billion in a direct cash and stock deal, which was the biggest acquisition in Apple's history at the time.

Since its acquisition by Apple, the Beats headphone brand has taken its advantage and achieved leaps and bounds, both in terms of market size and profitability and reputation. Today you can see Beats headphones in

every corner of the world, on the ears of many famous singers, actors, athletes and athletes in the backpacks of students who dynamic young. It can be said that, with the advantages of beautiful design, good sound quality and high brand recognition, Beats is one of the top choices of high-end users in the high-end headset market. (not including Audiophile).

In addition, it must mention the ability to support high-end features and extremely good compatibility of Beats headphones with iPhone, iPad, iPod and Mac. As these Apple devices are getting more and more widely used, the demand for Beats headphones is certainly much larger.

1. Common iPhone audio errors and remedies

## **Classification of Beats headphones**

In general, on the audio market today there are 3 popular earphones, which are in-ear, on-ear (placed on the ear) and over-ear (hug ear selection), serving each person's needs, interests, and budgets. Beats currently owns remarkable products in all three types of headphones.

1. The best true wireless headphones on the market - when convenience comes to the throne

In-ear Beats headphones will come with different sized tip (ear) pairs to suit each person's ear canal size, while earphones (on-ear and over-ear) will be available. The design is similar in design, only different in ear-cup size, some product lines are also equipped with the ability to isolate or actively suppress noise to serve the sound insulation needs of users. .

## **How much should you spend on a Beats headset?**

Of course this will depend on your budget as well as your actual needs. There are cheaper options in range, but if you want to own a product with 'Beats' design and on-ear or over-ear designs, you will definitely have to spend no less than 3 million VND. . As for in-ear headphones, the price will be much more pleasant, with only about 2 million dong, you can own a 'genuine' in-ear headset from Beats.

If you have a lot of money, you can also choose the 'premium' line of Beats Studio or Beats Pro with prices ranging from 7 to 10 million VND. Naturally, with such a large amount of money, you get a pair of headphones with great sound quality, fashion, 'luxury' and especially the excellent compatibility with iPhone and devices. other equipment of Apple.

1. What brand name earbuds should I buy?

## Do you need wireless Beats?

At the present time, due to being designed primarily for young people, often traveling and moving, most Beats headphones are wireless (wireless), so you'll need to charge Battery for them to work via Bluetooth connection. Even so, Beats wireless headsets come with a headphone jack so you can use them in case the battery runs out or the music player doesn't support Bluetooth connectivity. Thus it can be seen that the usability of these headphones is very flexible.

## The best Beats headphones in 2019

### Beats Studio 3 Wireless - reference price: 7.5 million

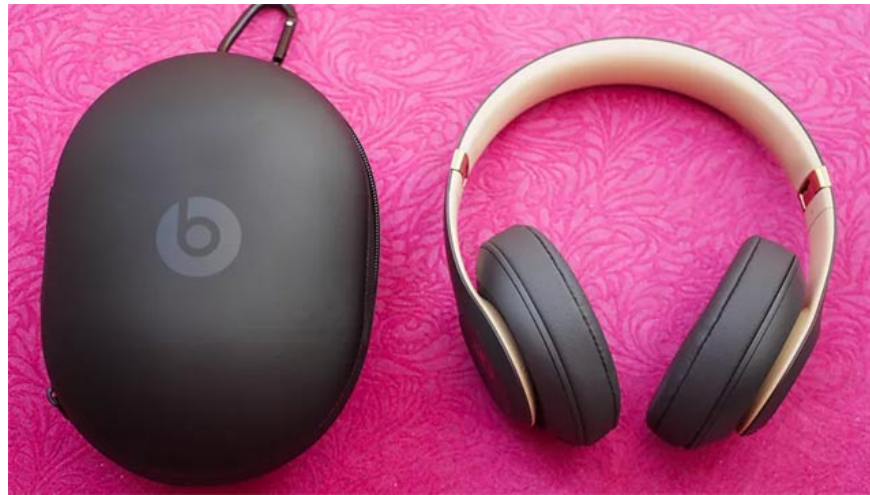

#### Salient features:

1. Use the new Apple W1 bluetooth chip.
2. PURE ANC active noise protection (Pure Adaptive Noise Canceling technology).
3. The music playback time is up to 40 continuous hours, with 22h of music listening to noise-canceling features.
4. Fast charging technology 10 minutes to listen to music 3 hours.

Studio 3 Wireless is the most feature-rich headset and can claim to be the most exclusive Beats family at the moment. The reason for this is because while not the most expensive Beats headset, Studio 3 Wireless is the product that has the best price / performance rating, even better than some models. from other famous village audio competitors like Bose and Sony.

Beats Studio 3 Wireless still retains the traditional design that has made the brand of Studio series, with the compact, full-eared earhook, the comfort is highly appreciated, dynamic but equally luxurious. .

In terms of features and sound quality, although it works best with an iPhone or iPad, of course, you can still use this headset with any other Bluetooth device you want. The sound quality on the Beats Studio 3 Wireless is still tweaked in the dark direction, the bass is rich in volume, powerful, neat, while the mid and treb are still enough to use, in general, this headset is best suited to the version. Young and vibrant music. If you are not too strict about sound, you can still use the Beats Studio 3 Wireless to listen to 'junk', but vice versa, if you require the ability to display light music, rock, or real ensemble. The good is that this is not really a product for you. In addition, the battery life and active noise protection are also great additions to this headset, making it one of the best-selling products in its price segment.

1. 10 models of sports headphones worth buying 2019

### **BeatsX Wireless - reference price: VND 2.8 million**

#### **Salient features:**

1. Use Apple Bluetooth W1 chip.
2. Music playback time is up to 8 hours continuously.
3. Fast charging technology 5 minutes to listen to music 2 hours.

If you are looking for a pair of dynamic, stylish, and in-ear headphones in the price range of VND 3 million, BeatsX is an ideal choice. With many wingtips options and ear tips suitable for all ear canal sizes and comfort

needs, BeatsX can give you the perfect private music space no matter what you are doing, from relaxing cafe for sports jogging. BeatsX is really light, compact, soundproof, fit, and extremely convenient.

However, the most surprising feature on BeatsX is probably battery life. Besides 8-hour battery life, too good for a Bluetooth in-ear headset model, the product is also equipped with Fast Fuel smart charging technology that can provide 2 hours of music playback with only 5 minutes of charging and support charging. full of batteries in just 40 minutes.

In terms of sound quality, BeatsX is not a product of top quality soundstage in the segment, but not so disappointing. The bass is still strong, rich in tradition, but not as strong as the predecessor BeatsX, giving it a better balance than the warm and high mid (mid) range, which also helps the ear. This listener has a much better ability to play.

One of the most disappointing things on BeatsX is that it is a sports headset, but the product is not equipped with water resistance or at least anti-sweat - a rather confusing decision from Beats. .

1. Will a new sound technology coming out in 2019 make the headphones obsolete?

**Beats EP - reference price: 1.8 million**

**Salient features:**

1. The frame design is reinforced with lightweight, durable stainless steel.
2. Headphones with control/talk key compatible for the iPhone, iPod, iPad, Mac and most smartphones today.

If you love the Beats brand while the budget is not overly generous and especially not so important about whether a wired or wireless headset, Beats EP will be the name you can choose.

The Beats EP has a very affordable price while still ensuring Beats' dynamic and youthful, and the sound quality is very good in the segment. In fact, what impressed me most about the Beats EP was the design and quality of the product.

In terms of sound, there is not so much to say at this price range. Basically, Beats EP possesses a balanced sound, not too much Bass like other brothers, wide soundstage, suitable for many young music genres like pop, dance, hihop .

It can be fun to say that Beats EP is 'every house's Beats'.

**Beats urBeats3 - reference price: VND 2.8 million**

**Salient features:**

1. Ergonomic design makes it feel more comfortable, comfortable and comfortable than the older generation.
2. Housing with built-in magnet, plus flat cable for more effective anti-tangle.
3. RemoteTalk button on the wire can be used to activate Siri virtual assistant, receive calls, and control music play easily.

If you are a hard fan of Beats and especially just like using wired in-ear headsets, there will be no other products worth more than urBeats3 at the moment.

Comfort is the most remarkable factor on urBeats3 with an ergonomic design that makes it feel more comfortable, comfortable and more comfortable than its predecessor. In addition, the more size tip that fits in the ear structure types offers the best sound quality as well as a comfortable wearing feel, the ear-wing combination helps to keep the housing steady when you exercise. high amplitude.

The urBeats3 sound quality is quite similar to the BeatsX Wireless, there is no significant difference, but the price is much cheaper (because BeatsX supports Bluetooth connectivity).

1. Spending tens of millions for an earbuds instead of headphones or speakers, is it worth it?

### **Beats Solo 3 Wireless - reference price: 6.5 million**

## Salient features:

1. Use the latest Apple W1 bluetooth chip.
2. Closed-on-ear headphones help to eliminate noise from the outside environment.
3. Music playback time is up to 40 hours continuously.
4. Fast Fuel fast charging technology, charging 5 minutes 3 hours of music listening.

The Beats Solo 3 Wireless is one of the Beats' best-selling headphones, and there's a reason for it. Still the same as its predecessors, the design of the Beats Solo 3 Wireless headphones still puts the style and style to the top when harmonizing the style, color and care of the parts. most detailed. There are up to 9 color versions for users to choose products that suit their personalities.

Being equipped with a W1 chip means that Beats Solo 3 Wireless will also be a great support product for Apple users, in addition to light water resistance and up to 40 hours of continuous battery life are plus points can not mention.

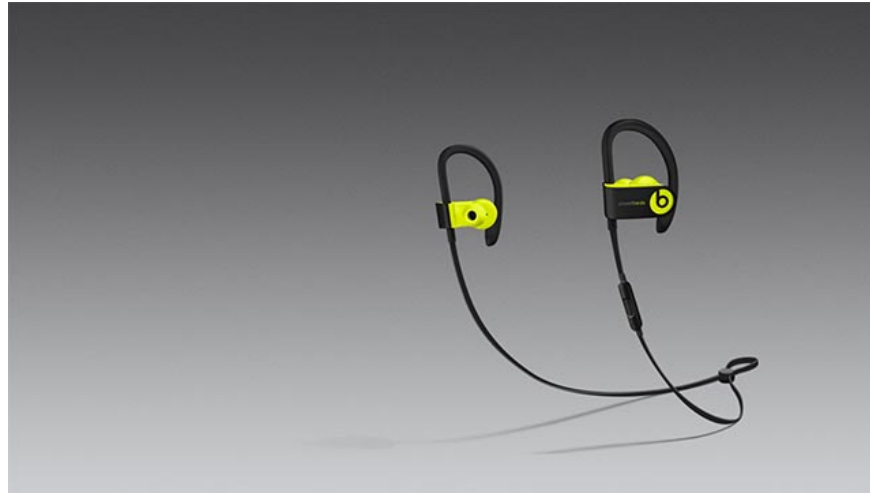

About sound quality, practical experience shows that the sound quality of Solo 3 has many positive improvements compared to Solo 2, it is worth upgrading. Specifically, when compared to the bass range, you will not see too many changes on the Beats Solo 3 compared to its predecessor, the bass is still solid, firm, rich in quality and well controlled, but not highly technical. like competitors in the same segment. However, you will see a significant change in the mid and treb range. Mid has become more popular, not too drowned into bass like Solo 2, while treb has been pushed up quite a lot, though not to the extent of 'jingle' but some other products are in the same price range, but have a feeling of airiness. much better.

In general, the Beats Solo 3 will still be more suitable for exciting music like dance or EDM, but if you need to listen to other genres that require more detail and balance, Beats Solo 3 might not meet your expectations.

1. Active and passive noise headphones, which type?

**Beats Powerbeats 3 Wireless - reference price: 4.3 million**

### **Salient features:**

1. Use the latest Apple W1 bluetooth chip.
2. Water, sweat, and dust.
3. Music playback time is up to 12 hours continuously.
4. Fast charging technology 5 minutes to listen to music 1 hour.

Love the Beats brand and regularly practice sports? You won't be able to find a headset that is more than a Powerbeats 3. This is because it contains all the features that must be available on a high-end sports headset, such as High quality wireless connection, comfortable fit, comfortable, anti-rain, sweat and finally extreme 'buffalo' battery life. Besides, it is also impossible not to mention the dynamic design that made Beats brand.

1. What is a headset driver and how does it affect sound quality?

Regarding the sound quality on Beats Powerbeats 3, only one comment can be commented on: Bass, bass everywhere! Basically, this headset possesses strong sound quality, deep and super deep bass. The bass is still much more 'brutal' than other products, making non-basshead people feel uncomfortable when worn. However, the smart design on Powerbeats 3 gives you the freedom to enjoy your own music space, while still being able to hear outside sounds to ensure safety in street sports. Mid and Treble bands are not rated at a high level but are

just enough for a sports wireless headset, yes, no one listens to symphonic or light music while practicing sports!

These are 6 Beats earphones that are considered to be the most valuable in 2019 in each segment of the price range as well as the design category. Wish you can choose for yourself a suitable product.
