

# The best 3 alternative YouTube apps for Android

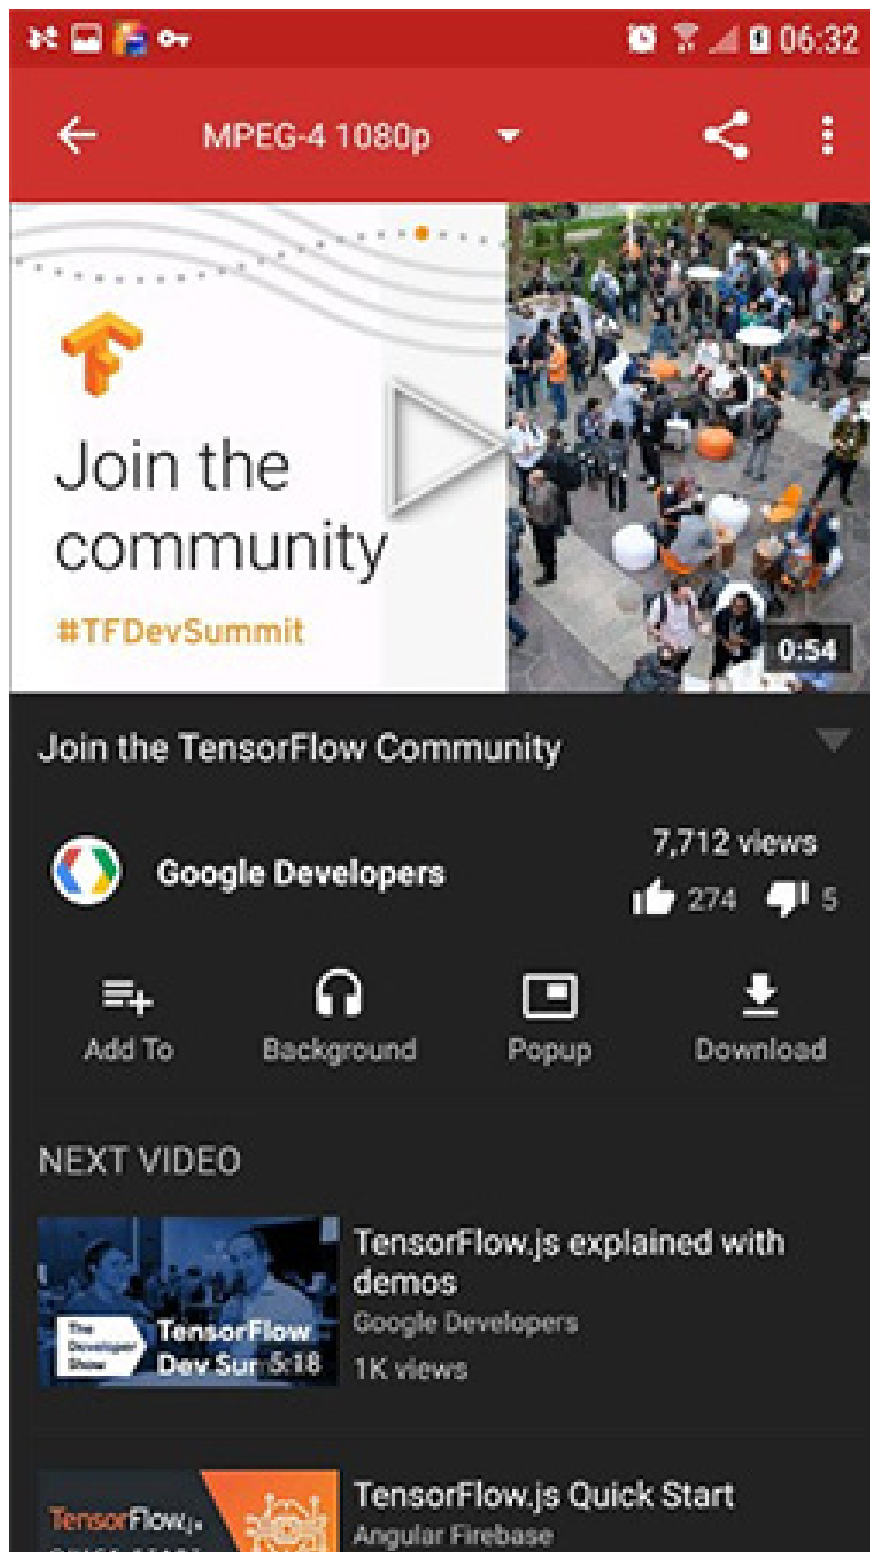

With the YouTube for Android replacement application listed in this article, you have many ways to watch YouTube videos and YouTube music on your phone while doing other things, even avoiding nasty ads. Let's see what applications they are.

Although the YouTube application is installed on most mobile phones, it also lacks many of the basic features that users are interested in such as playing YouTube videos in the background, downloading YouTube videos to their phones, and adding tasks. Ads bother at most videos.

With the YouTube for Android replacement application listed in this article, you have many ways to watch YouTube videos and YouTube music on your phone while doing other things, even avoiding nasty ads. Let's see what applications they are.

## NewPipe

NewPipe is one of the best alternatives for YouTube. You must download and install the APK file of the application on your Android phone.

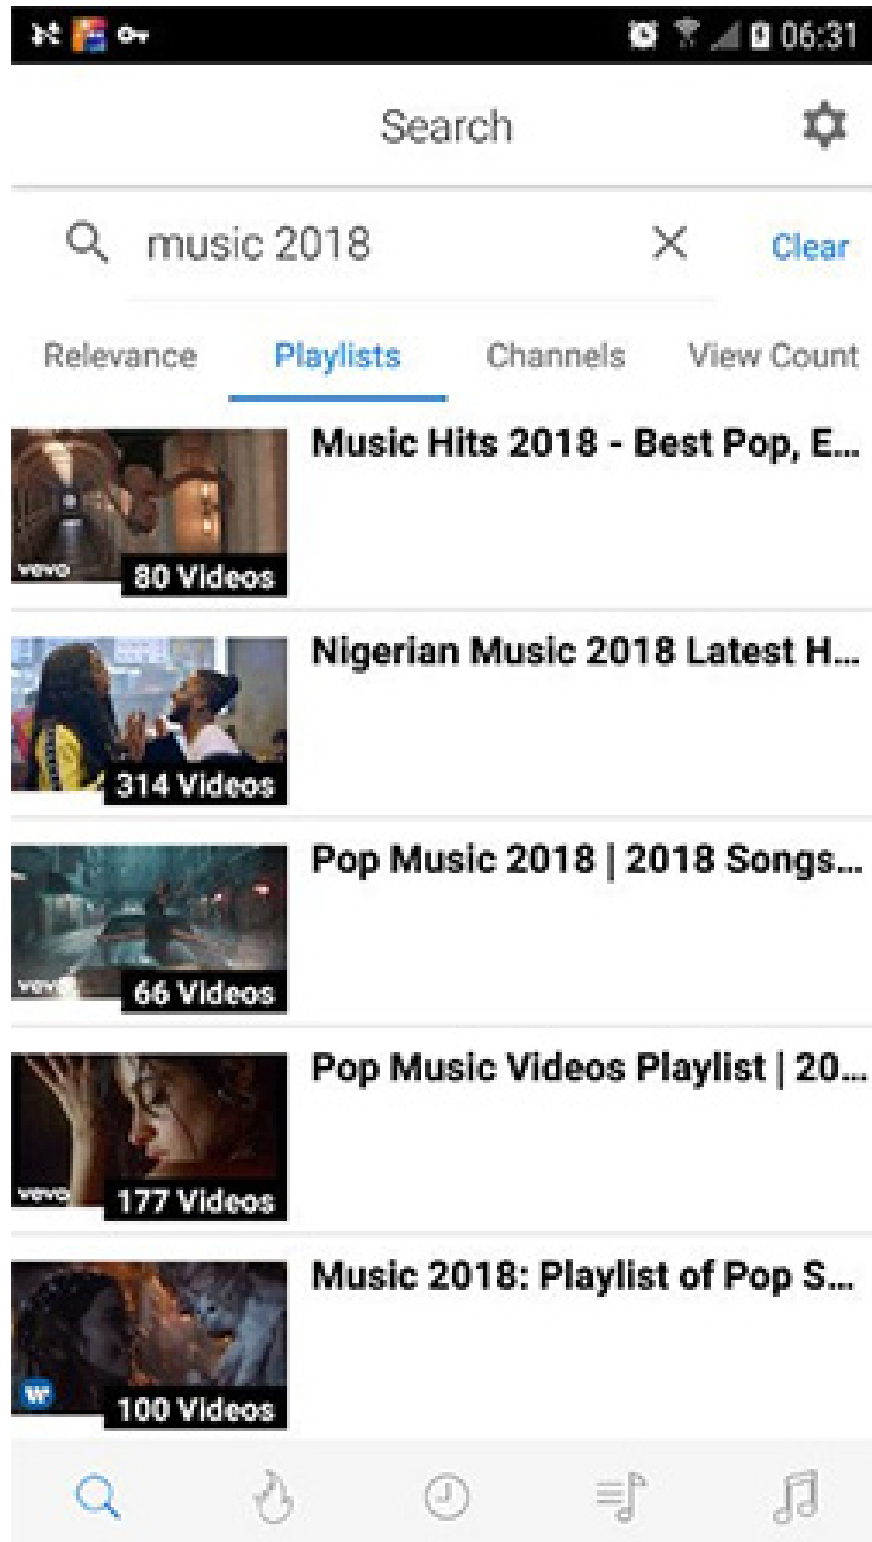

The application has a minimal interface, no ads, allows you to watch videos on Android and download or play YouTube videos even when the screen is off. You can let the video play at your favorite quality and use the built-in camera mode.

Although you cannot log into your YouTube account in the app, you can still subscribe to channels or enter existing subscriptions after exporting from the YouTube website.

## iTube (BG Player for YouTube)

iTube is suitable for those who use YouTube to watch music. You can still watch videos, but the interface is not as good as other apps on this list.

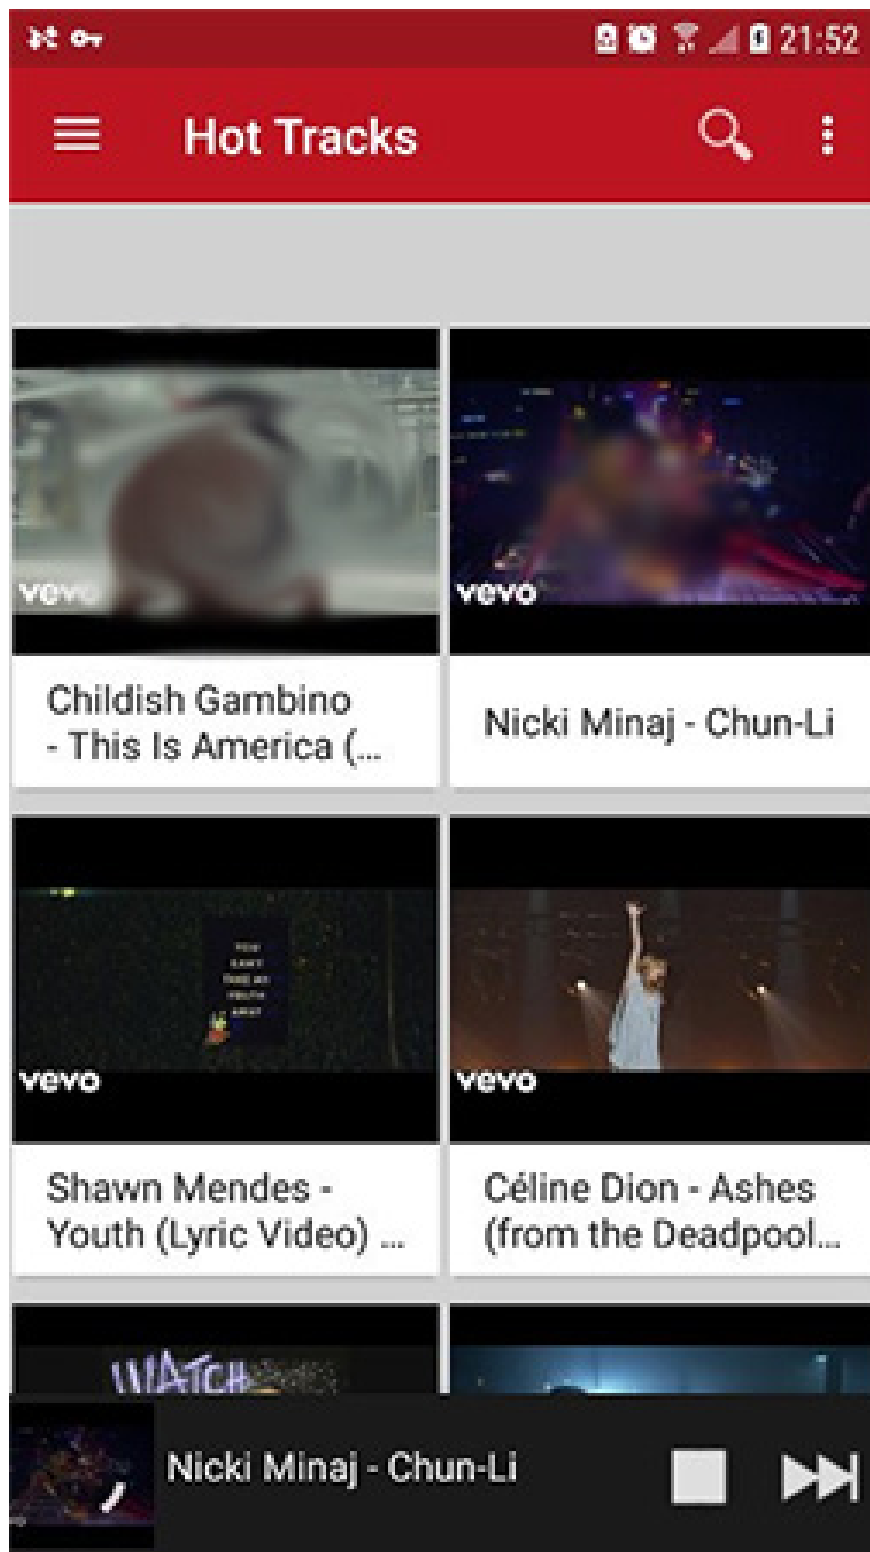

You can also choose to play any playlist or create your own playlist. The application also has functions: Sleep timer - Automatically turn off music; Watch the lyrics (popular) .

Although YouTube ads are blocked, the app has its own ads. You need to use ad blockers to turn them off.

## **FireTube**

FireTube is a great app for those who want to save mobile data by listening to it without watching videos. The application is not available on Google Play Store, you must download the APK file and install it manually.

You can use the application to watch any YouTube video (not music videos only). The sound will be played in the background even if you switch to another application or turn off the device screen. It is important that the application allows you to login to your YouTube account to listen to your own list.

In addition, you can try YouTube Vanced application with many great features for Android.
