

The best computer applications for iPhone

You are using iOS 11 and have an error with the iPhone computer application, please see the best computer applications for iPhone in this article!

Those who have upgraded their iPhones to iOS 11 , must have also discovered a small error in the computer application that is integrated in the software. When performing a simple calculation like $1 + 2 + 3$, everyone knows that the result is 6, but the iPhone computer application on iOS 11 version results in 24. The ability to record commands of the computer On iOS 11 an error has occurred and failed to produce the correct result. If you are experiencing this error and need a reliable computing application, try some of the third-party apps below before the App fixes this bug.

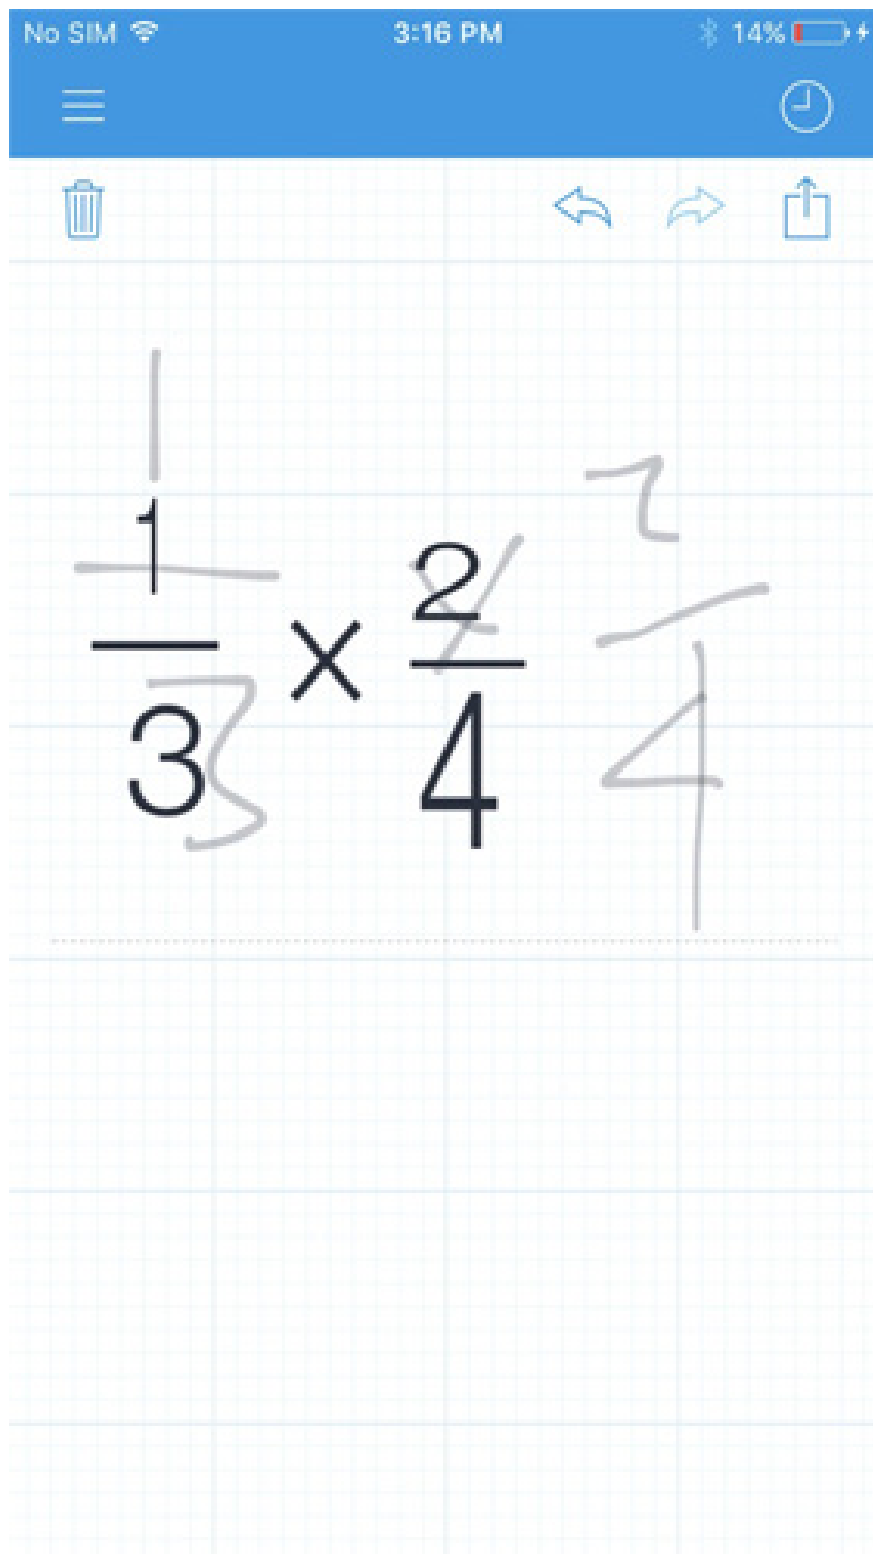

1. Essential applications for new iPhone users

The best computer applications for iPhone

1. Free computer applications for iPhone
 1. MyScript Handwriting Calculator
 2. Free Graphing Calculator
 3. Calcbot
 4. Numerical2
2. The paid computer applications for iPhone
 1. PCalc
 2. CALC Smart
 3. Tydlig

Free computer applications for iPhone

1. MyScript Handwriting Calculator

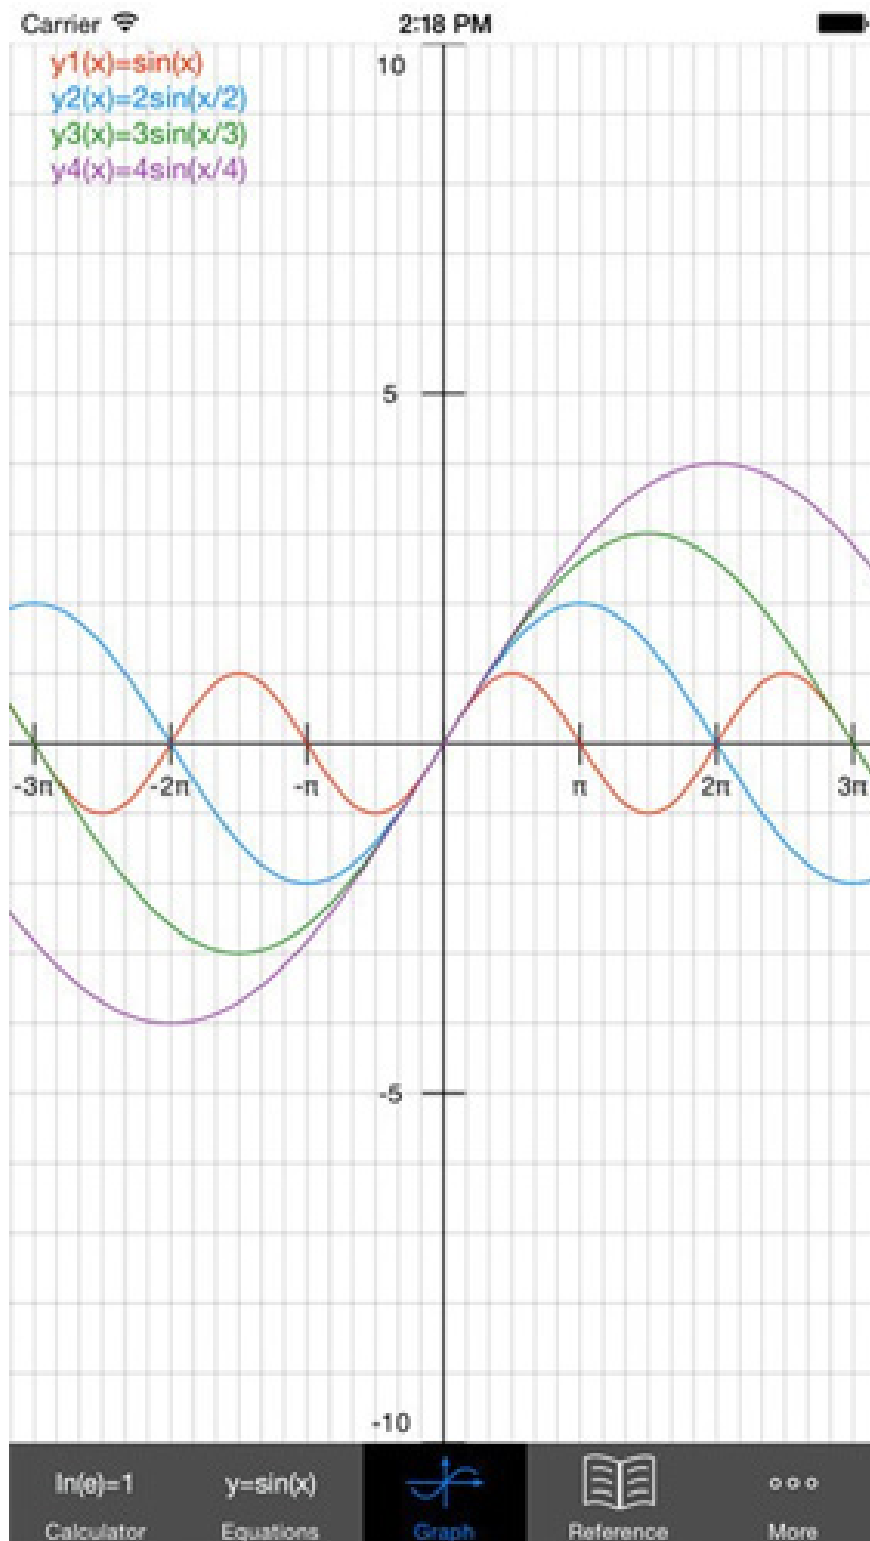

MyScript is the perfect calculator application for those who need fast results. It turns handwriting into digital text, so if you want to make a long division or find the square root of a certain number, just write it with your finger and see the result.

In addition, you can perform many mathematical functions using trigonometry, basic math, percentage, inverse trigonometric functions, etc.

Download: MyScript Handwriting Calculator

2. Free Graphing Calculator

There is no need to spend money on TI-83 anymore because there is a free Free Graphing Calculator (or you can spend a dollar and not have to watch ads). The Free Graphing Calculator features as a scientific calculator performing calculations such as square root, square root, natural logarithm, base 10 logarithm, permutation and many other calculations. It is also capable of drawing graphics that graphs up to four equations at once.

Users have full control over the graph with dragging as well as pinch zooming. If you are looking for a powerful graphics calculator application, Free Graphic Calculator is a great choice.

4. Numerical2

Numerical2 is a colorful computer application. A special feature is that this application has no marks, you just need to enter and receive results immediately. Numerical2 equipped with a full scientific numeric keypad, a fractional key for quick fractions calculations, the ability to use pi and e to infinite positions for accurate results

for any equation.

You can drag down the keyboard to view your history while working and Numerical2 fully supports multitasking on the iPad.

The paid computer applications for iPhone

1. PCalc

PCalc is advertised by the App Store as the best computer application. This is one of the most full-featured computer applications today and thanks to the availability of iPhone, iPad, Apple Watch and Mac it made it popular.

This is the perfect calculator application for scientists and engineers, it has buttons and options for advanced functions such as optional RPN mode and multi-line display. You can choose button layout, track calculations

using paper tape feature, undo and redo custom users and more. With PCalc, you can perform the most complex calculations such as hexadecimal, octal (octal) and binary.

Download: PCal (\$ 9.99)

2. CALC Smart

Smart CALC is a nice interface app, arranges neat calculations by separating them based on the date. You will receive results in real time while entering, even if the calculation has parentheses and can swipe to calculate the conversion quickly. Themes and layouts can be changed to suit user preferences.

Download: CALC Smart (\$ 3.99)

3. Tydlig

If computers are complex enough that you have to brainstorm, a nice, easy-to-read, easy-to-use computer application will be the right choice and Tydlig can meet your needs. Tydlig is the perfect calculator for everyday use, it helps calculate discounts, view and edit calculation history and store in an infinite frame.

You can fine-tune everything you need and Tydlig even has the graphics capabilities, allowing you to connect calculations to graphs in real time and update with any changes in expressions. You can then share your entire history and print it or export it as PDF.

Download : Tydlig (\$ 1.99)
