Norton AntiVirus 2011 (Price: 149,000 VND)

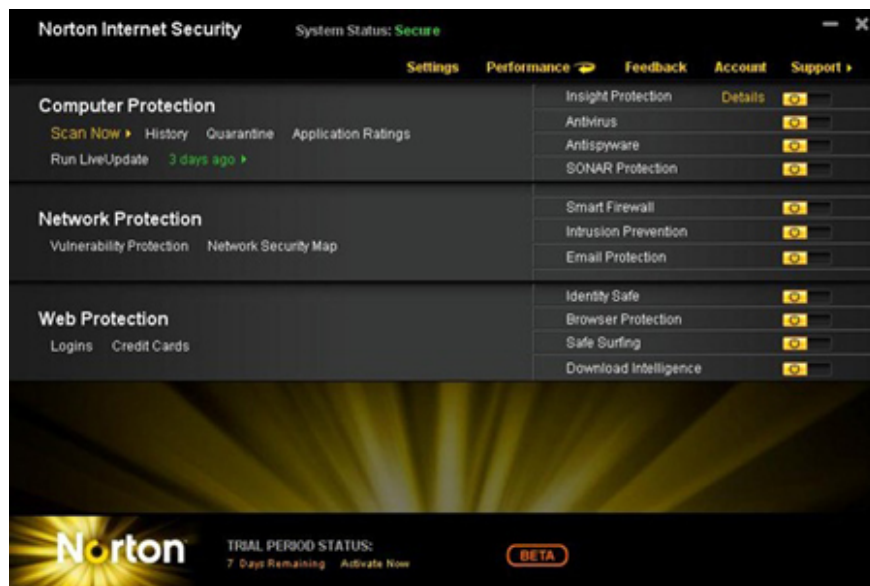

The latest product of Norton 2011 version has brought users many advanced features and other utilities included. Technically, Norton Antivirus 2011 provides 3 levels of protection for users. The first is based on Norton's identity database which is constantly being updated to ensure the latest viruses and malware are detected.

The second layer with the name SONAR - Symantec Online Network for Advanced Response, based on dangerous behaviors but not yet clearly classified. Many sophisticated malware today can easily overcome the identity and behavioral databases of popular security programs. But Norton's third layer of protection is the most effective Norton Insight Network.

Norton Internet Security (Price: 249,000 VND)

Norton Internet Security 2011 is a comprehensive security version, providing users with tools to prevent viruses, spyware, firewalls and antispam tools. According to Symantec, this 2011 version will be able to improve the memory usage that is overused by the previous version. Besides, the system installation as well as the scanning capability takes place faster.

The highlight of Norton Internet Security 2011 is the addition of a new feature called System Insight 2.0 that alerts users when other applications are taking up too much memory and system resources. In addition, both Internet Security and AntiVirus 2011 are equipped with the Download Insight 2.0 feature, which allows the system to be protected, avoiding the dangers of stalking in browsing, email, or instant messaging programs (IM).

Eset NOD32 Antivirus (Price: 390,000 VND)

ESET NOD32 is an extremely compact AntiVirus compared to other professional AntiViruses, supporting RealTime Protection mode, fast detection and scanning speed. Easily updated, ESET also has a Repair (Clean) mode of infected .EXE files like Symantec, protecting you from viruses, spyware, rootkits, and more.

ESET products are considered fast, efficient and easy on system resources. ESET recently released a new version of ESET NOD32 product 4.2. We compared the performance of the new version of ESET Smart Security 4.2 with previous versions of the product and found that optimization efforts led to better performance and reduced demand. Memory.
