

# The best computer recording software

The best computer recording software. Below the article introduces you to 3 free recording software on your computer, you can refer and choose to use.

Currently there are many recording software on professional computers but these are mostly paid for to use, but many of you can not afford to pay for these software. On Windows also has built-in sound recorder software, but this software does not meet some of the requirements that you want to use.

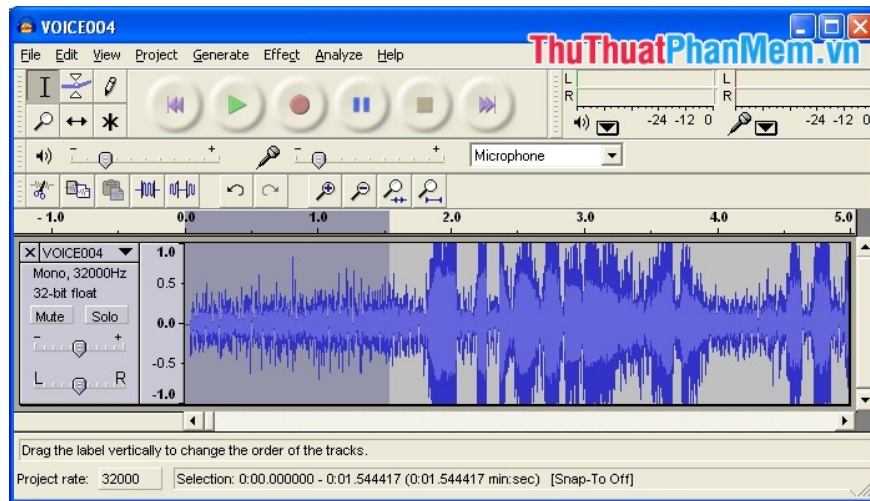

Below the article introduces you to 3 free recording software on your computer, you can refer and choose to use.

## Audacity

Audacity is a free and open source recording software on computers, it is available for Windows, Mac, GNU / Linux and other operating systems. Audacity was released in 2000 and developed by Dominic Mazzoni and Roger Dannenberg at Carnegie Mellon University. Audacity helps you record your voice or sounds from various sources on your computer. In addition, it is also used to edit music and sound to help keep your recordings free of distractions by noise when recording.

Audacity is still very much developed and used by many of its useful features. Here are some key features of Audacity:

- Import and export WAV, AIFF, MP3, WMA, AAC, AMR, FLAC, Ogg Vorbis and many other formats.
- Record from microphone, input path or other sources and play back audio.
- Support recording from 16 channels at a time.
- Edit audio with simple editing tools: cut, copy, paste, delete and undo unlimited operations (go back to previous operations).
- Supports audio 16 - 24 - 32 bit.
- Edit amplitude, eliminate noise in recorded sound.
- Multi-platform operation (available on many computer operating systems).
- Support many keyboard shortcuts .

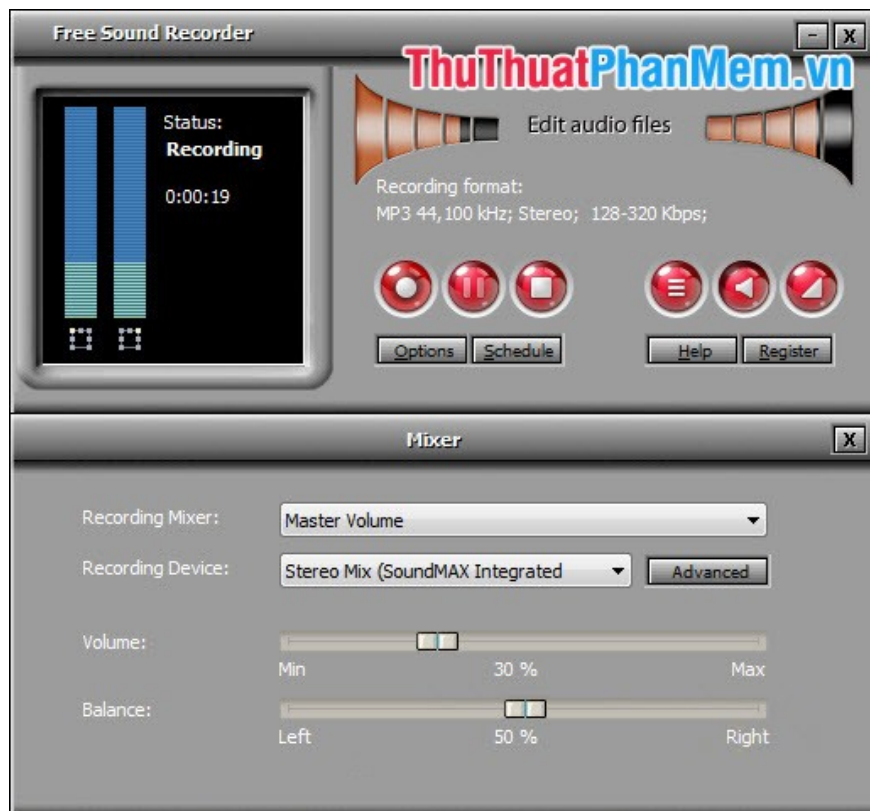

You can download the latest version of Audacity at: <http://audacityteam.org>.

## Free Sound Recorder

Similar to the Sound Recorder software built into Windows, Free Sound Recorder has improvements and more options. Free Sound Recorder is a neat free recording software that helps you record audio from multiple sources on your computer and save audio in more formats, support shortcuts and some more advanced features.

Some key features of Free Sound Recorder:

- Record all sound processed through video card such as: Microphone, cassette, CD / VCD, Radio, audio from software playing music on computer.
- Record audio from Internet programs, audio from online music websites.
- Customize, set the recording time.
- High quality sound recording, automatically eliminates the noise during recording.
- Support saving audio files in different formats WMA, WAV, MP3.

You can download Free Sound Recorder at: <http://www.sound-recorder.biz/freesoundrecorder.php>.
