

# The best, fastest DNS list of Google, VNPT, FPT, Viettel, Singapore

DNS is an abbreviated Domain Name System for Domain Name Servers. Currently, in addition to DNS Google is chosen by many people, and many different DNS services also stabilize and speed up network access.

DNS is one of the basic concepts of Internet connection. DNS is basically an abbreviation for Domain Name Servers, which translates a domain name into an IP address so that computers use identity on the network. When we visit websites like quantrimang.com, this URL is compiled into a digital IP address and accessible to the website.

In this area of information technology, DNS is widely and widely applied, especially in accessing blocked websites such as blocked Facebook access, maintaining stable connections and increasing speed. network connection to download videos on Youtube, . And Google DNS is now used by many people due to high speed and connection stability. However, we can also use many other DNS services to change computer system DNS, because each time will affect DNS speed. We can refer to the list of DNS services below to use.

1. Instructions to change DNS Server on Windows, Mac, iOS and Android

## Google DNS:

IPv4:

1. 8.8.8.8
2. 8.8.4.4

IPv6:

1. 2001: 4860: 4860 :: 8888
2. 2001: 4860: 4860 :: 8844

If the device does not accept abbreviation :: of IPv6, enter the following DNS:

1. 2001: 4860: 4860: 0: 0: 0: 0: 8888
2. 2001: 4860: 4860: 0: 0: 0: 0: 8844

Or later DNS, if the machine requires 4 hex in each part of the IPv6 address

1. 2001: 4860: 4860: 0000: 0000: 0000: 0000: 8888
2. 2001: 4860: 4860: 0000: 0000: 0000: 0000: 8844

## **DNS Singapore:**

1. 165.21.83.88
2. 165.21.100.88.
