

The best free messaging app

In recent years, the software with the function of texting and making free calls appears more and more on software repositories of iOS, Android, Windows Phone ... so users are difficult to choose suitable software.

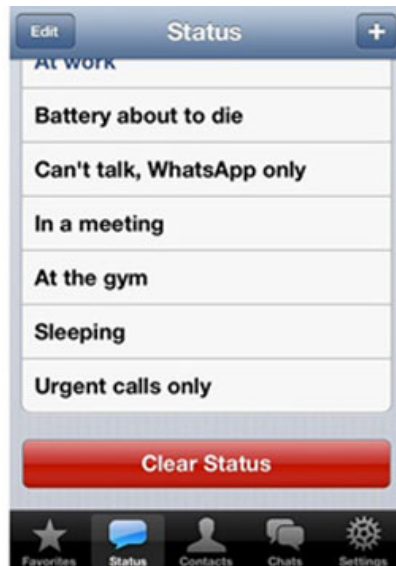

Today, more people communicate via text messages than actual phone calls. The message history will serve as a reference in case you need to review something someone has said.

But SMS is old. Now, the use of Wi-Fi and mobile data is becoming increasingly popular, there is no reason to continue using the old SMS protocol. Are you looking for a better messaging experience? Take the time to review the following convenient apps!

The best free messaging app

1. WhatsApp (Android, BlackBerry, iOS, Windows Phone)
2. Viber (Android, BlackBerry, iOS, Symbian, Windows Phone 7)
3. Facebook Messenger (Android, BlackBerry, iOS)
4. Google Hangouts (Android, iOS)
5. Textfree (Android, iOS)
6. TextPlus 2013 (Android, iOS, Kindle Fire, Windows Phone 8)
7. Signal (Android, iOS)
8. Tango (Android, iOS)
9. KakaoTalk (Android, iOS, Windows, Mac)

WhatsApp (Android, BlackBerry, iOS, Windows Phone)

WhatsApp is a mobile messaging application that allows you to exchange messages without having to pay for SMS. WhatsApp is currently available for **iPhone** , **BlackBerry** , **Android** , **Nokia** and these phones can text each other!

WhatsApp uses the same internet data package that you use email and browse the web, so you will not have to waste the cost of messages when communicating.

Also with WhatsApp Messenger users can send unlimited photos, videos, audio to each other.

Viber (Android, BlackBerry, iOS, Symbian, Windows Phone 7)

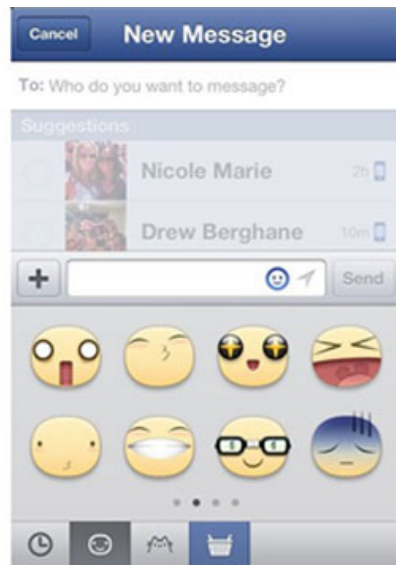

Viber allows you to text, call, and send free photos and video messages worldwide with **over 200 million users** using **3G or Wifi**. Viber is available for **Android** , **iPhone** , **Blackberry** , **Windows Phone** and many other

devices or platforms.

On Viber, your **phone number is also your ID** . The app syncs with your mobile contact list, automatically detects the contacts that have been installed Viber.

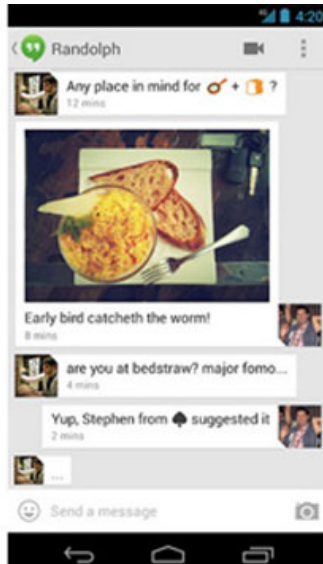

Facebook Messenger (Android, BlackBerry, iOS)

As a **mini chat** widget **of facebook** exclusively for users, you can chat with your friends on facebook interactive mode of this software is similar to **yahoo** .

Pretty simple but extremely convenient because facebook messenger supports quite a lot of current popular operating systems and ensures absolute security and safety when using. In addition to being able to see who is online, facebook messenger also helps you send messages to offline or offline members.

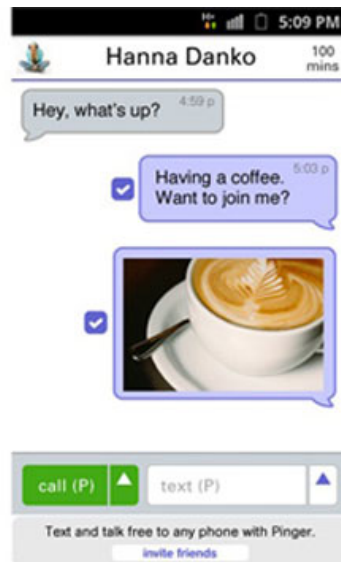

Google Hangouts (Android, iOS)

Hangouts app supported on both **Android and iOS** platforms. This Google translation will allow users to communicate and communicate with others via the Internet without having to care about the type of device they use.

Users can use Hangouts to send messages, make phone calls, make video calls, share photos or talk features and group chat . group video chat features allow users to join the conversation. with up to 10 others.

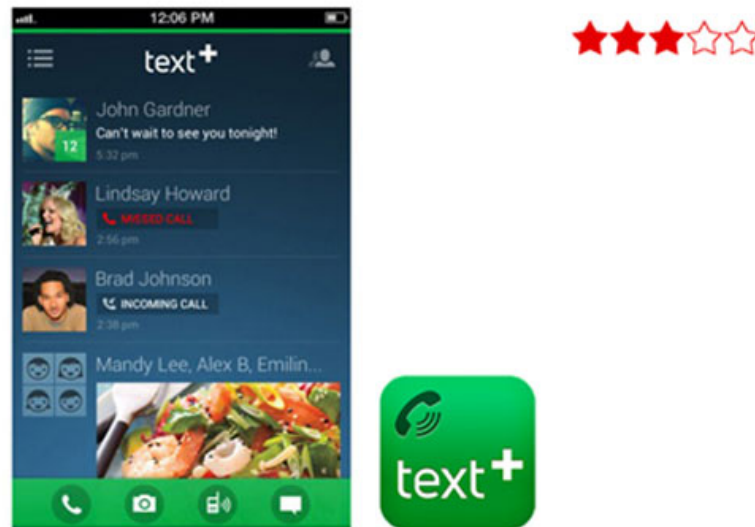

Textfree (Android, iOS)

Textfree is another suitable free messaging application in case you don't mind being bothered by ads. This is an **application exclusively for iPhone and Android** , granting you a new phone number to send and receive messages.

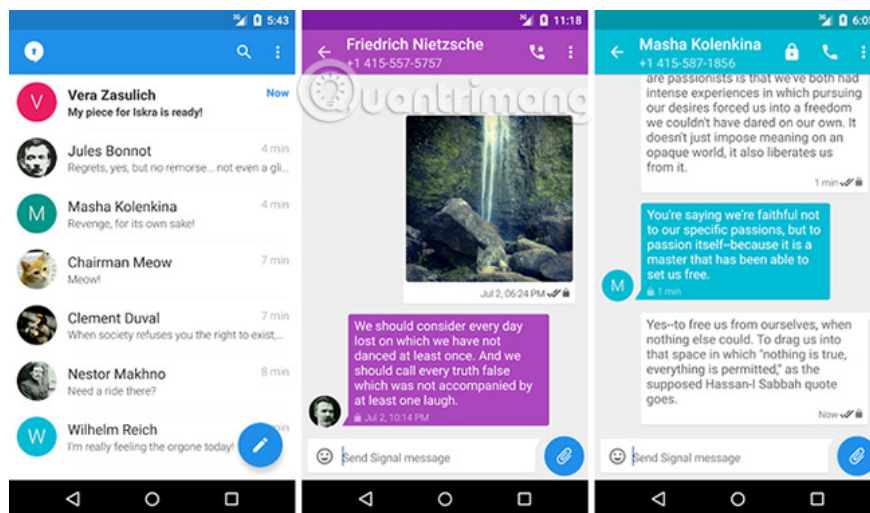

The application is free, but if you want to remove ads, you must pay 5.99 USD / year. Textfree was evaluated by the *New York Times* as "the *fastest, most reliable and easiest to use*".

TextPlus 2013 (Android, iOS, Kindle Fire, Windows Phone 8)

TextPlus application provides free and unlimited messaging for your phone. It gives you a free phone number. This application is known for group messaging features, allowing you to talk to people around the world in a chat-room-type location. Picture messages and voice notes are also integrated.

Signal (Android, iOS)

Online privacy is a hot topic every year. Did you know that your phone can be used to track yourself? And sometimes it is not that you are attacked by a spy, but simply, it is the result of sharing too much information online.

That's why Signal is an important application you should have. Confirmed by Edward Snowden himself, this encrypted tool allows you to communicate without being overheard or interfered with. It also has open source (useful in case you want to test the code yourself).

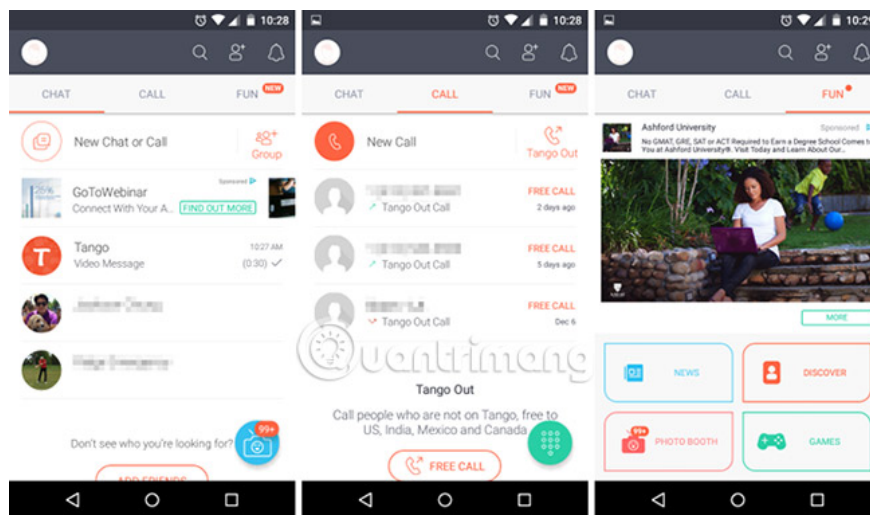

Main function:

1. Phone calls from this Signal user to other Signal users are free (domestic and international).
2. Messages from this Signal user to other Signal users may include text, images, videos.
3. Messages from this Signal user to other Signal users can be sent to groups.
4. All messages are encrypted from beginning to end.
5. SMS messages can be sent and received but not encrypted.
6. Use your current phone number and address book.
7. Signal servers do not store any messages.
8. Available on Android and iOS.

Of course, Signal is not the only privacy-guaranteed messaging app, but Signal is one of the best options (Signal is ranked 4.6 out of more than 98,000 reviews). If you don't like it, try a few other options on this list.

Download Signal (free).

Tango (Android, iOS)

The main focus of Tango is video calling but its text messaging features are quite complete and useful for most users. Like Viber, the power of this app is similar to the powerful WhatsApp tool, and it will be a worthwhile consideration if WhatsApp doesn't suit your needs.

One thing to note is that Tango does not seem to have any kind of encryption on the message, so if you are particularly concerned about online privacy, you can give up on Tango and choose one. in other applications.

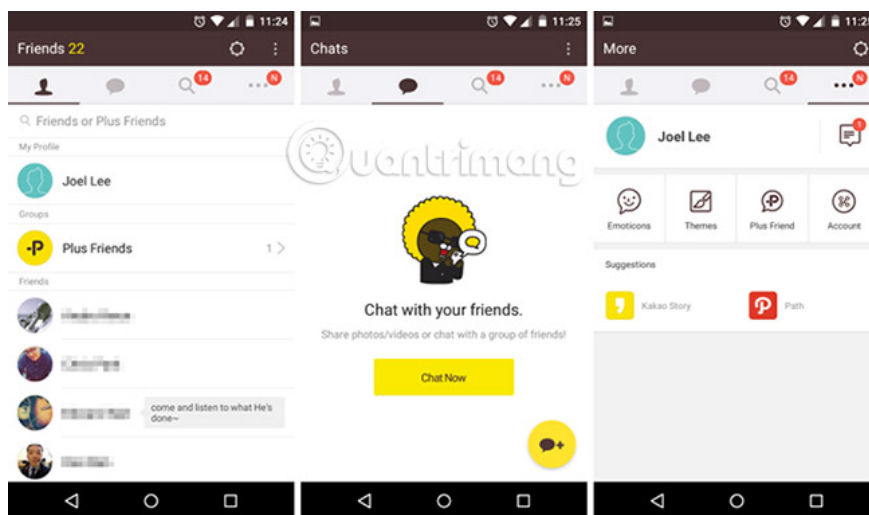

Main function:

1. Phone calls from Tango users to other Tango users are free (domestic and international).
2. Free Tango calls are free in the United States, Canada, India and Mexico.

3. Messages from users of Tango to other Tango users may include text, voice, image, video, document, sticker.
4. Messages from users of Tango to other Tango users can be sent to groups.
5. Use your current phone number.
6. Request a Tango account.
7. Available on Android and iOS.
8. Tango ranked 4.3 out of 3,600,000 total reviews.

Download Tango (free).

KakaoTalk (Android, iOS, Windows, Mac)

KakaoTalk is used by more than 90% of smartphone owners in Korea, but it is also very popular in the US, most of whom are Korean Americans.

But over the past few years, it has attracted quite a few users from other countries, partly because of its modern interface, fast performance and powerful features. Unfortunately, the lack of encryption is a pretty big minus for this application.

Main function:

1. Phone calls from Kakao users to other Kakao users are free (both domestic and international).
2. Messages from this Kakao user to other Kakao users may include text, voice, images, videos, stickers.
3. Messages from this Kakao user to other Kakao users can be sent to groups (unlimited).
4. Use your current phone number and address book.
5. Exclusive deals and discounts on well-known brands.
6. Available on Android, iOS, Windows and Mac.
7. KakaoTalk is ranked 4.2 out of more than 2,300,000 reviews.

Download KakaoTalk (free).
