

# The best gaming routers today

Top gaming routers are designed to prioritize network traffic from games, through a feature called Quality of Service - Quality of Service (QoS), so your gaming will not be interrupted if the roommate is trying to watch Netflix at the same time. Here are the best gaming routers you can buy at the present time.

If you regularly play online PC games, you may need one of the best gaming routers to ensure that your gaming is never interrupted.

Simply put, top gaming routers are designed to prioritize network traffic from games, through a feature called Quality of Service - Quality of Service (QoS), so the job Your game will not be interrupted if your roommate is trying to watch Netflix at the same time.

If you ask any gamer, they will definitely tell you that using a wired connection to play online games is the best way to do that. The truth is so. Therefore, the best gaming routers will have multiple Gigabit Ethernet ports.

However, it is not possible for everyone in the house to use a wired connection. Top gaming routers will have the latest and fastest Wi-Fi standards, currently Wi-Fi 5. External antennas can be moved to control Wi-Fi signals to most areas. set in the house.

Here are the best gaming routers you can buy at the present time.

## The best gaming routers

1. TP-Link Archer C5400 v2
2. Asus RT-AC86U
3. The Netgear Nighthawk Pro Gaming XR500
4. Asus RT-AC5300
5. Zyxel Armor Z2 AC2600
6. Asus RT-AC88U
7. D-link DIR-885L / R

### 1. TP-Link Archer C5400 v2

1. Speed: 802.11ac: 2.167Mbps, 802.11n: 1,000Mbps
2. Connection: 4 x Gigabit Ethernet, 1 x WAN, 1 x USB 2.0, 1 x USB 3.0
3. Features: MU-MIMO support, Alexa integration, IFTTT
4. Plus points: Fast and powerful. Has Alexa and IFTTT support
5. Minus: Price is quite expensive.
6. Price: \$ 256.99 (VND 6,000,000)

If you're looking for one of the best gaming routers, combining classic looks and new technology, the TP-Link Archer C5400 v2 is exactly what you're looking for. Routers playing this game incorporate features for professional gamers and settings suitable for the majority of users. And with Alexa support, your router can adapt to any situation, even though many people are connected to the network at the same time.

## 2. Asus RT-AC86U

1. Speed: 802.11ac: 1,734Mbps; 802.11n: 450Mbps
2. Connection: 4 x Ethernet, 1 x WAN, 1 x USB 2.0, 1 x USB 3.0
3. Features: MU-MIMO, AiDisk, Response QoS, private network for WTFast gamers
4. Price: \$ 174.99 (VND 4,000,000)
5. Plus: Extremely fast transfer speeds. Wide scope.

6. Minus: Price is high. Features beyond need.

Asus RT-AC5300 is one of the best gaming routers. It comes with a range of advanced features, making online gaming smooth and without lag. This includes an easy-to-use but powerful interface, as well as comprehensive QoS settings. The design of the 'thorny' part of this router is not everyone's favorite, but its 8 antennas perform the most important function of controlling the Wi-Fi signal so that it can cover for the whole house.

### 3. The Netgear Nighthawk Pro Gaming XR500

1. Speed: 802.11ac: 2.6Gbps
2. Connection: 4 x Gigabit Ethernet, 1 x WAN, 2 x USB 3.0
3. Features: MU-MIMO support, QoS, geographic filters
4. Price: £ 232.55 (VND 6,195,000)
5. Plus: High performance. Great software.
6. Minus: No broadband modem

If you are a PC gamer and always have to compete for bandwidth with a roommate, you may want to consider a powerful gaming router like the Netgear Nighthawk Pro Gaming XR500. This router is not only appreciated for its incredible 2.6Gbps speed, but also by MU-MIMO support and other unique game-focused features, such as location-based connectivity filters and QoS, so you will be able to play games without lag. However, it is a bit expensive, so you can wait for some discount to get this product!

### 4. Asus RT-AC5300

1. Speed: 802.11ac: 2,167Mbps, 802.11n: 600Mbps
2. Connection: 4 x Gigabit Ethernet, 1 x WAN, 1 x USB 2.0, 1 x USB 3.0
3. Features: MU-MIMO support, link aggregation, traffic analysis, WPS, 512MB RAM, 8 external antennas
4. Price: \$ 231.99 (VND 5.4 million)
5. Plus: Great Wi-Fi coverage. Powerful gaming features
6. Minus: Slightly large size. Only one USB 3.0 port

Asus RT-AC5300 is an excellent high-end gaming router, comes with some advanced features to play online games without lag.

This includes an easy-to-use but powerful interface, as well as comprehensive QoS settings. Like Asus RT-AC86U, the Asus RT-AC5300's design is not popular, but its 8 antennas make the range of Wi-Fi networks more scalable, to every corner of your home. .

## 5. Zyxel Armor Z2 AC2600

1. Speed: 802.11ac: 2,167Mbps, 802.11n: 800Mbps
2. Connection: 4 x Gigabit Ethernet, 1 x WAN, 1 x USB 2.0, 1 x USB 3.0

3. Features: Support MU-MIMO, StreamBoost, 1.7GHz dual-core processor, 512GB RAM, set up based on Zyxel One Touch application
4. Price: \$ 169.99 (VND 3,970,000).
5. Plus: MU-MIMO wireless speed is good. Great traffic analysis software
6. Minus point: Very few current devices use 802.11ac quad-stream standard. Average USB port speed

Zyxel Armor Z2 AC2600 has great features. With the latest MU-MIMO support, which improves the speed when many devices are connected to the same network, the router plays this game proud of its performance. Because it can handle multiple devices at the same time and prioritize bandwidth according to the needs of each product, this is one of the best gaming routers you can buy at the moment.

## 6. Asus RT-AC88U

1. Speed: 802.11ac: 2167 Mbps 802.11n: 1000 Mb / s
2. Connection: 9x Gigabit Ethernet, 1x USB 2.0 1x USB 3.0
3. Features: 1024-QAM, MU-MIMO, private network for WtFast gamers, Asus AiProtection, AsusWRT software
4. Price: \$ 269.99 (VND 6,300,000)
5. Plus: The fastest wireless speed. Comprehensive software user interface
6. Minus: Price is quite expensive. There are special hardware requirements for the fastest speeds

Asus RT-AC88U has used the new generation 802.11ac wireless performance to justify its high price. With 4 NitroQAM antennas and technology, this gaming router allows wireless speeds to exceed the 1GB / sec limit. However, to achieve this speed you will need to purchase an additional NitroQAM wireless adapter, such as Asus PCE AC88. Thanks to the "massive" speed that Asus RT-AC88U is rated as one of the best routers for gamers today.

## 7. D-link DIR-885L / R

1. Speed: 802.11ac
2. Connection: 4x Gigabit Ethernet, 1x USB 3.0 Features: MU-MIMO, advanced wireless AC beamforming technology, SmartConnect
3. Price: € 229.99 (VND 6,15,000)
4. Plus points: There are many useful features. Good performance
5. Minus points: Slightly expensive

It may look like an old Battlestar Galactica product - Battlestar Galactica - but, D-Link DIR 885L / R is a reliable mid-range router with great range and speed. If you are looking for the best gaming router, you should try D-link DIR-885L / R. It has many ports and a nicely designed user interface. Open source software DD-WRT also contributes to making this router flexible and robust.
