

The best models of Bluetooth speakers in the price segment below 1 million VND

The price is cheap but the sound quality is not cheap.

Choosing to buy a good bluetooth speaker, suitable for use and importantly, reasonable price is not a simple thing as the mobile speaker market is growing rapidly with the emergence of dozens of brands as well as products, spanning all segments, from 'anti-deaf' to high-end. However, the Bluetooth speaker market also has very clear differentiation in selling prices, some cost several hundred thousand, while the rest only bear "return to your team" when you accept spending a dozen million dong. But you definitely won't need to spend a lot of money to enjoy high quality audio. With the high competitiveness of the current mobile speaker market, it only takes less than one million dong to have a compact Bluetooth speaker and a good song.

Portable speakers less than 1 million VND

1. The criteria to consider on portable Bluetooth speakers are under 1 million VND
 1. Size and weight

6. Anker Soundcore Moniton Q - Price is VND 1,080,000
7. Bluetooth Speaker Xiaomi Square Box Generation 2 (2017) - Price of 450,000 VND

The criteria to consider on portable Bluetooth speakers are under 1 million VND

In each price segment we will have different evaluation criteria, so what are the ideal Bluetooth speakers under 1 million?

Size and weight

Bluetooth speakers can have different sizes, but most people expect and appreciate mobility because the main advantage of wireless speakers and Bluetooth technology is that you can take them anywhere. I want to. Obviously they may not be as powerful as PC speakers or even bookshelf speakers, but the question of quality and portability is always number one, especially if you're planning a trip or a party. outdoor for example. However, not all models of Bluetooth speakers are compact. Some are large, bulky, while others can easily fit apple bags or hang on bags and backpacks. In addition, weight is also a factor that we need to consider.

Battery life

It can be said that battery life is the most important factor you need to keep in mind on a portable speaker. What if you brought a nice loudspeaker to listen to your favorite songs on long trips, but just 'singing' a few hours was the speaker still in your backpack? Note that the battery life mentioned in reviews or advertising information about the speakers often goes with the volume percentage used for each specific level. You only need to compare speakers with battery life at different volume levels, commonly 50% and 75%. In my experience, good portable speakers must have a battery life of no less than 6 hours at a volume of 50%. Another important thing to consider is the charging time. A Bluetooth speaker equipped with fast charging technology will always be appreciated.

1. How to check the battery of bluetooth devices connected to Android phones

Sound quality

The sound quality of the loudspeaker depends on the power of the driver that it is equipped with as well as the radiator and processor. High quality systems will give you better sound quality. Keep in mind that high-end speakers won't have any distortion at any volume level, and the sound bands will also be better balanced, including crisp highs and bass (bass). can go very deep.

Are the above requirements too low for Bluetooth speakers that cost less than 1 million? Not at all, the fierce competition of the market often makes manufacturers want to have a place to be forced to launch quality equipment at an increasingly affordable price. Many models of Bluetooth speakers cost only a few hundred thousand but can still deliver amazing sound quality. Certainly they may not be as good as expensive models, but overall are perfectly acceptable.

Water resistance

For a portable, waterproof Bluetooth speaker will be a highly appreciated feature, simply because they are designed for you to take with you when you're out and about, and your ability to withstand the conditions. of the environment like rain, dust is essential. However, not all mobile speaker models are equipped with this feature. In general, just like on smartphones, water-proof, dust is a fairly high-end feature and will certainly impact the price of the device. Therefore, consider carefully where you mostly use Bluetooth speakers, in what environmental conditions to choose for yourself a product that is both reasonably priced and suitable for your needs.

Connect ability

Although the main purpose of Bluetooth speakers is to serve music via wireless connectivity, some devices will still be equipped with more traditional 3.5 audio jacks - an option. Great in case you have to pair your speaker with a device that doesn't support Bluetooth.

Models of Bluetooth speakers are less than 1 million noticeable on the market

Below is a list (not rated) of the most affordable models of Bluetooth speakers in the price segment of under VND 1 million, from specs to durability, power and battery life, all the most important factors. For a portable speaker, we have already considered it. For now, come to our list.

JBL GO 2 portable wireless Bluetooth speaker - Price of VND 890,000

'An indispensable companion of every trip'

Advantages:

1. Great sound quality in price range
2. Compact size
3. Support audio input cable
4. There is water resistance
5. Support hands-free conversation
6. Easy pairing

Defect:

1. There is a phenomenon of breaking light at high volume
2. The bass band is not enough in quantity

JBL Go 2 is a valuable upgrade of JBL Go 1 - one of the most popular mini Bluetooth speakers of JBL. Like its predecessor, JBL Go 2 has a compact design and perfect IPX7 water resistance, comes with additional colors for everyone to choose. Specifically, JBL Go 2 measures only 71.2 x 86.0 x 31.6 mm and weighs only 184 grams, very convenient for moving as well as listening to outdoor music. This model has a capacity of 3W, enough to be heard in narrow spaces, about 15 square meters back, however, the product offers a harmonious, natural and easy listening sound, treble band as well as sound. The bass is very detailed, deep and gentle, providing crystal-clear pop, jazz or classical music, which helps users to have very relaxing moments.

With Bluetooth 4.1, disruption or disconnection on JBL Go 2 is very rare, and it also saves battery significantly. In addition, it is worth mentioning that another worthwhile upgrade is the IPX7 water-resistant capability, which allows you to enjoy music even in the harshest weather conditions. Battery capacity on JBL Go 2 has increased from 600mAh to 730mAh. Although the battery capacity increased by about 20% (130mAh), the playing time remained at 5 hours.

Overall, JBL Go 2 is one of the most affordable bluetooth speakers in the segment of less than 1 million with a good brand, the small design can fit in your hand, with water proof, clear sound quality, only Details help you have great relaxation moments with light music.

Anker Soundcore 2 - Price VND 900,000

High quality sound, the price is not high.

Advantages:

1. Excellent sound quality
2. Strong bass band
3. Music playback time is up to 24 hours
4. Good outdoor operation with water resistance

Defect:

1. Sound bands are poorly controlled at high volume levels

Anker has always been known for its technology products, reasonable price accessories and excellent quality, and the Anker Soundcore 2 is not out of the tradition.

If you've ever owned an Anker Soundcore 1, upgrading to Soundcore 2 is not worth it because essentially, Soundcore 1 is already an excellent product, and Soundcore 2 is merely a slight upgrade. never mind. However, if this is your first time buying a Bluetooth speaker, the Anker Soundcore 2 is a bargain. In other words, the sound quality on the Anker Soundcore 2 can absolutely be 'played beautifully' by some other models in the 1.5 million to 2 million segment. Moreover, the loudspeaker's capacity is also very large compared to the selling price of VND 900,000, up to 12W.

Specifically, Anker Soundcore 2 has dimensions of 165 x 45 x 54mm, equipped with two full-range speakers with a diameter of 1.5 inches, a capacity of 6W each. These two speakers use dual neodymium driver technology and advanced digital signal processing, to minimize audio distortion, with a 5200mAh battery for up to 24 hours of playback time. continuously according to the manufacturer's announcement. The device has Bluetooth 4.2 support for maximum pairing within 20m.

In addition, Anker Soundcore 2 is also equipped with an AUX port that allows you to play music from devices that do not support Bluetooth. Anker Soundcore 2 has an IPX5 waterproof rating, which means the device can operate in a variety of weather conditions such as dust, snow, rain or be used in beach and pool parties (save

Italian manufacturers do not encourage immersion of underwater equipment).

AOMAI SPORT II - Price of VND 1,000,000

The best waterproof Bluetooth speaker is under 1 million VND.

Advantages:

1. Good finish, high durability
2. 12 hours of continuous music playback
3. Waterproof design
4. Sound balanced
5. Support hands-free talk feature

Defect:

1. Slightly bulky

Adding a Bluetooth speaker is worth your attention at a price of less than 1 million VND AOMAI Sport II. The device uses a set of drivers that can provide stereo sound with a total capacity of up to 20W. Like Anker Soundcore 2, this AOMAI Sport II has a strong, impressive and important bass range that is well controlled, with little distortion at high volume levels. Sound quality is relatively balanced in different bands and volume levels.

AOMAI Sport II has a waterproof design with the highest rating of IPX7, which means you can soak this speaker under water for about half an hour. In addition, dust-proof, shock-proof, mud-resistant and active in extreme weather conditions are also 'no need to think'.

Design is a very praiseworthy point on this speaker. You'll love the ruggedness, made up of the highly durable materials of AOMAI Sport II, to keep the speakers from scratches or damage during long trips, as well as outdoor parties. friend. AOMAI Sport II also comes with a large battery, for up to 12 hours of continuous use and built-in microphone for convenient hands-free talk mode!

JBL Clip 2 - Price of VND 1,090,000

A compact and versatile Bluetooth speaker.

Advantages:

1. Excellent sound quality
2. Compact size, high mobility
3. Support audio input cable

Defect:

1. Bass range is lack of quantity

Most models of Bluetooth speakers in the segment of less than 1 million are very small, compact, but the mobility is so good that you can hook into the waistband to run and listen to music like the 2-way JBL Clip is very rare. It can be said that this speaker provides a great alternative for those who do not want to use Bluetooth headsets while on the move. Everyone, from gardening to playing sports will find it very helpful. The device includes a carabiner clip so you can mount or hang anywhere: Pants, backpacks, bags - a speaker that literally means 'portable speakers' that JBL creates.

With such a small size (weighs only 184 grams), it is not surprising that the JBL Clip 2 cannot be "loud" as other rivals in our list. The clip 2 was JBL being subjected to a single full-range speaker with a capacity of only 3W, but in return this speaker produced a very good sound quality, relatively balanced and overall quite harmonious in all three bands. However, for the basshead, the bass band on the JBL Clip 2 will definitely not meet the expectations.

In addition, the JBL Clip 2 will be IPX7 waterproof, with a built-in 3.5mm audio cable for easy pairing with non-Bluetooth devices. The product is also equipped with built-in microphone for hands-free conversation and up to 8 hours of continuous use according to the manufacturer's announcement.

DOSS SoundBox - Price of VND 790,000

Powerful Bluetooth speaker in the segment of less than 1 million

Advantages:

1. Nice design, suitable for many customers
2. High quality stereo sound
3. Support fast charging technology
4. Support Micro SD card
5. Large volume
6. Good finishing, sturdy, firm

Defect:

1. The integrated voice sounded a bit uncomfortable
2. No water resistance
3. The sound has slight distortion at the highest volume

If you are a person who is particularly interested in sound quality, DOSS SoundBox is a product not to be missed in the Bluetooth speaker segment under VND 1 million. Thanks to the luxurious metal design, DOSS SoundBox looks very stylish and suitable for many different types of customers, but if you think that behind a beautiful design and good price is nothing special then you confused. This Bluetooth speaker is equipped with two high-performance drivers, for a total capacity of up to 12W, accompanied by stereo technology that will surely deliver an unmistakable audio experience.

In addition to Bluetooth and AUX-in connectivity, DOSS SoundBox is also one of the few price range models that is equipped with Micro SD card reader, which is a big plus for this product. However, the presence of Micro SD card slot also means that DOSS SoundBox will not be equipped with water resistance and therefore will not be suitable for outdoor use.

DOSS SoundBox Bluetooth speaker with dimensions of 167 x 73 x 68mm, using 2200mAh battery for 12 hours of continuous music playback, comes with Bluetooth 4.0 technology for a maximum range of 10m connection. Products are being sold in white, black, blue and red.

Anker Soundcore Moniton Q - Price is VND 1,080,000

Anker with a modern design of Anker

Advantages:

1. Excellent sound quality
2. Perfect, sure
3. Compact size
4. Water resistant

Defect:

1. Bass band is slightly weak

Anker Soundcore Motion Q is a portable Bluetooth speaker with a beautiful design, good sound quality and very reasonable price. Thanks to two dual passive diaphragm membranes and two full-range drivers for a total capacity of up to 16W, this speaker will be able to deliver 360 ° audio at a very high volume. Anker Soundcore Motion Q has a compact yet complete design that is very polished, rugged with IPX7 water and dirt capabilities, and a versatile night use in a variety of weather conditions. In addition, Bluetooth 4.2 technology allows the speaker to be easily connected to other devices within a maximum range of more than 20m. Anker Soundcore Motion Q measures 88.9 x 88.9 x 109.2mm, weight 416.7g and gives music playback time of 10 hours continuously as announced by the manufacturer.

Bluetooth Speaker Xiaomi Square Box Generation 2 (2017) - Price of 450,000 VND

Cheap price speaker with excellent sound quality

Advantages:

1. Very good price
2. Great sound quality in price range
3. Nice design, luxury

Defect:

1. No water resistance

Referring to the quality products that exceed price without mentioning Xiaomi, it is a shortcoming. Xiaomi Square Box 2 is one of the products that converge all typical strengths on a Xiaomi device: Good performance, beautiful design and great price. This is the successor of the Square Box 1 line, the design is square, the corners are curved, compact (154.5 x 60 x 25.5mm, weighing 155g) for high mobility. The frame is made of good impact resistant metal. Besides, the speaker is also equipped with stereo system with two speakers with the same capacity of 2.5W. 1200mAh battery for continuous music playback time after a full charge up to 10 hours and works well in the space of 25-30m².

In terms of sound quality, Xiaomi Square Box 2 has a very good balance in all sound ranges, bass is not too much, but it is quite compact and relatively compact, mid and treb are enough to use, making the speaker can 'weigh' well from chamber symphony to Pop, Dance or RnB. Overall this is one of the best-rated portable speakers in the under-500,000 range that you can take with you to enjoy a relaxing moment with your favorite music. Unfortunately, Xiaomi Square Box 2 is not equipped with waterproof features, but we should not ask too much for such a compact mobile device in this price range.

The above are 7 models of Bluetooth speakers with the most noticeable 1 million at the moment. What do you think about these speakers? Or what additional products do we need to add? Leave a comment for us in the comment section below! Wish you can choose for yourself the most suitable product.
